Prostheses in Antiquity Jane Draycott,2018-09-03 Today, a prosthesis is an artificial device that replaces a missing body part, generally designed and assembled according to the individual's appearance and functional needs with a view to being both as unobtrusive and as useful as possible. In classical antiquity, however, this was not necessarily the case. The ancient literary and documentary evidence for prostheses and prosthesis use is contradictory, and the bioarchaeological and archaeological evidence is enigmatic, but discretion and utility were not necessarily priorities. So, when, howand why did individuals utilise them? This volume, the first to explore prostheses and prosthesis use in classical antiquity, seeks to answer these questions, and will be of interest to academics and students with specialistinterests in classical archaeology, ancient history and history, especially those engaged in studies of healing, medical and surgical practices, or impairment and disability in past societies.

The Diffused Story of the Footwashing in John 13 Yanrong Chen,2021-02-09 The first Catholic missionaries of the early modern period arrived in mainland China in 1582, but the first Catholic Bible did not appear until 1968, long after Protestant missionaries already had published several versions. The mystery behind the four-hundred-year gap is not a why question but instead involves many how questions--primarily, how did communication of the Bible take place in the Chinese context without a written text in the Chinese language? This book uncovers narrative forms of biblical stories and explores the ways they were delivered to Chinese audiences. Relying on textual evidence, it presents a diversified exploration of a specific biblical story from the Latin Vulgate Bible--the footwashing in John 13--and its translation into various Chinese texts. In different religious milieus, the biblical narrative provided Chinese audiences a core source of faith, connected them with the most commonly accepted beliefs, and fostered their religiosity across communities in China from the sixteenth through the eighteenth centuries. The interdisciplinary approach adopted herein sheds new light on the history of the Bible in China and paves the way for further studies on the abundance of Chinese biblical stories and texts.

Prosthetics and Assistive Technology in Ancient Greece and Rome Jane Draycott, 2022-12-22 This is the first comprehensive study of prosthetics and assistive technology in classical antiquity, integrating literary, documentary, archaeological, and bioarchaeological evidence to provide as full a picture as possible of their importance for the lived experience of people with disabilities in classical antiquity. Embodiment via Body Parts Zouheir A. Maalej, Ning Yu, 2011-08-18 Research on the “embodiment hypothesis” within cognitive linguistics and beyond is growing steadily aiming to bridge language, culture, and cognition. This volume seeks to address the question regarding what specific roles individual body parts play in the embodied conceptualization of emotions, mental faculties, character traits, cultural values, and so on, in various cultures, as manifested in their respective languages. It brings together some linguistic evidence that sheds light on the embodied nature of human cognition from languages as diverse as Arabic, Chinese, Danish, English, Estonian, German, Greek, Indonesian, Japanese, Persian, Spanish, and Turkish. The studies in this volume also show how embodiment is mediated in those languages through such cognitive mechanisms as metonymy and metaphor.
