How Not To Write an App Rodney D. Cambridge,2011-08-11 Rod Cambridge created an iPhone app called Top-Tens to see how easy it was to make some money as an app developer. In this book, Rod uses this experience to take the reader step by step through the things that should, and shouldn't, be done when creating an app for Apple's iPhone or its rivals including Google's Android and Microsoft's Windows Mobile devices. Learn: What things should you incorporate, and avoid, when designing your app's User Interface. How to employ innovative, and guerilla, marketing tactics to get sales moving. Develop a two-minute elevator pitch. You did realise that you need an an elevator pitch, didn't you? In addition, you'll learn much, much more. Read How NOT To Write an App to give your app an edge in a very crowded marketplace. NOTE: This 84 page book was originally sold as an eBook and has been converted into paperback form due to popular demand.

Mobile Electronic Commerce June Wei,2014-11-20 Mobile commerce transactions continue to soar, driven largely by the ever-increasing adoption and use of smartphones and tablets. The use of this technology gives consumers the flexibility to shop whenever and wherever they want. Mobile Electronic Commerce: Foundations, Development, and Applications addresses the role of industry, academia, scientists, engineers, professionals, and students in developing innovative new mobile commerce technologies and systems to further improve the consumer experience. It also discusses the impact of mobile commerce on society, economics, culture, organizations, government, industry, and our daily lives. This book brings together experts from multiple disciplines in industry and academia to stimulate new thinking in the development and application of mobile commerce technology. The book covers important mobile commerce topics, such as critical infrastructure management, mobile security issues, new applications and services, emerging development architectures, mobile business solutions, and future research opportunities. In addition to its multidisciplinary approach, the book also provides a cross-cultural approach intended to overcome cultural barriers and accelerate mobile commerce advancement in the global economy. Authors and researchers from around the world discuss a broad spectrum of methods, tools, and guidelines for designing mobile commerce systems and services in different cultures.

The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The Global Smartphone presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

Online@AsiaPacific Larissa Hjorth,Michael Arnold,2013-03-20 Media across the Asia-Pacific region are at once social, locative and mobile. Social in that these media facilitate public and interpersonal interaction, locative in that this social communication is geographically placed, and mobile in so much as the media is ever-present. The Asia-Pacific region has been pivotal in the production, shaping and consumption of personal new media technologies and through social and mobile media we can see emerging certain types of personal politics that are inflected by the local. The six case studies that inform this book—Seoul, Tokyo, Shanghai, Manila, Singapore and Melbourne—offer a range of economic, socio-cultural, and linguistic differences, enabling the authors to provide new insights into specific issues pertaining to mobile media in each city. These include social, mobile and locative media as a form of crisis management in post 3/11 Tokyo; generational shifts in Shanghai; political discussion and the shifting social fabric in Singapore; and the erosion of public and private, and work and leisure paradigms in Melbourne.

Through its striking case studies, this book sheds new light on how the region and its contested and multiple identities are evolving, and concludes by revealing the impact of mobile media on how place is shaped, as well as shaping, practices of mobility, intimacy and a sense of belonging. Employing comprehensive, cross-disciplinary frameworks from theoretical approaches such as media sociology, ethnography, cultural studies and media and communication studies, *Online@AsiaPacific* will be of huge interest to students and scholars of Asian culture and society, cybercultures, new media studies, communication studies and internet studies.

Integrating Information and Communication Technology Into Language Teaching and Learning (Penerbit USM) Tengku Sepora Tengku Mahadi, Thomas Chow Voon Foo, Julie Chuah Suan Choo, The role of ICT in education is becoming more and more important as the world moves rapidly into the age of digital media and information. Though worldwide research has shown that the integration of ICT into language teaching and learning may lead to improved student learning and better teaching methods, it is not possible without effective use of ICT in education. Thus, this book showcases current methodology and pedagogical research in combining language teaching and learning with current platforms of computer-mediated communications. The reflections and innovative educational approaches featured will be of benefit to scholars, educationists and pedagogical researchers with an interest in technological applications in education.

Mobile, Ubiquitous, and Pervasive Learning Alejandro Peña Ayala, 2015-12-12 This book is concerned with the mobile, ubiquitous, and pervasive learning arena. It presents a collection of works corresponding to four categories: reviews, studies, conceptual proposals, and approaches. As a result of the submission and revision processes eight manuscripts were accepted and organized into the aforementioned four parts as follows: ·Review: a couple of chapters offer a survey of related works. One concerns with the diversity of mobile, ubiquitous, and pervasive labor, where interested findings are unveiled based on correlations. Other focuses on adaptive and adaptable architectures that are suitable to implement ubiquitous learning sceneries, whose contribution represents a model of a domain specific architecture. ·Studies: two chapters explore issues related to the effect of question styles made through smartphones and tablets, and the disposition of teachers to exploit mobile devices at classroom. ·Conceptual: a pair of chapters offer a given proposal, the first to develop adaptive mobile learning systems by means of a framework based on contextual information; and the second with the purpose to share some guidelines of how to apply cloud computing in the development and operation of mobile. ·Approaches: two chapters apply a specific paradigm as part of a whole application and reveal the achieved impact. One of them uses augmented reality to encourage children to learn about trees as context-sensitive informal learning. The other, immerses children in playing a learning game to learn math by cooperating between members team and interacting through mobile devices. This volume will be a source of interest for researchers, practitioners, professors, and postgraduate students aimed at updating their knowledge and finding targets for future work in the mobile, ubiquitous, and pervasive learning field!

Essentials of Mobile Handset Design Abhi Naha, Peter Whale, 2012-08-30 Discover what is involved in designing the world's most popular and advanced consumer product to date - the phone in your pocket. With this essential guide you will learn how the dynamics of the market, and the pace of technology innovation, constantly create new opportunities which design teams utilize to develop new products that delight and surprise us. Explore core technology building blocks, such as chipsets and software components, and see how these components are built together through the design lifecycle to create unique handset designs. Learn key design principles to reduce design time and cost, and best practice guidelines to maximize opportunities to create a successful product. A range of real-world case studies are included to illustrate key insights. Finally, emerging trends in the handset industry are identified, and the global impact those trends could have on future devices is discussed.

Mobile Media Practices, Presence and Politics Kathleen M. Cumiskey, Larissa Hjorth, 2013-08-29 As an example of convergence, the mobile phone—especially in the form of smartphone—is now ushering in new promises of seamlessness between engagement with technology and everyday common experiences. This seamlessness is not only about how one transitions between the worlds of the device and the physical environment but it also captures the transition and convergences between devices as well (i.e. laptop to smartphone, smartphone to tablet). This volume argues, however, that these transitions are far from seamless. We see divisions between online and offline, virtual and actual, here and there, taking on different cartographies, emergent forms of seams. It is these seams that this volume acknowledges, challenges and explores—socially, culturally, technologically and historically—as we move to a deeper understanding of the role and impact of mobile communication's saturation throughout the world.

Mobile Messaging and Resourcefulness Caroline Tagg, Agnieszka Lyons, 2022-03-23 This book advocates a new post-digital linguistic ethnography approach to unpacking mobile communication and enabling a more informed understanding of individuals' communicative practices in cities today. Drawing on data from a group of ordinary working people, multilingual individuals from superdiverse cities across the United Kingdom, the volume brings observations from this data together to form a new concept of 'resourcefulness' as a means of explaining the emergent sense of agency individuals develop towards remediating existing forms of technology in their everyday lives. The book in turn establishes the notion of the 'networked individual' by way of demonstrating the ways in which communicative practices cross spaces and platforms. Further chapters detail examples to highlight resourcefulness at work in enabling more efficient business communication, routes to self-expression and the creation and development of social support systems, while a concluding chapter looks at both the limitations and possibilities of resourcefulness and directions for future research. This innovative volume will be of particular interest to students and researchers in applied linguistics, sociolinguistics, linguistic ethnography, and media and communication studies.

Roboethics Spyros G. Tzafestas, 2015-07-27 This volume explores the ethical questions that arise in the development, creation and use of robots that are capable of semiautonomous or autonomous decision making and human-like action. It examines how ethical and moral theories can and must be applied to address the complex and critical issues of the application of these intelligent robots in society. Coverage first presents fundamental concepts and provides a general overview of ethics, artificial intelligence and robotics. Next, the book studies all principal ethical applications of robots, namely medical, assistive, socialized and war roboethics. It looks at such issues as robotic surgery, children-robot and elderly-robot therapeutical/social interactions and the use of robots, especially autonomous lethal ones, in warfare. In addition, a chapter also considers Japanese roboethics as well as key intercultural and robot legislation issues. Overall, readers are provided

with a thorough investigation into the moral responsibility (if any) of autonomous robots when doing harm. This volume will serve as an ideal educational source in engineering and robotics courses as well as an introductory reference for researchers in the field.

Contemporary Digital Forensic Investigations of Cloud and Mobile Applications Kim-Kwang Raymond Choo, Ali Dehghantanha, 2016-10-12 Contemporary Digital Forensic Investigations of Cloud and Mobile Applications comprehensively discusses the implications of cloud (storage) services and mobile applications on digital forensic investigations. The book provides both digital forensic practitioners and researchers with an up-to-date and advanced knowledge of collecting and preserving electronic evidence from different types of cloud services, such as digital remnants of cloud applications accessed through mobile devices. This is the first book that covers the investigation of a wide range of cloud services. Dr. Kim-Kwang Raymond Choo and Dr. Ali Dehghantanha are leading researchers in cloud and mobile security and forensics, having organized research, led research, and been published widely in the field. Users will gain a deep overview of seminal research in the field while also identifying prospective future research topics and open challenges. Presents the most current, leading edge research on cloud and mobile application forensics, featuring a panel of top experts in the field Introduces the first book to provide an in-depth overview of the issues surrounding digital forensic investigations in cloud and associated mobile apps Covers key technical topics and provides readers with a complete understanding of the most current research findings Includes discussions on future research directions and challenges

Digital Mental Health Research: Understanding Participant Engagement and Need for User-centered Assessment and Interventional Digital Tools Abhishek Pratap, Patricia A. Arean, Benjamin Nelson, Brenna Renn, Abigail Ortiz, 2023-08-15 Mental health researchers are increasingly looking towards digital health tools to gather day-to-day lived experiences of people living with mental health conditions, by using apps and wearable devices complementing episodic clinical assessments. One of the key goals of collecting longitudinal real-world multimodal data (RWD) is to help build personalized computational models that may help explain the heterogeneity in clinical outcomes, mechanisms of action, and pathophysiology of mental health disorders across individuals.

Mobile Learning Maria Uther, 2019-03-25 Mobile learning has become one of the more influential aspects of the field of educational technology, given the ubiquity of modern mobile devices and proliferation of educational applications or ‘apps’. Within this volume, there are a range of studies and reviews which cover a breadth of current topics in the field, namely user motivations for using mobile learning, issues in evaluation, as well as domain-specific considerations (e.g., use within language learning or audio-based applications). Together, these studies represent the synthesis of a range of methods, approaches, and applications that highlight benefits and areas of future growth of mobile technologies and how they can be useful and most effective in education.

User Acceptance of Mobile Notifications Tilo Westermann, 2017-03-14 This book presents an alternative approach to studying smartphone-app user notifications. It starts with insights into user acceptance of mobile notifications in order to provide tools to support users in managing these. It extends previous research by investigating factors that influence users’ perception of notifications and proposes tools addressing the shortcomings of current systems. It presents a technical framework and testbed as an approach for evaluating the usage of mobile applications and notifications, and then discusses a series of studies based on this framework that investigate factors influencing users’ perceptions of mobile notifications. Lastly, a set of design guidelines for the usage of mobile notifications is derived that can be employed to support users in handling notifications on smartphones.

Mobile Learning Design Daniel Churchill, Jie Lu, Thomas K.F. Chiu, Bob Fox, 2015-12-21 This book focuses on mobile learning design from both theoretical and practical perspectives. It introduces and discusses how mobile learning can be effectively integrated into curricula, highlighting the design of four key components of learning-centric pedagogy: Resource, Activity, Support and Evaluation in the context of mobile learning. It also investigates the learning theories underpinning mobile learning design, and includes case studies in different contexts. It provides practical insights that allow teachers to change and transform teaching practices using mobile technology. Anyone involved in mobile-technology enhanced learning and teaching will find this book both informative and useful.
