The Arts Castle Cat Jan Brinkerhoff,2004-06-01 Based on a concept by Eleanor ByerlyWritten by Jan BrinkerhoffIllustrated by Louise J. Herndon

The Castle of the Cats ,2004 A father sets his three sons three tasks to determine which one should inherit the family farm: to bring back the most beautiful wedding kerchief, wedding dress, and bride. The youngest brother, Ivan, would prefer to play with his leather ball, but he is encouraged to at least try. Each time, the family horse takes him to a magnificent palace populated entirely by elegantly attired cats. The felines are enamored of the gifts he presents-first the leather ball, then some catnip leaves, and finally a wooden ring that he offers to their queen. Ivan always receives a present in return, including the queen herself in human form as a bride, enabling him to trump his brothers and win the farm. Ivan prefers an alternative happily ever after, however, and returns instead to the castle with his feline bride and becomes a cat. A note explains that although the tale is Latvian, the author and illustrator have moved the setting to the Ukraine, as evidenced both by the flavor of the language and specifics in the artwork. Kimmel has a true storyteller's voice and keeps the action moving at an energetic pace without sacrificing images or details.

THE RAINBOW CAT - The Magical Adventures of a Very Special Cat Rose Amy Fyleman,2020-03-08 The Rainbow Cat is not in the least like any cat you have ever seen. You see, it is a fairy cat, so it rather had to be different. It’s outward appearance is simply magical, if not somewhat unusual. You see it had a violet nose, indigo eyes, pale blue ears, green front legs, a yellow body, orange back legs and a red tail. In fact, it was coloured with all the colours of the rainbow, and so was known as the Rainbow Cat. Of course, it had to live in Fairyland (well where else would you find a Rainbow Cat?) and it had all sorts of really strange adventures. In this book I am going to tell you some of them, and I think you will agree that it really had a very exciting and breathtaking time. What were these adventures you ask? Well, you will have to download this book and find out for yourself! ----- Rose Amy Fyleman (1877-1957) was an English writer and poet, noted for her works on the fairy folk, for children. =====

Cat Wars Peter P. Marra,Chris Santella,2016-09-20 Why our cats are a danger to species diversity and human health In 1894, a lighthouse keeper named David Lyall arrived on Stephens Island off New Zealand with a cat named Tibbles. In just over a year, the Stephens Island Wren, a rare bird endemic to the island, was rendered extinct. Mounting scientific evidence confirms what many conservationists have suspected for some time—that in the United States alone, free-ranging cats are killing birds and other animals by the billions. Equally alarming are the little-known but potentially devastating public health consequences of rabies and parasitic Toxoplasma passing from cats to humans at rising rates. Cat Wars tells the story of the threats free-ranging cats pose to biodiversity and public health throughout the world, and sheds new light on the controversies surrounding the management of the explosion of these cat populations. This compelling book traces the historical and cultural ties between humans and cats from early domestication to the current boom in pet ownership, along the way accessibly explaining the science of extinction, population modeling, and feline diseases. It charts the developments that have led to our present impasse—from Stan Temple's breakthrough studies on cat predation in Wisconsin to cat-eradication programs underway in Australia today. It describes how a small but vocal minority of cat advocates has campaigned successfully for no action in much the same way that special interest groups have stymied attempts to curtail smoking and climate change. Cat Wars paints a revealing picture of a complex global problem—and proposes solutions that foresee a time when wildlife and humans are no longer vulnerable to the impacts of free-ranging cats.
