Translation in Transition Arnt Lykke Jakobsen, Bartolomé Mesa-Lao, 2017-09-15 Translation practice and workflows have witnessed significant changes during the last decade. New market demands to handle digital content as well as technological advances are leading this transition. The development and integration of machine translation systems have given post-editing practices a reason to be in the context of professional translation services. Translators may still work from a source text, but more often than not they are presented with already translated text involving different degrees of translation automation. This scenario radically changes the cognitive demands of translation. Technological development has inevitably influenced the translation research agenda as well. It has provided new means of penetrating deeper into the cognitive processes that make translation possible and has endorsed new concepts and theories to understand the translation process. Computational analysis of eye movements and keystroke behaviour provides us with new insights into translational reading, processes of literality, effects of directionality, similarities between inter- and intralingual translation, as well as the effects of post-editing on cognitive processes and on the quality of the final outcome. All of these themes are explored in-depth in the articles in this volume which presents new and valuable insights to anyone interested in what is currently happening in empirical, process-oriented translation research.

Hands-On Artificial Intelligence on Amazon Web Services Subhashini Tripuraneni, Charles Song, 2019-10-04 Perform cloud-based machine learning and deep learning using Amazon Web Services such as SageMaker, Lex, Comprehend, Translate, and Polly Key Features Explore popular machine learning and deep learning services with their underlying algorithms Discover readily available artificial intelligence (AI) APIs on AWS like Vision and Language Services Design robust architectures to enable experimentation, extensibility, and maintainability of AI apps Book Description From data wrangling through to translating text, you can accomplish this and more with the artificial intelligence and machine learning services available on AWS. With this book, you'll work through hands-on exercises and learn to use these services to solve real-world problems. You'll even design, develop, monitor, and maintain machine and deep learning models on AWS. The book starts with an introduction to AI and its applications in different industries, along with an overview of AWS artificial intelligence and machine learning services. You'll then get to grips with detecting and translating text with Amazon Rekognition and Amazon Translate. The book will assist you in performing speech-to-text with Amazon Transcribe and Amazon Polly. Later, you'll discover the use of Amazon Comprehend for extracting information from text, and Amazon Lex for building voice chatbots. You will also understand the key capabilities of Amazon SageMaker such as wrangling big data, discovering topics in text collections, and classifying images. Finally, you'll cover sales forecasting with deep learning and

autoregression, before exploring the importance of a feedback loop in machine learning. By the end of this book, you will have the skills you need to implement AI in AWS through hands-on exercises that cover all aspects of the ML model life cycle. What you will learn Gain useful insights into different machine and deep learning models Build and deploy robust deep learning systems to production Train machine and deep learning models with diverse infrastructure specifications Scale AI apps without dealing with the complexity of managing the underlying infrastructure Monitor and Manage AI experiments efficiently Create AI apps using AWS pre-trained AI services Who this book is for This book is for data scientists, machine learning developers, deep learning researchers, and artificial intelligence enthusiasts who want to harness the power of AWS to implement powerful artificial intelligence solutions. A basic understanding of machine learning concepts is expected.
