The Online Safety Playbook Arun Soni,2022-03-01 Children must learn several fundamental skills early in life to protect their safety. Before crossing the street, look both ways. Seatbelts must be worn at all times. Do not talk to strangers. Another item to add to the list is to be wary of hackers and cyber predators. Teachers and parents may teach students of all ages fundamental cybersecurity skills and encourage them to use digital hygiene daily. They can achieve it by including more online educational resources into their curricula and at the same time educating and updating themselves with cybersecurity skills. Children can be taught to automatically protect themselves against cyber threats, just as they do while crossing the street. Just ask yourself- Are we preparing our children for life in the digital age? Are we providing them with the required training and resources to deal with never-before-seen cyber threats? Is our educational system able to keep up with the rapid changes in our society, including technological advancements? The only problem with teaching Cybersecurity in schools and homes is that educators/parents may not be entirely updated on the subject. Or may not feel confident enough to teach it due to a lack of knowledge. That is why there is assistance for students of all age groups, educators and parents.

In Detail

Google Cardboard is a low-cost, entry-level media platform through which you can experience virtual reality and virtual 3D environments. Its applications are as broad and varied as mobile smartphone applications themselves. This book will educate you on the best practices and methodology needed to build effective, stable, and performant mobile VR applications. In this book, we begin by defining virtual reality (VR) and how Google Cardboard fits into the larger VR and Android ecosystem. We introduce the underlying scientific and technical principles behind VR, including geometry, optics, rendering, and mobile software architecture. We start with a simple example app that ensures your environment is properly set up to write,

build, and run the app. Then we develop a reusable VR graphics engine that you can build upon. And from then on, each chapter is a self-contained project where you will build an example from a different genre of application, including a 360 degree photo viewer, an educational simulation of our solar system, a 3D model viewer, and a music visualizer. Given the recent updates that were rolled out at Google I/O 2016, the authors of Cardboard VR Projects for Android have collated some technical notes to help you execute the projects in this book with Google VR Cardboard Java SDK 0.8, released in May 2016. Refer to the article at

<https://www.packtpub.com/sites/default/files/downloads/GoogleVRUpdateGuideforCardboard.pdf> which explains the updates to the source code of the projects. Style and approach This project based guide is written in a tutorial-style project format, where you will learn by doing. It is accompanied by in-depth explanations and discussions of various technologies, and provides best practices and techniques.

A History of Indian Advertising in Ten-and-a-half Chapters Ritu Singh, 2021-09-25 In the last hundred-odd years, advertising in India has given us life-altering stuff. It has attempted to make men Fair and Handsome. It has battled to make women 18 Again. And to both men and women it has given Tinder loving care. It has made us realize that we like pizza as much as the next Italian - as long as Domino's puts keema do pyaza on it and tempts us with 'Hungry kya?' It has made us re-evaluate our life choices and ask thought-provoking questions like 'Kitna deti hai?' of our cars and 'Kya aap Close-Up karte hain?' of our countrymen. In short, it has enriched our lives with quirky quips, unforgettable characters, inter-brand scuffles, clever insights, virtual lures and jaw-dropping

controversies. In A History of Indian Advertising in Ten-and-a-half Chapters previously published as Stark Raving Ad, you'll find the best of case studies and unbusiness-like stories from Indian advertising through the ages - the hits, the misses, the also-rans and the banned. An engrossing read, this book will inform as much as entertain all readers.
