Intellectual Property Paul Goldstein,2007-11-08 The definitive guide to intellectual property for business managers How can a product of the mind—an innovation, a song, a logo, a business secret—become the subject of precise property rights? No idea is entirely original; every innovative business borrows, sometimes extensively, from its competitors and others. So how do we draw the line between fair and unfair use? Billions of dollars ride on that question, as do the fates of publishers, software producers, drug companies, advertising firms, and many others. It’s also a key question for individuals—for instance, if you quit your job after mastering the company’s secrets, what can you do with that information? With the growth of the internet and global markets, having a smart IP strategy is more essential than ever. Intellectual Property is the ideal book for non-lawyers who deal with patents, trade secrets, trademarks, and copyrights—all essential business issues that have changed rapidly in the last few years. Goldstein draws on dozens of fascinating case studies, from the Polaroid vs. Kodak battle to Kellogg’s surprising trademark suit against Exxon to whether a generic perfume is allowed to smell exactly like Chanel No. 5. Every business decision that involves IP is also a legal decision, and every legal decision is also a business decision. Lawyers and managers need to work together to navigate these murky waters, and this book shows how.

Creating a Learning Society Joseph E. Stiglitz,Bruce C. Greenwald,2015-10-06 “A superb new understanding of the dynamic economy as a learning society, one that goes well beyond the usual treatment of education, training, and R&D.”—Robert Kuttner, author of The Stakes: 2020 and the Survival of American Democracy Since its publication Creating a Learning Society has served as an effective tool for those who advocate government policies to advance science and technology. It shows persuasively how enormous increases in our standard of living have been the result of learning how to learn, and it explains how advanced and developing countries alike can model a new learning economy on this example. Creating a Learning Society: Reader’s Edition uses accessible language to focus on the work’s central message and policy prescriptions. As the book makes clear, creating a learning society requires good governmental policy in trade, industry, intellectual property, and other important areas. The text’s central thesis—that every policy affects learning—is critical for governments unaware of the innovative ways they can propel their economies forward. “Profound and dazzling. In their new book, Joseph E. Stiglitz and Bruce C. Greenwald study the human wish to learn and our ability to learn and so uncover the processes that relate the institutions we devise and the accompanying processes that drive the production, dissemination, and use of knowledge . . . This is social science at its best.”—Partha Dasgupta, University of Cambridge “An impressive tour de force, from the theory of the firm all the way to long-term development, guided by the focus on knowledge and learning . . . This is an ambitious book with far-reaching policy implications.”—Giovanni Dosi, director, Institute of Economics, Scuola Superiore Sant’Anna “[A] sweeping work of macroeconomic theory.”—Harvard Business Review

Winning Legally Constance E. Bagley,2005-11-10 The rash of corporate scandals in recent years underscores a fact too often ignored in the business world: flouting the law holds serious consequences. Indeed, all it takes is one rogue trader, one greedy executive, or one misinformed manager to place an entire organization at risk. But respected legal expert Constance E. Bagley argues that staying out of trouble is only part of the picture when it comes to legality in business. In Winning Legally, Bagley shows how managers can proactively harness the power of the law to maximize corporate value, marshal human and financial resources, and manage risk. Through scores of classic and contemporary examples across the business landscape, this no-nonsense guide completely re-frames the relationship of law to business. Bagley explains how managers can use the law as a strategic tool to help select and work effectively with legal advisers, spot legal issues before they become problems, weigh the legal risks of specific opportunities, and more. Ultimately, the responsibility for making tough business decisions lies with managers--not with lawyers. This timely book shows how managers can combine business audacity and vision with integrity and respect for the law to build truly great and enduring firms. Constance E. Bagley is an associate professor of business administration at Harvard Business School. She was formerly a partner of Bingham McCutchen LLP and co-author of The Entrepreneur's Guide to Business Law.

The Mind of the OutCompete Strategist Len Kaplan,2009-02-14 The sweetest moment of start-up life is the first big success. The very same moment is the most dangerous, too: start-up pops up on the competitive radar screens, and the competitive killing blow, such as pricing war or patent litigation, is swift and inevitable.First volume of OutCompete Innovation Series discusses the business strategies that help a start-up to prepare ahead of time to this killing blow and withstand it. These strategies were extracted from experiences of Casio, Microsoft and many other strategic successes and failures.

International Management Peter Stanwick,Sarah Stanwick,2020-01-31 International Management: A Stakeholder Approach applies a practical, engaging and real time approach to the evolving topics related to International Management. In thirteen chapters, the authors discuss the complexities managers must address when making decisions in a global marketplace, including the complexity of globalization; the external global environment; ethics and social responsibility; culture; communication; entry strategies; global strategies; management decision making; motivation; leadership and organizational change; and human resources.

Clothing Michele Saracino,2012 Reinhold Niebuhr argued that one of the fundamental challenges to human existence is the anxiety caused by our desire to be perfect and godlike while knowing we are limited and mortal. This book explores how human adornment practices negotiate anxieties about our finitude. Through our clothing, we often shield ourselves from feeling our human frailty and from having others detect our emotional, physical, and

spiritual vulnerabilities. Looking at the incarnation as a form of dress, Saracino claims that getting naked with Jesus or embracing our vulnerability is our only hope at creating life-giving relationships with God and others in the global world.

Suspicion Joseph Finder,2014-05-27 One bad choice gets a father caught up in a deadly situation in this electrifying thriller from New York Times bestselling author Joseph Finder. Single father Danny Goodman suddenly finds himself unable to afford the private school his daughter adores. Then Danny meets Thomas Galvin, the father of his daughter's new best friend and one of the wealthiest men in Boston. Out of the blue Galvin offers a loan to help Danny out. Desperate, he takes the money, promising to pay it back. But the moment the money is wired into his account, the DEA comes knocking. Danny’s impossible choice: an indictment for accepting drug money, or a treacherous assignment to help the government get close to his new best friend. As Danny begins to lie to everyone in his life, including those he loves most, he must decide once and for all who the real enemy is or risk losing everything—and everyone—that matters to him.

Innovators, Firms, and Markets Jonathan M. Barnett,2021-01-17 This book presents a theoretical, historical and empirical account of the relationship between intellectual property rights, organizational type and market structure. Patents expand transactional choice by enabling smaller R&D-intensive firms to compete against larger firms that wield difficult-to-replicate financing, production and distribution capacities. In particular, patents enable upstream firms that specialize in innovation to exchange informational assets with downstream firms that specialize in commercialization, lowering capital and technical requirements that might otherwise impede entry. These theoretical expectations track a novel organizational history of the U.S. patent system during 1890-2006. Periods of strong patent protection tend to support innovation ecosystems in which smaller innovators can monetize R&D through financing, licensing and other relationships with funding and commercialization partners. Periods of weak patent protection tend to support innovation ecosystems in which innovation and commercialization mostly take place within the end-to-end structures of large integrated firms. The proposed link between IP rights and organizational type tracks evidence on historical and contemporary patterns in IP lobbying and advocacy activities. In general, larger and more integrated firms (outside pharmaceuticals) tend to advocate for weaker patents, while smaller and less integrated firms (and venture capitalists who back those firms) tend to advocate for stronger patents. Contrary to conventional assumptions, the economics, history and politics of the U.S. patent system suggest that weak IP rights often shelter large incumbents from the entry threat posed by smaller R&D-specialist entities--
