Prospects for the American Age Prof. Jamal Sanad Al-Suwaidi, The introduction, “Power Structure in the New World Order (Argument of the Book),” highlights the main theme around which the study revolves, namely the “new world order.” It presents the hypothesis of the study regarding this new order, along with several questions including: what are the factors that indicate the coming of a new world order?; what are the most influential forces in that order?; how is that order structured?; and what are the most important and influential factors in the world order? The introduction also presents the main premise of the book — that the United States of America may be considered the dominant pole in the new world order, and that the world will continue to exist in an American age that is expected to extend for at least a further five decades. The qualitative supremacy of the United States of America has proven inescapable according to the data, statistics and information presented in this book, as well as the scales and variables of comparison adopted by the author in terms of economics, military advancement, energy resources, transportation, education, culture, and technological progress. According to these standards, the structure of the new world order may be described as a hierarchy, with the United States of America alone at the top, followed by a second tier comprising Russia, China and the European Union, a third tier consisting of Japan, India and Brazil, followed by the rest of world. The introduction to this book may be considered a basic foundation for the analysis presented in the following seven chapters, which examine the emergence, current status, and future of the new world order in its various dimensions. Under the heading, “The New World Order: Features and Concepts,” the first chapter of Al-Suwaidi’s new book presents a theoretical paradigm for the concept of the new world order in its various dimensions. It presents two main themes: the first deals with concepts relating to the world order, drawing on literature that examines the evolution of the world order from the Peace of Westphalia in 1648 to the present day. It also presents various different views and arguments concerning the nature of the world order, and the distribution of power within it. The first theme also explores the political, military, economic, cultural, educational, technological and energy-related dimensions of the world order, and their importance in determining the relative powers of actors in the new world order. Moreover it explains how the United States of America has succeeded in utilizing all these tools to achieve its ends, and how it leads this world order according to a universal strategic vision aimed at maintaining US supremacy vis-à-vis other major powers. The first theme also presents an objective assessment of the different frameworks which are employed in analyzing the concept of the new world order. The second theme of this chapter discusses the main features of the new world order, which play a significant role in the interactions that occur within it, and which define it with regard to previous historical eras of the global system. Chapter II, “Factors Influencing the Structure of the New World Order,” examines the factors and patterns of influence and interaction within the world order. These factors include: relations among civilizations, relative power in international relations, economic factors, military superiority, technological development, levels of knowledge, challenges and variables, and the behavior of major powers. Chapter III, “The World Order: Decisive Historic Junctures,” aims to draw a comprehensive analytical map to help in understanding the historical transformations of the world order and, ultimately, the nature of contemporary global realities. The historical review presented in this chapter features an element that may make it unique; it tackles the historical evolution of the world order from the emergence of the Ottoman state in the East through the ages of the Spanish, Portuguese and other empires of the West. It is an effort to present a balanced, scholarly chronicle of the world order, without neglecting the influence of the East on international relations throughout history. Chapter IV, “The Economy, Trade and Energy in the New World Order,” focuses on the role of economic factors in deciding the structure of the new world order and the hierarchy of powers within it. It reveals that despite the spectacular rise of the Chinese economy during the past two decades, it is still about half that of the United States, and China still falls within the ranks of developing countries in terms of its average GDP per capita. While the US economy is characterized by flexibility and high reliance on innovation and internal forces for growth, China depends on foreign investment and employing low-cost labor in export-oriented industries. This could make China more vulnerable to adverse economic shocks in the future. The author also expects that developments in the energy sector will greatly affect the ranking of powers in the new world order. The United States of America will increasingly become self-dependent in terms of energy, utilizing its various innovations in the field of shale gas and oil extraction, and its gradual shift toward unconventional energy sources from the western hemisphere (the Americas), giving it a strong comparative advantage in the future. Chapter V, “Public Opinion Regarding the New World Order: A Sample Survey of UAE Citizens,” resents the findings of a public opinion survey in the UAE concerning the new world order. The survey focuses on nationality, age, gender and educational level as explanatory variables of differences in public opinion toward the new world order. In Chapter VI, “Prospective Structural Changes and their Consequences for the New World Order,” the author discusses the potential structural, strategic changes in the new world order in the coming five decades; stressing that unipolarity will have a variety of impacts on the world. The author anticipates that US influence in international financial institutions will increase, and that over the next decade Washington will reduce its dependence on oil from regions plagued by risk and instability – such as the Middle East – and that this will affect US policy in such regions. In Chapter VII, “The New World Order: Future Outlook,” the author confirms that the new world order will be characterized by a number of features that will be important determinants of the ranking of world powers in the future, including the growing importance of technologically advanced and nonconventional systems of production and communication to replace decaying conventional systems, and an increasing reliance on genetic engineering, cloning and nanotechnology in finding solutions to key issues such as achieving food and water security, narrowing down the energy resource gap, achieving breakthroughs in medicine and further developing human capabilities. Other features also include increasing pressure on the capitalist system to develop in order to sustain itself. In the Conclusion to the book, the author suggests that the Arab region is a central arena in the world and the focus of a variety of conflicts that are of direct relevance to the “prospects for the American age.” The author cites the Syrian crisis and the recent events in some Arab countries that have toppled long-standing political regimes dating back to periods prior to the development of the new world order, such as in Egypt, Libya, Yemen and Tunisia. The author believes that, in light of the obstacles to development faced by many Arab states, it is difficult to say that the near future will herald improvements in these countries’ circumstances, particularly in light of the worsening internal crises in major Arab countries like Egypt, Syria and Iraq, and the strategic expansion of regional non-Arab powers to fill the void left by the declining regional role of conventional Arab powers. This comes alongside increasing influence for Israel, which is now in the most advantageous strategic position since its creation due to the absence of any significant resistance from Arab countries, which are preoccupied with internal crises or threats emanating from neighboring states. The conclusion also claims that economics will not simply be a factor in the calculation of states’ roles and positions in the new world order, but rather the central engine of change for small and mid-sized powers in the new world order.

Jihad in Sub-Saharan Africa Jonathan Matusitz,

Machine Intelligence and Big Data Analytics for Cybersecurity Applications Yassine Maleh, Mohammad Shojafar, Mamoun Alazab, Youssef Baddi, 2020-12-14 This book presents the latest advances in machine intelligence and big data analytics to improve early warning of cyber-attacks, for cybersecurity intrusion detection and monitoring, and malware analysis. Cyber-attacks have posed real and wide-ranging threats for the information society. Detecting cyber-attacks becomes a challenge, not only because of the sophistication of attacks but also because of the large scale and complex nature of today’s IT infrastructures. It discusses novel trends and achievements in machine intelligence and their role in the development of secure systems and identifies open and future research issues related to the application of machine intelligence in the cybersecurity field. Bridging an important gap between machine intelligence, big data, and cybersecurity communities, it aspires to provide a relevant reference for students, researchers, engineers, and professionals working in this area or those interested in grasping its diverse facets and exploring the latest advances on machine intelligence and big data analytics for cybersecurity applications.

Bilal Cooks Daal Aisha Saeed, 2019-06-04 A Kirkus Reviews Best Picture Book of 2019 An Asian/Pacific American Award for Literature Honor Book 2019 Six-year-old Bilal introduces his friends to his favorite dish—daal!—in this charming picture book that showcases the value of patience, teamwork, community, and sharing. Six-year-old Bilal is excited to help his dad make his favorite food of all-time: daal! The slow-cooked lentil dish from South Asia requires lots of ingredients and a whole lot of waiting. Bilal wants to introduce his friends to daal. They’ve never tried it! As the day goes on, the daal continues to simmer, and more kids join Bilal and his family, waiting to try the tasty dish. And as time passes, Bilal begins to wonder: Will his friends like it as much as he does? This debut picture book by Aisha Saeed, with charming illustrations by Anoosha Syed, uses food as a means of bringing a community together to share in each other’s family traditions.

Sport Business Analytics C. Keith Harrison, Scott Bukstein, 2016-11-18 Developing and implementing a systematic analytics strategy can result in a sustainable competitive advantage within the sport business industry. This timely and relevant book provides practical strategies to collect data and then convert that data into meaningful, value-added information and actionable insights. Its primary objective is to help sport business organizations utilize data-driven decision-making to generate optimal revenue from such areas as ticket sales and corporate partnerships. To that end, the book includes in-depth case studies from such leading sports organizations as the Orlando Magic, Tampa Bay Buccaneers, Duke University, and the Aspire Group. The core purpose of sport business analytics is to convert raw data into information that enables sport business professionals to make strategic business decisions that result in improved company financial performance and a measurable and sustainable competitive advantage. Readers will learn about the role of big data and analytics in: Ticket pricing Season ticket member retention Fan engagement Sponsorship valuation Customer relationship management Digital marketing Market research Data visualization. This book examines changes in the ticketing marketplace and spotlights innovative ticketing strategies used in various sport organizations. It shows how to engage fans with social media and digital analytics, presents techniques to analyze engagement and marketing strategies, and explains how to utilize analytics to leverage fan engagement to enhance revenue for sport organizations. American Newspaper Journalists on Film Johnny D. Boggs, 2022-12-13 When talking pictures first appeared in cinema theaters in the late 1920s, films about newspaper journalists quickly became a Hollywood mainstay. These were a variety of responses from working reporters, editors, and photographers. The newspaper film was a popular genre in the 1950s, and famous films such as *All the President's Men* (1976) and *Spotlight* (2015) have depicted the power of the press. Journalists have also been portrayed in films that are not specifically about newspapers, appearing in noir films like *Woman on the Run* (1950), Westerns such as *Fort Worth* (1951), comedies like *The Ghost and Mr. Chicken* (1966), musicals like *Wake Up and Live* (1937) and historical epics like *Lawrence of Arabia* (1962). A film historian and former newspaper writer, the author investigates how accurately films have portrayed journalists across the decades. The book also details what journalists thought of the depictions at the time, contributing to brief histories and analyses for each film. Featured journalist archetypes include airy reporters, screaming editors, photographers, sportswriters and war journalists. Classics, misfires, Westerns, obscure treasures and films the press both adored and detested are all included in this comprehensive here.

The Effects of Dust and Heat on Photovoltaic Modules: Impacts and Solutions Amir Al-Ahmed, Inamuddin, Fahad A. Al-Sulaiman, Firoz Khan, 2021-11-01 This book discusses how to reduce the impact of dust and heat on photovoltaic systems. It presents the problems caused by both dust accumulation and heat on PV systems, as well as the solutions, in a collected piece of literature. The Effects of Dust and Heat on Photovoltaic Modules: Impacts and Solutions begins by discussing the properties of dust accumulation on PV modules. It then presents several solutions to this, such as hydrophobic coatings and surface texturing. The second half of the book is used to discuss the effects of heat on silicon PV modules, as well as various cooling approaches. These include water cooling and carbon-based materials. Due to the prevalence of PV systems in renewable energy, this book will be of interest to numerous students, researchers and practitioners.

Bringing Heart and Mind into Storytime Heather McNeil, 2022-04-01 Learn how to use children's books during storytime to approach sensitive topics and increase children's social-emotional wellness-and how to create storytimes that are engaging, participative, and FUN! The emotional challenges many children experience consume the time of teachers, exhaust parents, and sometimes lead children toward behaviors that prohibit social and academic success. Storytime to the rescue! Library storytimes prepare children for kindergarten; storytimes at home and in preschools allow teachers, parents, and children to think and talk about empathy and the importance of honoring your own and others' feelings. In *Bringing Heart and Mind into Storytime*, Heather McNeil teaches librarians and teachers how to use books to open conversations with children to teach such concepts as patience, tenacity, kindness, and teamwork. McNeil shares research on brain development, social-emotional learning, and the importance of play, but she also emphasizes maintaining the fun of storytime. She recommends songs, action rhymes, games, and crafts that contribute to fun and healthy storytimes. Extensive lists of recommended books will help readers find the right ones for their audience.

Sayyid Saeed Akhtar Rizvi - A Biography Sayyid Muhammad Rizvi, 2021-06-20 This is the biography of ‘The Shining Star’ (‘Akhtar-e-Tabaan’) which rose in Bihar (India), radiated across the Indian subcontinent, and illuminated the path of many Africans towards Shi’a Islam. Through his pen, he lit the lamp of Shi’ism across continents and oceans, from Indonesia, to Guyana, to Europe, and beyond. ‘Allamah Sayyid Saeed Akhtar Rizvi was confronted by many dark clouds: unfamiliar lands, languages, cultures, opposition, prejudice, politics, & more. However, his luminosity pierced through, overcoming all hurdles in his path of tabligh. Hopefully, reading his life’s story will re-energize your spirit to serve the cause of Islam, even when challenges come your way. This book hopes to demonstrate that if a person is equipped with true knowledge, a spirit of perseverance and sincerity, God will grant him tawfiq and success. ISBN 9780920675854. The Pakistan Cauldron James P. Farwell,2011-10-01 The killing of Osama bin Laden spotlighted Pakistan’s unpredictable political dynamics, which are often driven by conspiracy theory, paranoia, and a sense of betrayal. In Pakistan, the late prime minister Benazir Bhutto famously declared, there is “always the story behind the story.” In The Pakistan Cauldron, James P. Farwell explains what makes Pakistani politics tick. Farwell has advised the Department of Defense on terrorism, sovereignty, and the political issues in the Middle East, Africa, and Pakistan. Here he reveals how key Pakistani political players have inconsistently employed the principles of strategic communication to advance their agendas and undercut their enemies. Pakistan is an enigma to many. Only by understanding the complex forces that shape Pakistani leaders can we uncover their shifting political agendas and how they affect America and the West. Farwell explains how and why former president Pervez Musharraf clamped down on nuclear scientist A. Q. Kahn and isolated him. He assesses Benazir Bhutto’s unique legacy and analyzes how Musharraf handled the aftermath of her assassination. He explains Pakistan’s current instability and demonstrates how the country’s emotional reaction to bin Laden’s death is best understood as the outcome of long-standing political dynamics. The Pakistan Cauldron is for anyone who needs to know why Pakistan continues to pose increasingly difficult challenges for the United States and the West.

Widening International Entrepreneurship Research Maria Ripollés,Andreu Blesa,2020-02-21 Widening International Entrepreneurship Research addresses several unresolved questions and thus moves forward by acknowledging that future international entrepreneurship research needs to find new ways to further enrich its knowledge. The book presents the results of six studies that explain how human resource management contributes to the strategy of early internationalization, compares different experiences in several countries, assesses innovation in international entrepreneurship education teaching, analyses the effects of entrepreneurial education on entrepreneurial skills, and provides new knowledge about the effect of digitalization on firm performance in international markets. This collection of papers reviews the main factors that have been identified as having a high explanatory power at different levels.
