Virtual Environments '98 Martin Göbel, Jürgen Landauer, Ulrich Lang, Matthias Wapler, 2011-12-12 Ten years after Virtual Environment research started with NASA's VIEW project, these techniques are now exploited in industry to speed up product development cycles, to ensure higher product quality, and to encourage early training on and for new products. Especially the automotive industry, but also the oil and gas industry are driving the use of these techniques in their works. The papers in this volume reflect all the different tracks of the workshop: reviewed technical papers as research contributions, summaries on panels of VE applications in the automotive, the medical, the telecommunication and the geoscience field, a panel discussing VEs as the future workspace, invited papers from experts reporting from VEs for entertainment industry, for media arts, for supercomputing and productivity enhancement. Television Scales Nick Salvato, 2019 How to reckon with the staggering volume of television materials, past and present? And how to comprehend all the potential, complex scales at which to grapple with television, from its tiniest units of audiovisual content to its most massive industrial coordinates and beyond? In *TELEVISION SCALES*, Nick Salvato demonstrates how the problem of scale in the field of television may be turned into a resource and a method for a television studies that would pay better attention to messy medial complexities, peripatetic critical practices, and vulgar psychogeographies. Modeling his investigative practice on the meta-critical writing of social anthropologist Marilyn Strathern in *Partial Connections* and elsewhere, Salvato composes surprising, partial constellations of television's elements. In the process, his consideration ranges from classic television sitcoms like *I Love Lucy* to contemporary reality series such as *The Biggest Loser*, *Iron Chef*, and *House Hunters International*. He simultaneously pores over a number of key television phenomena, including technological mystification, performers' charismatic displays, binge viewing, and devoted fandom. An experiment in style and form, *TELEVISION SCALES* maps, weighs, and rules television, while also undoing these very strategies for evaluating the medium. ABOUT THE AUTHOR NICK SALVATO is Professor and Chair of Performing and Media Arts at Cornell University. He is the author of *Uncloseting Drama: American Modernism and Queer Performance* (Yale, 2010), *Knots Landing* (Wayne State, 2015), and *Obstruction* (Duke, 2016). His essays have appeared in numerous venues, including *Camera Obscura*, *Critical Inquiry*, and *Discourse*.

The Labyrinth Index Charles Stross, 2018-10-30 “A bizarre yet effective yoking of the spy and horror genres.” —The Washington Post Book World The Lovecraftian Singularity has descended upon the world in *The Labyrinth Index*, beginning an exciting new story arc in Charles Stross' Hugo Award-winning Laundry Files series! Since she was promoted to the head of the Lords Select Committee on Sanguinary Affairs, every workday for Mhari Murphy has been a nightmare. It doesn't help that her boss, the new Prime Minister of Britain, is a manipulative and deceptive pain in the butt. But what else can she expect when working under the thumb of none other than the elder god N'yar Lat-Hotep a.k.a the Creeping Chaos? Mhari's most recent assignment takes her and a ragtag team of former Laundry agents across the pond into the depths of North America. The United States president has gone missing. Not that Americans are alarmed. For some mysterious reason, most of the country has forgotten the executive branch even exists. Perhaps it has to do with the Nazgûl currently occupying the government and attempting to summon Cthulhu. It's now up to Mhari and her team to race against the Nazgûl's vampire-manned dragnet to find and, for his own protection, kidnap the president. Who knew an egomaniacal, malevolent deity would have a soft spot for international relations? Undercover Reporting Brooke Kroeger, 2012-08-31 In her provocative book, Brooke Kroeger argues for a reconsideration of the place of oft-maligned journalistic practices. While it may seem paradoxical, much of the valuable journalism in the past century and a half has emerged from undercover investigations that employed subterfuge or deception to expose wrong. Kroeger asserts that undercover work is not a separate world, but rather it embodies a central discipline of good reporting—the ability to extract significant information or to create indelible, real-time descriptions of hard-to-penetrate institutions or social situations that deserve the public's attention. Together with a companion website that gathers some of the best investigative work of the past century, *Undercover Reporting* serves as a rallying call for an endangered aspect of the journalistic endeavor.
