**Fast Facts: Hypertension** Graham A. MacGregor, Michael Stowasser, 2016-02-15

Hypertension is the biggest cause of death and disability in the world, yet it remains underdiagnosed, undertreated and, in many cases, poorly controlled. As in the previous edition, 'Fast Facts: Hypertension' advises on: • accurate measurement of blood pressure and problems such as 'white-coat' hypertension • routine assessments for people with high blood pressure • other modifiable risk factors (smoking, high cholesterol levels etc.) • non-pharmacological measures (reducing salt, losing weight, increasing physical activity etc.) • rational and effective use of all drug treatments • identification of people with secondary hypertension • treatment of children, pregnant women, the elderly and patients with diabetes. Updates in this new edition include: • distinguishing between patients with primary (low renin) and secondary aldosteronism • greater use of home BP measurement in clinical decision-making • the latest thinking on BP treatment thresholds • new guidance on fourth-line therapy for resistant hypertension. Sometimes dubbed 'the silent killer', hypertension rarely produces symptoms until it manifests as a heart attack or stroke, so early identification of the condition and appropriate management are vital. This practical readable refresher for every-day use supports better investigation and treatment of high blood pressure by primary care providers and better self-management by patients. Contents: • The dangers of raised blood pressure • Causes • Investigation • When to treat • How to treat • Special patient groups • Uncontrolled hypertension • Useful resources

**Systolic Blood Pressure** Robert A. Arfi, 2011

*Hypertension* Graham A. MacGregor, Norman M. Kaplan, 2009 Hypertension is a highly treatable risk factor for cardiovascular disease, yet it remains underdiagnosed, undertreated and, in many cases, poorly controlled. Sometimes dubbed 'the silent killer', hypertension rarely produces symptoms until it manifests as a heart attack or stroke. Early identification of the condition by routine blood pressure measurement and appropriate ongoing management are therefore vital. In this updated fourth edition of Fast Facts: Hypertension, two authors of international renown provide a practical evidence-based approach to the diagnosis and management of the condition. The book provides a thorough overview of hypertension, covering:- Accurate measurement of blood pressure and problems such as 'white-coat' hypertension- Routine assessments for people with high blood pressure- Consideration of other modifiable risk factors - smoking, high cholesterol levels, etc.- Non-pharmacological measures that doctors can advise on - reduce salt, lose weight, increase physical activity, etc.- Up-to-date trial results on all the pharmacological options- Special considerations for the treatment of children, pregnant women, the elderly and patients with diabetes. Primary care physicians have a leading role to play in screening for hypertension and ensuring that patients receive the most appropriate treatment. Fast Facts: Hypertension provides a concise readable refresher on this common and potentially devastating condition.

**Home Blood Pressure Monitoring** George S. Stergiou,Gianfranco Parati,Giuseppe Mancia,2019-10-31 Hypertension remains a leading cause of disability and death worldwide. Self-monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and management of hypertension. Unfortunately, in clinical practice, home blood pressure monitoring is often inadequately implemented, mostly due to the use of inaccurate devices and inappropriate methodologies. Thus, the potential of the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted. This volume presents the available evidence on home blood pressure monitoring, discusses its strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Written by distinguished international experts, it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension.

 comes from herodotus who  
 in the 5th century bce noted  
 them as making up the rock  
 that forms the great

pyramid of giza these are  
 today recognized as  
 representatives of the genus  
 nummulites strabo in the
