📖 **The Routledge Encyclopedia of Film Theory** Edward Branigan, Warren Buckland, 2013-12-04 The Routledge Encyclopedia of Film Theory is an international reference work representing the essential ideas and concepts at the centre of film theory from the beginning of the twentieth century, to the beginning of the twenty-first. When first encountering film theory, students are often confronted with a dense, interlocking set of texts full of arcane terminology, inexact formulations, sliding definitions, and abstract generalities. The Routledge Encyclopedia of Film Theory challenges these first impressions by aiming to make film theory accessible and open to new readers. Edward Branigan and Warren Buckland have commissioned over 50 scholars from around the globe to address the difficult formulations and propositions in each theory by reducing these difficult formulations to straightforward propositions. The result is a highly accessible volume that clearly defines, and analyzes step by step, many of the fundamental concepts in film theory, ranging from familiar concepts such as ‘Apparatus’, ‘Gaze’, ‘Genre’, and ‘Identification’, to less well-known and understood, but equally important concepts, such as Alain Badiou’s ‘Inaesthetics’, Gilles Deleuze’s ‘Time-Image’, and Jean-Luc Nancy’s ‘Evidence’. The Routledge Encyclopedia of Film Theory is an ideal reference book for undergraduates of film studies, as well as graduate students new to the discipline.

📖 **Cinematic Virtual Reality** Kath Dooley, 2021-04-27 With reference to traditional film theory and frameworks drawn from fields such as screenwriting studies and anthropology, this book explores the challenges and opportunities for both practitioners and viewers offered by the 360-degree storytelling form. It focuses on cinematic virtual reality (CVR), a format that involves immersive, high quality, live action or computer-generated imagery (CGI) that can be viewed through head mounted display (HMD) goggles or via online platforms such as YouTube. This format has surged in popularity in recent years due to the release of affordable high quality omnidirectional (360-degree) cameras and consumer grade HMDs. The book interrogates four key concepts for this emerging medium: immersion, presence, embodiment and proximity through an analysis of innovative case studies and with reference to practitioner interviews. In doing so, it highlights the specificity of the format and provides a critical account of practitioner approaches to the concept development, writing and realisation of short narrative CVR works. The book concludes with an account of the author’s practice-led research into the form, providing a valuable example of creative practice in the field of immersive media.
