African Data Privacy Laws Alex B. Makulilo,2016-11-30 This volume presents analyses of data protection systems and of 26 jurisdictions with data protection legislation in Africa, as well as additional selected countries without comprehensive data protection laws. In addition, it covers all sub-regional and regional data privacy policies in Africa. Apart from analysing data protection law, the book focuses on the socio-economic contexts, political settings and legal culture in which such laws developed and operate. It bases its analyses on the African legal culture and comparative international data privacy law. In Africa protection of personal data, the central preoccupation of data privacy laws, is on the policy agenda. The recently adopted African Union Cyber Security and Data Protection Convention 2014, which is the first and currently the only single treaty across the globe to address data protection outside Europe, serves as an illustration of such interest. In addition, there are data protection frameworks at sub-regional levels for West Africa, East Africa and Southern Africa. Similarly, laws on protection of personal data are increasingly being adopted at national plane. Yet despite these data privacy law reforms there is very little literature about data privacy law in Africa and its recent developments. This book fills that gap.

Privacy and the Information Age Serge Gutwirth,2002 In a time in which new technologies make it easy to gather and process data, the discussion on privacy tends to focus exclusively on the protecting of personal data. To Serge Gutwirth, privacy involves far more. He advances the intriguing thesis that privacy is in fact the safeguard of personal freedom--the safeguard of the individual's freedom to decide who she or he is, what she or he does, and who knows about it. Any restriction on privacy thus means an infringement of personal freedom. And it's exactly this freedom that plays an essential role in every democracy.

Reinventing Data Protection? Serge Gutwirth,Yves Poullet,Paul de Hert,Cécile de Terwangne,Sjaak Nouwt,2009-05-24 data. Furthermore, the European Union established clear basic principles for the collection, storage and use of personal data by governments, businesses and other organizations or individuals in Directive 95/46/EC and Directive 2002/58/EC on Privacy and Electronic communications. Nonetheless, the twenty-first century citizen – utilizing the full potential of what ICT-technology has to offer – seems to develop a digital persona that becomes increasingly part of his individual social identity. From this perspective, control over personal information is control over an aspect of the identity one projects in the world. The right to privacy is the freedom from unreasonable constraints on one's own identity. Transactiondata--bothtraf?candlocationdata--deserveourparticularattention. As we make phone calls, send e-mails or SMS messages, data trails are generated within public networks that we use for these communications. While traf?c data are necessary for the provision of communication services, they are also very sensitive data. They can give a complete picture of a person's contacts, habits, interests, act- ities and whereabouts. Location data, especially if very precise, can be used for the provision of services such as route guidance, location of stolen or missing property, tourist information, etc. In case of emergency, they can be helpful in dispatching assistance and rescue teams to the location of a person in distress. However, p- cessing location data in mobile communication networks also creates the possibility of permanent surveillance.

Data Privacy Law Lee Andrew Bygrave,2014-01 This is the first work to examine the fundamental aims and principles of data privacy law in an international context. Bygrave analyses relevant law from across the globe, paying particular attention to international instruments and using these as a foundation for examining national law.

Trademarks, Service Marks, Etc Virginia,1998

A Buddhist Theory of Privacy Soraj Hongladarom,2015-12-22 This book offers a new way to justify privacy based on a theory derived from Buddhist insights. It uses insights obtained from the Buddhist teachings on Non-Self to create an alternative theory of privacy. In doing so, the author first spells out the inherent differences between the Buddhist insights and the beliefs underlying conventional theories of privacy. While Buddhism views the self as existing conventionally through interactions with others, as well as through interrelations with other basic components, non-Buddhist ideas of self are understood as being grounded upon autonomous subjects, commonly understood to be entitled to rights and dignity. In light of this, the book offers ways in which these seemingly disparate concepts can be reconciled, while keeping in mind the need for protecting citizens' privacy in a modern information society. It also argues that the new way of conceptualizing privacy, as presented in this book, would go a long way in helping unravel the difficult concept of group privacy.
