Blockheads! Adam Pautz, Daniel Stoljar, 2019-02-12 New essays on the philosophy of Ned Block, with substantive and wide-ranging responses by Block. Perhaps more than any other philosopher of mind, Ned Block synthesizes philosophical and scientific approaches to the mind; he is unique in moving back and forth across this divide, doing so with creativity and intensity. Over the course of his career, Block has made groundbreaking contributions to our understanding of intelligence, representation, and consciousness. **Blockheads!** (the title refers to Block's imaginary counterexample to the Turing test—and to the Block-enthusiast contributors) offers eighteen new essays on Block's work along with substantive and wide-ranging replies by Block. The essays and responses not only address Block's past contributions but are rich with new ideas and argument. They importantly clarify many key elements of Block's work, including his pessimism concerning such thought experiments as Commander Data and the Nation of China; his more general pessimism about intuitions and introspection in the philosophy of mind; the empirical case for an antifunctionalist, biological theory of phenomenal consciousness; the fading qualia problem for a biological theory; the link between phenomenal consciousness and representation (especially spatial representation); and the reducibility of phenomenal representation. Many of the contributors to **Blockheads!** are prominent philosophers themselves, including Tyler Burge, David Chalmers, Frank Jackson, and Hilary Putnam. Contributors Ned Block, Bill Brewer, Richard Brown, Tyler Burge, Marisa Carrasco, David Chalmers, Frank Jackson, Hakwan Lau, Geoffrey Lee, Janet Levin, Joseph Levine, William G. Lycan, Brian P. McLaughlin, Adam Pautz, Hilary Putnam, Sydney Shoemaker, Susanna Siegel, Nicholas Silins, Daniel Stoljar, Michael Tye, Sebastian Watzl

School Leadership - Heads on the Block? Pat Thomson, 2009-05-07 Most teachers become heads for idealistic reasons, wanting to make a difference to the lives of children and young people. Yet serving heads suggest the job is getting harder, talking openly about stress and leaving the job. Many teachers now see headship as a risky business, and succession planning, while necessary, will not on its own be sufficient to attract the diverse range of applicants required to satisfactorily fill leadership positions. *School Leadership: Heads on the Block* addresses this shortage. It suggests there is no crisis in supply per se, but that schools in some locations find it difficult to attract the 'right people with the right stuff'. The book examines the expectations of heads, the hours they are expected to work and the nature of everyday demands. It proposes that 'sudden death' accountabilities act as a major disincentive to potential applicants, and outlines a series of policy measures to tackle the kinds of daily pressures heads now experience. Key features of the book: draws on a wide range of material, ranging from published research, interviews and media clippings

to popular films and children's novels makes extensive use of headteachers' words and stories based in the author's own experiences of headship, tackling issues that leadership books often ignore. The book will be of interest to headteachers, headteachers' professional associations, teachers and those who study teaching. It will be useful to policy makers, those responsible for the education of potential heads and for headteacher professional development.

Certitude Adam Begley, 2009-05-12 Sometimes all we have is the courage of our convictions. But not all convictions are created equal. In fact, some are downright delusional. And once a foolish notion sinks its teeth into the famous or the powerful, look out-the impact can have profound consequences for the rest of us. So it's nothing short of gratifying when our most bullheaded and self-righteous leading lights insist on getting their way only to be proven egregiously embarrassingly wrong. From politicians to pontiffs, movie stars to moguls, and artists to inventors, *Certitude* presents short biographical sketches of notoriously stubborn individuals who were certain they were right-with laughable, disturbing, and often disastrous results. Earning a place among the greatest historical and contemporary bullheads are: •Girolamo Savonarola, the Dominican friar who failed to place his own vanities on the bonfire. •Carry A. Nation, the saloon smasher who didn't have a temperate bone in her teetotaling body. •Arthur Conan Doyle, author of the Sherlock Holmes series, who lacked the deductive reasoning he bestowed on his own creation. •Joseph Stalin, the hard-line Soviet leader who had a soft spot after all. •Madonna, the queen of pop, who isn't just a material girl: She's embraced Kabbalah and the doctrine of reincarnation-in other words, she'll be back! Informative, irreverent, and brilliantly illustrated by the caricaturist Edward Sorel, *Certitude* is a

book for our time.
