Business Planning: A Guide to Business Start-Up David Butler,2007-06-07 A readable and structured guide for the increasing numbers of people each year who consider setting up a small business or becoming self-employed. 'Business Planning' outlines the options and risks involved in setting up a business. The importance of thorough planning is often overlooked and only becomes evident if the business fails. This is highlighted in a recent study by the SFEDI of 486 bankers and accountants where lack of planning was the most common reason cited as to why businesses fail. 'Business Planning' shows how to avoid this failure by focusing on the planning stage and building on this framework as the business develops. This is the only book based around the Small Firms Enterprise Development Initiative (SFEDI) for first time owner-managers. It contains all the underpinning factual information required to prepare and present a successful Business Plan for presentation to a bank manager, or an alternative potential source of finance, or for use in an NVQ portfolio. It is in line with the major syllabuses for Business Start-Up, and can be used as a course book for anyone completing a formal NVQ level 3 qualification in this area, with tips on NVQ structure and assessment.

How to Write a Business Plan - Step by Step guide Manuel Taylor,John Davidson,2015-02-17 Table of Contents Introduction Structure of the business plan Company and financing Company overview Strategic and market analysis Industry analysis Competition Pricing Marketing plan Financial projections How to Create a Profit and Loss Statement Executive Summary Conclusion The whole business plan Author Bio Introduction If you have bought this short book, you are probably thinking about starting your own business. We live in the 21st century and we have more business opportunities now than ever before. Today, it is possible to start a global online business and to manage companies that are thousands of miles away from home. The technology has made our lives much easier. The reason you are reading this book is probably not because you don't have the idea, but because you need to create a business plan and convince investors that what you plan to do is profitable. Before you continue reading this book, I want to tell you that there is nothing to be afraid of. Yes, writing a business plan is a bit difficult and complicated, as you need to pay attention to details, but yes, you can write it! In this short guide, we will go step by step through everything you need to know in order to write a business plan. Also, I am going to create a fictitious company and create a business plan for it. That way you can see how a complete business plan is written step by step. Before we start, you need to know that when you are writing the business plan, you should not only think as yourself, but as the owner, as well. Remember, the goal is not to convince you. The goal is to convince the investors. So you need to put yourself in the position of the investor and make sure that what you have written is done really, really well. The key to writing a good business plan is not only to have all the sections written such as Marketing plan, financial projection, and so on, but also to have answered all the questions that the investor might have for the project you're presenting. Always keep this in mind. I will remind you of this many times during this book as I am going to write the potential questions with italic font. This was a short introduction to what to expect in this book. Now, let's get started!
