Gothic Fred Botting, 2013-10-15 This enduringly popular book has become a classic in the expanding and increasingly popular field of Gothic Studies. This long awaited new edition contains a new chapter on 'Contemporary Gothic', an expanded section on American Gothic and more discussion of the gothic in women's film and writing throughout the book. It is also updated in relation to media and technology with further discussion of stage sensations and photography as well as engaging with all major texts and criticism since initial publication in 1995. With the added benefit of series features such as a glossary and annotated further reading section, this remains the ideal guide to the Gothic.

Streaking! Gary Botting, 2016-01-20 Half a century ago, Canadian poet Gary Botting pioneered the use of shaped poetry to achieve visual effects often experienced by the reader as vertigo. Most of his published poems pushed the accepted boundaries of poetic and linguistic structure and thematic acceptability. Now his experimental poems are regarded as avant-garde. In *Streaking! The Collected Poems of Gary Botting*, the poet explores themes of unabashed sensuality in a variety of forms, from haikus, sonnets, odes, and ballads to his full-length poetic drama, *Prometheus Rebound*. His acerbic wit finds voice in poetic sequences such as *Monomster in Hell*, where he satirizes his own naiveté as a teenaged missionary in Hong Kong. "His sense of humor – rare in Canadian poets – giggles across the page," says one critic.

**River Bottom Rum** James Botting, 2012-05-22 For his first foray into fiction after his FBI memoir *James Botting* jumps into what he knows best, a collection of gritty police procedural short stories based on thirty years as an FBI agent and police officer. Not for those with a

weak stomach or a strong sense of morality, his blunt copspeak, unforgiving descriptions of the players, black humor and surprise endings will keep the reader turning the pages looking for justice that sometimes fails to show up. A senior citizen with a diabolical homicide plan for her husband, ex-cons bumbling an armored truck robbery, kidnapping at an interstate rest stop, a homicide suspect who beats the cops at their own game, a fly fishing excursion turned into a nightmare of revelation and tragedy, a bus ride from hell, a pair of rogue cops who turn a street robbery from bad to worse and then to much worse, a high riding CEO living (and dying) with a secret, a mind numbing letter that sucks the life out of you literally, and the slow motion death of a marriage. The anchor story follows a band of homeless outcasts—drunks, dopers and dealers, hookers, thieves, child molesters, schizos, and a human IED—living beneath the grid in the river bottom desperately trying to survive. These wounded and broken souls, who live each day on the edge of danger and death, are as amazing as rats and cockroaches in their adaptability and resiliency. It's hard not to take sides and hope one or the other will make it. Botting, who seems to have a penchant for losers, uncovers a world of human conflict, violence and tragedy that most of us, thankfully, will never experience. You may feel a little voyeuristic and uncomfortable but it's impossible to look away from the human train wrecks found in these stories.

**Animals and Medicine** Jack Botting, 2015-05-04 **Animals and Medicine: The Contribution of Animal Experiments to the Control of Disease** offers a detailed, scholarly historical review of the critical role animal experiments have played in advancing medical knowledge. Laboratory animals have been essential to this progress, and the knowledge gained has saved countless lives—both human and animal. Unfortunately, those opposed to using animals in research have often employed doctored evidence to suggest that the practice has impeded medical progress. This volume presents the articles Jack Botting wrote for the *Research Defence Society News* from 1991 to 1996, papers which provided scientists with the information needed to rebut such claims. Collected, they can now reach a wider readership interested in understanding the part of animal experiments in the history of medicine—from the discovery of key vaccines to the advancement of research on a range of diseases, among them hypertension, kidney failure and cancer. This book is essential reading for anyone curious about the role of animal experimentation in the history of science from the nineteenth century to the present.

The Gothic Fred Botting, 2001 These essays reexamine the literary, historical and cultural significance of the Gothic. Examples range from Horace Walpole to Angela Carter and the modern television programme, *The X-Files*, as well as new and more familiar texts.

**Streaking! the Collected Poems of Gary Botting** Gary

Botting, 2013-05 All of Gary Botting's published poems have been brought together for the first time in this wonderful volume. Half a century ago the author pioneered the use of shaped poetry to achieve visual effects and the sensation of vertigo. Most of his published poems push the boundaries of accepted poetic and linguistic structure and thematic acceptability, and in this sense are experimental, including those from his most recent collection *Isabeau: Poems of Lust and Love* (2013). *Streaking! The Collected Poems of Gary Botting* also features thought-provoking haikus, sonnets, odes and ballads, and includes his full-fledged poetic drama, *Prometheus Rebound*. The poet explores themes of unabashed sexuality, as well as more innocent themes of nature. His sense of humour - rare in Canadian poets - giggles across the page, says one critic. Born in England, Gary Botting is the author of more than 30 books. As a teenager, he won top honours at the U.S. National Science Fair and travelled around the world with his exhibit on the hybridization of giant silk moths. He began writing at age 18 as a journalist for the *South China Morning Post* in Hong Kong. Returning to Canada, he became a playwright, following in the footsteps of his mentor, Robertson Davies. He holds nine degrees, including two Ph.D.s (in English literature and law) and an MFA in playwriting. Formerly a professor of English and creative writing at several Canadian universities, and more recently a postdoctoral fellow at the University of Washington School of Law in Seattle, he currently practices extradition law in Vancouver, British Columbia. **Sex, Machines and Navels** Fred Botting, 1999 This work offers a critical re-reading of fictions of humanity, history, technology and

postmodern culture. Taking psychoanalysis into cyberspace, the book develops a theoretical perspective on the relationship between bodies and machines.

**Artificial Life After Frankenstein** Eileen Hunt Botting, 2020-12-18

*Artificial Life After Frankenstein* brings the insights born of Mary Shelley's legacy to bear upon the ethics and politics of making artificial life and intelligence in the twenty-first century. What are the obligations of humanity to the artificial creatures we make? And what are the corresponding rights of those creatures, whether they are learning machines or genetically modified organisms? In seeking ways to respond to these questions, so vital for our age of genetic engineering and artificial intelligence, we would do well to turn to the capacious mind and imaginative genius of Mary Wollstonecraft Shelley (1797-1851). Shelley's novels *Frankenstein*; or, *The Modern Prometheus* (1818) and *The Last Man* (1826) precipitated a modern political strain of science fiction concerned with the ethical dilemmas that arise when we make artificial life—and make life artificial—through science, technology, and other forms of cultural change. In *Artificial Life After Frankenstein*, Eileen Hunt Botting puts Shelley and several classics of modern political science fiction into dialogue with contemporary political science and philosophy, in order to challenge some of the apocalyptic fears at the fore of twenty-first-century political thought on AI and genetic engineering. Focusing on the prevailing myths that artificial forms of life will end the world, destroy nature, and extinguish love, Botting shows how Shelley modeled ways to break down and transform the meanings of apocalypse, nature, and love in the face of widespread and deep-seated fear about the power of technology and artifice to undermine the possibility of humanity, community, and life itself. Through their

explorations of these themes, Mary Shelley and authors of modern political science fiction from H. G. Wells to Nnedi Okorafor have paved the way for a techno-political philosophy of living with the artifice of humanity in all of its complexity. In *Artificial Life After Frankenstein*, Botting brings the insights born of Shelley's legacy to bear upon the ethics and politics of making artificial life and intelligence in the twenty-first century.

Crazy Gran Gary Botting,2015-12-10 Amy's Uncle Al and her mother Ariel both seem to have insider knowledge that something terrible is going to happen in Manhattan on September 11, 2001. Thousands heeded Ariel's warning in *The Chrislamic Messenger* to

flee New York City. But how did they know? The military believes Amy's father is somehow behind 9/11, even though he is supposedly dead and buried. As a weapons technologist, he was custodian of two Mark 53 nuclear bombs that were jettisoned by a failing B-52 over Champlain Lake at the same time he went missing in 1978. Now, years later, he seems to have come back from the dead. Only Amy can stop her uncle from executing her father's plan to detonate one of the massive bombs inside a uranium mine in the Adirondacks, causing a cataclysmic chain reaction that would create a sixth Great Lake and precipitate evacuation of the Eastern seaboard. Uncle Al is intent on stopping Amy from alerting authorities, by supplying her Chrislamic mother with evidence that although Amy swears she is a virgin, she and her cousin Ron have been indulging in "fornication." According to Sharia law and Deuteronomy 13, Amy must be stoned to death. As Uncle Al prepares to detonate the dirtiest bomb in history, Ron attempts to stop Amy's stoning before New York State blows sky high.

Sad Water Teri Holbrook, 2009-10-07 Nadianna Jesup, a pregnant young photographer from rural Georgia, is visiting Mayley, a village in Yorkshire, England, on an arts grant when she discovers a burned corpse floating in a river. No one, including historian Gale Grayson, Nadianna's companion on the trip, believes her, except for a local religious group that thinks she has witnessed a vision from God. Strange events surrounding the old mill that Nadianna and Gale are documenting bring to light tensions among some of the colorful inhabitants of the town, including Chalice Hibbert, a six-foot-seven mute; her employer, potter Olivia Markham; and Gerald Thornsby, a thief-turned-preacher who opposes Olivia's efforts to turn the

abandoned mill into an artist's mall. In this, her latest mystery featuring Gale Grayson, Holbrook (The Grass Widow) intersperses her contemporary tale with excerpts from the tragic diary of a Luddite named Michael Dodd. This psychological mystery, although hampered at times by clichés about Americans abroad, succeeds in evoking the bleakness of the depressed mill town and in portraying the family bonds that drive the characters to acts of desperation.
