Cannabis Use and Dependence Wayne Hall,Rosalie Liccardo Pacula,2003-11-28 The use of cannabis in the late twentieth and this century is an area of medical and moral controversy. Despite its illegality, cannabis is the most widely used drug after alcohol and tobacco among young adults in the USA, Europe and Australia. This book explores the relationship between health policy, public health and the law regarding cannabis use. It assesses the impact of illegality in drug use and relates this to policy analysis in Australia, the UK, the US and other developed societies. It evaluates debates about 'safe use' and 'harm minimisation' approaches, as well as examining the experiences of different

prevention, treatment and education policies. Written by two leading drug advisors Cannabis Use and Dependence makes a valuable addition to this important field of research.

Extending a dynamic programming language and runtime environment with access control Tessenow, Philipp, Felgentreff, Tim, Bracha, Gilad, Hirschfeld, Robert, 2016-11-09 Complexity in software systems is a major factor driving development and maintenance costs. To master this complexity, software is divided into modules that can be developed and tested separately. In order to support this separation of modules, each module should provide a clean and concise public interface. Therefore, the ability to selectively hide functionality using access control is an important feature in a programming language intended for complex software systems. Software systems are increasingly distributed, adding not only to their inherent complexity, but also presenting security challenges. The object-capability approach addresses these challenges by defining language properties providing only minimal capabilities to objects. One programming language that is based on the object-capability approach is Newspeak, a dynamic programming language designed for modularity and security. The Newspeak specification describes access control as one of Newspeak's properties, because it is a requirement for the object-capability approach. However, access control, as defined in the Newspeak specification, is currently not enforced in its implementation. This work introduces an access control implementation for Newspeak, enabling the security of object-capabilities and enhancing modularity. We describe our implementation of access control for Newspeak. We adapted the runtime environment, the reflective system, the compiler

toolchain, and the virtual machine. Finally, we describe a migration strategy for the existing Newspeak code base, so that our access control implementation can be integrated with minimal effort.

Theatre of Real People Ulrike Garde, Meg Mumford, 2016-05-19 Theatre of Real People offers fresh perspectives on the current fascination with putting people on stage who present aspects of their own lives and who are not usually trained actors. After providing a history of this mode of performance, and theoretical frameworks for its analysis, the book focuses on work developed by seminal practitioners at Berlin's Hebbel am Ufer (HAU) production house. It invites the reader to explore the HAU's innovative approach to Theatre of Real People, authenticity and cultural diversity during the period of Matthias Lilienthal's leadership (2003–12). Garde and Mumford also elucidate how Theatre of Real People can create and destabilise a sense of the authentic, and suggest how Authenticity-Effects can present new ways of perceiving diverse and unfamiliar people. Through a detailed analysis of key HAU productions such as Lilienthal's brainchild X-Apartments, Mobile Academy's Blackmarket, and Rimini Protokoll's 100% City, the book explores both the artistic agenda of an important European theatre institution, and a crucial aspect of contemporary theatre's social engagement.
