Trauma Informatics Kimball I. Maull,Jeffrey S. Augenstein,2012-12-06 Information and the technology to rapidly transmit, analyze, document, and disperse this information are increasing arithmetically, if not logarithmically. Arguably, no discipline better exemplifies this trend than medicine. It can be further argued that care of the trauma patient is one of the better examples of informatics and the potential benefit to the health professionals who care for these patients. Maull and Augenstein have provided us with a primer on informatics and its use in trauma care. The subject matter is timely and covers the gamut of trauma care from prehospital to rehabilitation. Who will benefit from trauma informatics? A simple answer would be anyone who takes care of trauma patients. From a broader perspective, however, at least three examples illustrate how trauma informatics can be used today to exert a positive effect on patient outcome. The first example is care of combat casualties, including battlefield resuscitation, evacuation, acute care, and ultimate return to the continental United States. Current technology is such that via global positioning satellite, a corpsman could transmit to a remote area the vital signs and pertinent physical findings of a combat casualty. Furthermore, the location of the corpsman and the casualty would be precisely known, and consultation and destination disposition would be possible. The injured person, when admitted to a combat support hospital, could be continuously monitored and additional remote consultation obtained.

Term Limits 4 Liberty Stan W. Hatfield MBA,2023-12-04 Planet Xeon is located in the distant corner of the Alpha Centauri Star System, nearly six light-years away, and is comparable to planet Earth. Technology on Xeon is far beyond Earth's abilities, creating futuristic advancements, either unknown or out of reach from our reality. Xeon geoscientists have determined the planet core is unstable and may be uninhabitable in three hundred years unless it self-stabilizes, a rational probability. Superiors start a search for a habitable planet in order to save their people from becoming extinct, and they've selected planet Earth, specifically, the United States of America. Identifying what is necessary to send to planet Earth is of great concern due to the advanced technology that can produce weapons with godly powers, powers that can destroy the planet. Once Xeon technology is introduced, our lives will change dramatically and make the United States a dominating country with powers that are unimaginable, creating a force that the world will envy and fight to attain. The superiors of Xeon are concerned about sharing military technology to an unstable or corrupt government. They plan to be selective when transporting certain types of technology until such time the United States government can prove to be trustworthy, responsible with alien weapons, and have total control of other countries on the planet, preventing them from acquiring these powers. Titus and Xavia resign from their position at NASA to help the Xeon people rid the United States from corruption before announcing them to the world. In the process, they become good friends with Xeon citizens. The concerns about Xeon citizens migrating to the United States stem from the widespread corruption in the government. The Xeon government go through a comparable situation, ending in a civil war, where many people die. Term limits is discovered to be the key ingredient to a stable government that works for the people and by the people. Lifetime politicians cultivate corruption. Adventure, space flight, romance, friendship, family, and chocolate cake.

Most people shy away from blood, but for an assassin like me— Gin Blanco, aka the Spider—it's just part of the job. Still, it would be nice to get a night off, especially when I'm

No sooner did I get my champagne than a bunch of the unluckiest thieves ever burst into the museum and started looting the place. Unlucky why? Because I brought along a couple of knives in addition to my killer dress. Add these to my Ice and Stone magic, and nothing makes me happier than showing the bad guys why red really is my color.

But when an old friend of Bria's is threatened by a powerful vampire with deadly elemental magic, it looks like I'll have to dig my silverstone knives out of my suitcase after all.
