Carjacked: The Culture of the Automobile and Its Effect on Our Lives Catherine Lutz,Anne Lutz Fernandez,2010-01-05 Carjacked is an in-depth look at our obsession with cars. While the automobile's contribution to global warming and the effects of volatile gas prices are widely known, the problems we face every day because of our cars are much more widespread and yet much less known -- from the surprising \$14,000 per year that the average family pays each year for the vehicles it owns, to the increase in rates of obesity and asthma to which cars contribute, to the 40,000 deaths and 2.5 million crash injuries each and every year. Carjacked details the complex impact of the automobile on modern society and shows us how to develop a healthier, cheaper, and greener relationship with cars.

Transforming Politics, Transforming America Taeku Lee,Subramanian Karthick Ramakrishnan,Ricardo Ramírez,2006 Over the past four decades, the foreign-born population in the United States has nearly tripled, from about 10 million in 1965 to more than 30 million today. This wave of new Americans comes in disproportionately large numbers from Latin America and Asia, a pattern that is likely to continue in this century. In Transforming Politics, Transforming America, editors Taeku Lee, S. Karthick Ramakrishnan, and Ricardo Ramírez bring together the newest work of prominent scholars in the field of immigrant political incorporation to provide the first comprehensive look at the political behavior of immigrants. Focusing on the period from 1965 to the year 2020, this volume tackles the fundamental yet relatively neglected questions, What is the meaning of citizenship, and what is its political relevance? How are immigrants changing our notions of racial and ethnic categorization? How is immigration transforming our understanding of mobilization, participation, and political assimilation? With an emphasis on research that brings innovative theory, quantitative methods, and systematic data to bear on such questions, this volume presents a provocative evidence-based examination of the consequences that these demographic changes might have for the contemporary politics of the United States as well as for the concerns, categories, and conceptual frameworks we use to study race

relations and ethnic politics. Can You Live Forever? Edward W. Reese Ph.D., 2023-03-06 Dr. Reese has long been fascinated with the human aging process and the possibilities of extending human life, and self-awareness beyond its end of life cycle. Therefore, the focus of his book, is based upon understanding the aging process, and possibilities of extending life, and maintaining self-awareness. Following are some highlights from his book: * Can Human Awareness Exist Forever? * The Continued Existence Of Your Life And Awareness. * What Is The Ultimate Question: With a Healthy Brain, Why Must My Self-Awareness Cease To Exist Because A Vital Body Organ Fails, Or Because I Have A Terminal Illness? * The Evolving Process to Extending Life. * To Learn Without Study Or Training. Life Expectancy: * How Science Will Extend Life Expectancy, Now, Near Future, and Distant Future. * How Close Can We Come To Immortality? With a greater understanding of the mechanism that causes, or contributes to the aging process, and the subsequent advancements in medicine, and related research discoveries, the prior boundaries of life expectancy will continue to extend dramatically. Dr. Reese believes it is a reasonable expectation that people could be capable of reaching the age of 125-150 years within 80-90 years. It is also Dr. Reese's opinion, that ultimately our continued existence (e.g., our self-awareness) will not be dependent upon the function of the human physical body, which in many respects presents a hindrance to our continued existence beyond our current estimated life span. There are far too many body components that we must depend upon to function effectively in order to maintain our lives, and our continued self-awareness. The vulnerability of critical organs, too many diseases, and human body failures, most often cause premature termination of life, and subsequently the demise of a healthy brain and awareness. Also discussed: * Free Anti-Aging And Life Extension Available To All. * Over Population - The End Of Humanity? * Religious And Spiritual Implications

Involving Longevity. * The Human Aging Process. How Do We Slow And Potentially Stop Aging? * Fighting The Aging Process. * How Can I Live Beyond My Normal Life Span? * Brain Transplant To Another Human Body. * Brain Transplant Into AI Humanoid Robot. * AI And Humanoid Robots. * The Future Controlled By AI Humanoid Robots. * Possible Extinction Of Humanity Due To AI Humanoid Robots. * Brain Awareness Transfer. * Implantable Brain Chips And Other Brain Implants. * Human Consciousness Uploading/Downloading To A Computer Or Artificial Brain. * Many Other Related Topics This book will directly, and unapologetically, address the issues of aging, and discuss methods to reduce, or slow the inevitable process, and avoid the most significant, and even hazardous consequences associated with the aging process. The brain and causes of short and long term memory problems are also discussed.

Security Market Imperfections in Worldwide Equity Markets Donald B. Keim, William T. Ziemba, 2000-03-13 The study of security market imperfections, namely the predictability of equity stock returns, is one of the fundamental research areas in financial modelling. These anomalies, which are not consistent with existing theories, concern the relation between stock returns and variables, such as firm size and earnings-to-price ratios, and seasonal effects, such as January and turn-of-the-month. This book provides the most complete and current account of work in the area. Leading academics and investment researchers have combined to produce a comprehensive coverage of the subject, including both cross-sectional and time series analyses, as well as discussing the measurement of risk and prediction models that have been used by institutional investors. The studies cover many worldwide markets including the US, Japan, Asia, and Europe. The book will be invaluable for courses in financial engineering, investment and portfolio management, and as a reference for investment professionals seeking an up-to-date source on return predictability.

Living Liberalism Elaine Hadley, 2010-05-15 In the mid-Victorian era, liberalism was a practical politics: it had a party, it informed legislation, and it had adherents who identified with and expressed it as opinion. It was also the first British political movement to depend more on people than property, and on opinion rather than interest. But how would these subjects of liberal politics actually live liberalism? To answer this question, Elaine Hadley focuses on the key concept of individuation—how it is embodied in politics and daily life and how it is expressed through opinion, discussion and sincerity. These are concerns that have been absent from commentary on the liberal subject. *Living Liberalism* argues that the properties of

liberalism—citizenship, the vote, the candidate, and reform, among others—were developed in response to a chaotic and antagonistic world. In exploring how political liberalism imagined its impact on Victorian society, Hadley reveals an entirely new and unexpected prehistory of our modern liberal politics. A major revisionist account that alters our sense of the trajectory of liberalism, *Living Liberalism* revises our understanding of the presumption of the liberal subject.

The Moral Laboratory Frank Hakemulder, 2000-06-15 The idea that reading literature changes the reader seems as old as literature itself. Through the ages philosophers, writers, and literary scholars have suggested it affects norms, empathic ability, self-concept, beliefs, etc. This book examines what we actually know about these effects. And it finds strong evidence for the old claims. However, it remains unclear what aspects of the reading experience are responsible for these effects. Applying methods of the social sciences to this particular problem of literary theory, this book presents a psychological explanation based upon the conception of literature as a moral laboratory. A series of experiments examines whether imagining oneself in the shoes of characters affects beliefs about what it must be like to be someone else, and whether it affects beliefs about consequences of behavior. The results have implications for the role literature could play in society, for instance, in an alternative for traditional moral education.

Poverty in the United States Ann O'Leary, Paula M. Frew, 2016-12-19 This important text explores the deep relationships between poverty, health/mental health conditions, and widespread social problems as they affect the lives of low-income women. A robust source of both empirical findings and first-person descriptions by poor women of their living conditions, it exposes cyclical patterns of structural and environmental stressors contributing to impaired physical and mental health. Psychological conditions (notably depression and PTSD), substance use and abuse, domestic and gun-related violence, relationship instability, and hunger in low-income communities, especially among women of color, are discussed in detail. In terms of solutions, the book's contributors identify areas for major policy reform and make potent recommendations for community outreach, wide-scale intervention, and sustained advocacy. Among the topics covered: • The intersection of women's health and poverty. • Poverty, personal experiences of violence, and mental health. • The role of social support for women living in poverty. • The logic of exchange sex among women living in poverty. • Physical safety and neighborhood issues. • Exploring the complex intersections between housing environments and health behaviors among women living in poverty. A stark reminder that health should be considered a basic human right, *Poverty in the United States: Women's Voices* is a necessary

reference for research professionals particularly interested in women's studies, HIV/AIDS prevention, poverty, and social policy.

Routledge Revivals: Charles Booth's London (1969) Albert Fried,Richard M. Elman,2017-02-17 First published in 1969, this book presents a one-volume anthology of Charles Booth's Life and Labour of the People in London, the classic early study of the poor in the urban environment. The original text consists of a vast compendium of descriptions of families, homes, streets, conditions of work, cultural and religious practices, much of it illustrated with charts, maps and statistics -- giving the public an idea of the dimensions and meaning of poverty. The editors have selected the extracts in this book for their vividness, readability and intrinsic interest, and their introduction conveys the context of 1880s London -- relating Booth's investigations to contemporary concerns.

Protocols for Collecting and Using Traffic Data in Bridge Design Bala Sivakumar, Michel Ghosn, Fred Moses, 2011 TRB's National Cooperative Highway Research Program (NCHRP) Report 683: Protocols for Collecting and Using Traffic Data in Bridge Design explores a set of protocols and methodologies for using available recent truck traffic data to develop and calibrate vehicular loads for superstructure design, fatigue design, deck design, and design for overload permits. The protocols are geared to address the collection, processing, and use of national weigh-in-motion (WIM) data. The report also gives practical examples of implementing these protocols with recent national WIM data drawn from states/sites around the country with different traffic exposures, load spectra, and truck configurations. The material in this report will be of immediate interest to bridge engineers. This report replaces NCHRP Web-Only Document 135: Protocols for Collecting and Using Traffic Data in Bridge Design. Appendices A through F for NCHRP Report 683 are available only online.

The Philosophical Imagination Richard Moran, 2017-06-06 The Philosophical Imagination brings together several of Richard Moran's essays, ranging over a remarkable variety of topics in philosophy of mind and action, aesthetics, and moral psychology. A theme connecting several of the essays is the different ways our capacity for imagination is drawn on in our responsiveness to art, to literature, to the lives of other persons, and in the practice of philosophy itself. Topics explored here include our emotional responses to mimetic works of art, the nature of metaphor as a vehicle of thought and in the work of rhetoric, and the understanding of the concept of beauty, as that is developed in contrasting ways in the work of Immanuel Kant and Marcel Proust. Several of the essays respond to the work of recent and contemporary philosophers such as Bernard Williams, Stanley Cavell, Harry Frankfurt, and Iris Murdoch, in the context of such themes as the philosophical problem of 'other minds', love and practical reason, the legacy of Sartrean existentialism, and the role of history in the disciplinary self-understanding of philosophy. The final group of essays focuses on questions about self-knowledge and the importance of the first-person perspective, developing ideas from Moran's influential book *Authority and Estrangement* (Princeton 2001). Topics discussed here include the nature of a person's 'practical knowledge' of her own action, the concept of the mental and the differences

between self-understanding and the understanding of others, and the ambiguous role of narrative as a form of self-understanding. Throughout there is an attempt to draw out the connections between topics that are often discussed in isolation from each other, and to pursue them in the context of the recognizable human situations and questions which ground them. The essays are written in a vivid, humane, and accessible style which should attract a broad readership, both inside and outside the academic discipline of philosophy.

Radio Live! Television Live! Robert L. Mott, 2003-12-11 During the golden age of live radio and television, writers, performers, and producers created their programs in an environment far different from the studios of today. With live programming, anything could happen, and often did. Robert L. Mott, a veteran writer and Emmy-nominated sound effects creator of the live era, recreates the days when television and radio programs were performed live. He includes personal reminiscences as well as a forthright look behind the microphones: horses' hooves were played by coconuts, African-American women were played by white males, and television actors might ad lib an entire program that didn't go as planned. Celebrities like Red Skelton and Jackie Gleason, as well as the unsung heroes in the sound booth and backstage, step up to the mike here. Behind-the-scenes photographs are also included in this account of the exciting--but not always glamorous--world that was live on the air.

The Purpose Effect Dan Pontefract, 2016-05-10 Pontefract combines years of experience and research on employee engagement to create a work about the three crucial areas of purpose: individual, workplace role, and organizational. When one area is lacking, this three-legged barstool starts to wobble, and the results range from disengagement to bankruptcy. A business leader that is committed to purpose will create purpose for his/her employees. An employee that feels his/her sense of purpose on the job will be an invaluable asset to productivity and success. An organization centered on purpose will benefit every stakeholder, from employees to society in general. This “sweet spot” of purpose creates a reciprocal relationship between all three areas, and sits at the center of Pontefract’s work.
