Psychologie in de gezondheidszorg A.J.J.M. Vingerhoets,P.H.G.M. Soons,P.F.M. Kop,2002-10-16 De toepassingen van psychologische kennis en behandelingstechnieken nemen een steeds grotere plaats in binnen de gezondheidszorg. Niet alleen in de zorg en onderzoek van patiënten met psychische problemen en mensen met een geestelijke of lichamelijke handicap, maar ook in de zorg voor patiënten met primair lichamelijke problemen, zoals kanker, brandwonden en astma. De psycholoog is bij uitstek degene die de patiënt kan helpen om beter te leren omgaan met ziekte en beperkingen. Psychologie in de gezondheidszorg wil in de eerste plaats aan studenten en andere geïnteresseerden een beeld geven van de mogelijkheden die er zijn voor psychologen in de gezondheidszorg. Ten tweede om inzicht te geven in wat het werken als gedragskundige in verschillende settings in de gezondheidszorg inhoudt en welke kennis en kwaliteiten daarbij vereist zijn. Ten slotte wil Psychologie in de gezondheidszorg een verbinding leggen tussen theorie en praktijk. De auteurs zijn wetenschappers die bovendien werkzaam zijn in de gezondheidszorg. In veel gevallen zijn ze daarnaast betrokken bij postdoctorale opleidingen, als docent en/of als stagebegeleider. Het boek heeft daardoor een extra dimensie: dat van de scientist practitioner. Geschreven door mensen uit de praktijk blijft het niet bij een beschrijving van de handvaardigheden van de praktiserend psycholoog, maar wordt tevens een beeld gegeven van de toepassing van psychologische kennis op een manier die recht doet aan de wetenschappelijke discipline van de psychologie.

AI and Cognitive Science '92 Kevin Ryan,Richard F.E. Sutcliffe,2012-12-06 The annual Irish Conferences on Artificial Intelligence and Cognitive Science have become the major forum in Ireland for the discussion of various aspects of artificial intelligence. Their aim is to provide a forum where researchers can present their current work, and where industrial and commercial users can relate this work to their own practical needs and experiences. Although the emphasis of the conferences is on Irish research, there are also important contributions from Europe, Australia, Canada, and the USA. This volume is based on the proceedings of the Fifth Irish Conference on Artificial Intelligence and Cognitive Science (AICS'92), which was held at the University of Limerick, Ireland, from 10-11 September 1992. The conference was divided into 6 sessions, covering knowledge representation, cognitive foundations, natural language 1 and 2, learning and expert systems, and novel aspects of artificial intelligence and cognitive science. Because of the high number of papers submitted to the conference, a poster session was run in addition to the plenary sessions. Each paper presented at the poster session is represented in this volume by a four page abstract. Among the specific topics covered in this volume are: a model-based theory of conceptual combination; the nature and development of reasoning strategies; word recognition as a parsing problem; a knowledge-based autonomous vehicle system for emergency management support; the construction and use of scope neutral discourse entities; computer-based iconic communication; and exceptions in multiple inheritance systems. AI and Cognitive Science '92 provides a comprehensive record of current research into this important field. It will be of interest to researchers, lecturers and postgraduate students in a variety of disciplines related to artificial intelligence and cognitive science.
