Irresistible Adam Alter,2018-03-06 "Irresistible is a fascinating and much needed exploration of one of the most troubling phenomena of modern times." —Malcolm Gladwell, author of New York Times bestsellers David and Goliath and Outliers "One of the most mesmerizing and important books I've read in quite some time. Alter brilliantly illuminates the new obsessions that are controlling our lives and offers the tools we need to rescue our businesses, our families, and our sanity." —Adam Grant, New York Times bestselling author of Originals and Give and Take Welcome to the age of behavioral addiction—an age in which half of the American population is addicted to at least one behavior. We obsess over our emails, Instagram likes, and Facebook feeds; we binge on TV episodes and YouTube videos; we work longer hours each year; and we spend an average of three hours each day using our smartphones. Half of us would rather suffer a broken bone than a broken phone, and Millennial kids spend so much time in front of screens that they struggle to interact with real, live humans. In this revolutionary book, Adam Alter, a professor of psychology and marketing at NYU, tracks the rise of behavioral addiction, and explains why so many of today's products are irresistible. Though these miraculous products melt the miles that separate people across the globe, their extraordinary and sometimes damaging magnetism is no accident. The companies that design these products tweak them over time until they become almost impossible to resist. By reverse engineering behavioral addiction, Alter explains how we can harness addictive products for the good—to improve how we communicate with each other, spend and save our money, and set boundaries between work and play—and how we can mitigate their most damaging effects on our well-being, and the health and happiness of our children. Adam Alter's previous book, Drunk Tank Pink: And Other Unexpected Forces that Shape How We Think, Feel, and Behave is available in paperback from Penguin.

While Bob continues on his journey to stardom, a journalist who is tirelessly working to break his anonymity is never far behind so he thinks. Now only time will tell if he can maintain the secrecy behind his posts. **Average Joe** Shawn Livermore,2020-09-29 The book covers numerous tech entrepreneurial founders and software developers, and the exciting brands or products that they created. It goes deep on a handful of them, narrowly divulging exactly how a few software developers and startup founders created breakthrough tech products like Gmail, Dropbox, Ring, Snapchat, Bitcoin, Groupon, and more. It highlights and unpacks the general hero-worship that the media and our own minds practice about tech founders and tech entrepreneurs. This idealization of tech success can create a paradox, preventing average tech professionals from their own successful journeys. This book provides hard evidence that anyone in tech can create, and anyone on the peripheral of tech can break through to the center where innovation, creativity, and opportunity meet. The anecdotes, stories, evidence, facts, arguments, logic, principles, and techniques provided in this book have helped individuals and businesses engage in slow creation cycles, improve the morale of their development teams, and increased their delivery potential of their technology solutions overall. Average Joe covers: Genius - The systematic deconstruction and debunking of the commonly held assumptions in the tech industry around supreme intelligence, and how that intelligence has been worshipped and sought after, despite the facts. Slow Creation - How to force-manufacture creative ideation. How conscious and subconscious cycles of patterns, details, and secrets can lead to breakthrough innovations, and how those P.D.S. cycles, and systematic mental grappling, can be conjured and repeated on a regular basis. Little-C Creativity - The conscious and miniature moments of epiphany that leak into our active P.D.S. cycles of Slow Creation. Flow - Why it's great, but also - why it's completely unreliable and unnecessary. How to perpetually innovate without relying on a flow state. Team Installation - How teams and companies can engage their employees in Slow Creation to unlock dormant ideas, stir up creative endeavors, and jumpstart fragile ideas into working products. User Manipulation - How tech products are super-charged with tricks, secret techniques, and neural transmitters like Dopamine, Oxytocin, and Cortisol; how those products leverage cognitive mechanisms and psychological techniques to force user adoption and user behaviors. Contrarianism - How oppositional and backward-thinking leaders create brand-new categories and the products which dominate those categories. Showmanship - How tech players have presented their ideas to the world, conjured up magic, manufactured mystique, and presented compelling stories that have captured their audiences. Sustainable Mystique Triad – A simple model for capturing audiences consistently without relying on hype and hustle.

**Free-to-Play** Christopher A. Paul,2020-10-13 An examination of free-to-play and mobile games that traces what is valued and what is marginalized in discussions of games. Free-to-play and mobile video games are an important and growing part of the video game industry, and yet they are often disparaged by journalists, designers, and players and pronounced inferior to games with more traditional payment models. In this book, Christopher Paul shows that underlying the criticism is a bias against these games that stems more from who is making and playing them than how they are monetized. Free-to-play and mobile games appeal to a different kind of player, many of whom are women and many of whom prefer different genres of games than multi-level action-oriented killing fests. It's not a coincidence that some of the few free-to-play games that have been praised by games journalists are League of Legends and World of Tanks.
