Beginning Teaching, Beginning Learning is essential reading for student and newly qualified early years and primary teachers and practitioners, as well as those who educate and train them. This outstanding book should be a core text for beginning teachers working in the birth to 11 age range. It places Early Years and Primary education in the historical context and encourages new teachers to become reflective practitioners by adopting a questioning approach based on thoughtful comparative experiences. One aspect which makes this stand out from other similar texts is the focus it has on developing a deep understanding of the partnership between children's learning and the beginner teacher. Contributors, many of whom have been teachers themselves, include experts not only in their specific fields of interest but

also in teacher education more broadly so understand what is relevant for those on initial teacher education courses and those in the early stages of their teaching career. Jane Warwick, Primary PGCE Course Manager, University of Cambridge, UK Beginning Teaching, Beginning Learning should be a core text on all birth to 11 years ITT courses. The book neatly combines grounded cameos of actual teaching experience with real life questions and dovetails these with a thoroughly referenced scholarly critique. Through its engaging style and approach the book speaks clearly and directly to the inquisitive, curious and professional novice teacher who wishes to be both thoroughly reflective and knowledgeable of the latest research. This book is hugely successful as it manages to be both very wide in its content whilst encouraging a questioning and in-depth critical thinking throughout. Robots in Popular Culture Richard A. Hall,2021-07-12 Robots in Popular Culture: Androids and Cyborgs in the American Imagination seeks to provide one go-to reference for the study of the most popular and iconic robots in American popular culture. In the last 10 years, technology and artificial intelligence (AI) have become not only a daily but a minute-by-minute part of American life—more integrated into our lives than anyone would have believed even a generation before. Americans have long known the adorable and helpful R2-D2 and the terrible possibilities of Skynet and its army of Terminators. Throughout, we have seen machines as valuable allies and horrifying enemies. Today, Americans cling to their mobile phones with the same affection that Luke Skywalker felt for the squat R2-D2. Meanwhile, our phones, personal computers, and cars have attained the ability to know and learn everything about us. This volume opens with essays about robots in popular culture, followed by 100 A-Z entries on the most famous AIs in film, comics, and more. Sidebars highlight ancillary points of interest, such as authors, creators, and tropes that illuminate the motives of various robots. The volume closes with a glossary of key terms and a bibliography providing students with resources to continue their study of what robots tell us about ourselves.

Yodelling Boundary Riders: Country Music in Australia since the 1920s Toby

Martin, 2015-02-01 This landmark book tells the story of one of the most enduring forms of popular culture in Australia. Prior to the 1950s, country music was called hillbilly music. Hillbilly was the rock 'n' roll of its day. The latest craze, straight from America, it was young, exciting and glamorous. This book traces the journey hillbilly took to become country: the rural nationalistic form it is known as today. Yodelling Boundary Riders is the first book to contextualise country music into a broader story about Australian history. Not just concerned with the development of music itself, it is also a history of the ways in which Australians have responded to the rapid rate of change in the twentieth century and the global fascination with "authenticity". True to its subject matter, the writing is colourful and entertaining. Along the way Martin introduces some wonderful characters and events: yodelling stockmen, singing cowgirls, sentimental cowboys, coo-ees in Nashville, hobos on the mail train, the Sheik of Scrubby Creek and Australia's craziest hillbillies.
