**Focus On Adobe Photoshop** Corey Hilz,2012-09-10 Are you into photography not photomanipulation? Frustrated that you are spending too much time in front of the screen and not enough behind the lens? Bewildered by the multitude of advanced editing options available to you in Adobe Photoshop? If any of the above is true then, whatever your Photoshop/photography level, you will benefit hugely from this terrific little book. Unlike most of the photoshop guides available today, this no-nonsense, inspiring guide is aimed solely at photographers: those whose aim is to use the software to bring out the natural best in their photographs, rather than those who want to change them completely. Breath-taking photographer Corey Hilz wastes no time on the plethora of feature in Photoshop which, though impressive, are of no use to the 'natural' photographer. Corey instead takes you through a highly effective, professional workflow for bringing out the best in your photographs in Photoshop, from post-capture through to output, without spending hours in front of the screen. Ignoring high-end photomanipulation, he instead focusses on the vital aspects for photographers such as: correcting exposure, tone adjustments (including correct use of the tone curve), sharpening, monochrome conversion and lens correction. Additionally, Corey covers the workflow on either side: effective importing and tagging, and perfect output with minimal effort. Everything about this beautiful little book is aimed at a visual audience. Packed with stunning photographs to illustrate every tweak the author makes, this highly affordable and succinct reference guide focusses on the specific needs of the photographer and nothing else. There are hundreds of excellent comprehensive reference guides to photoshop out there, this is not one of those. It is, instead, a book that won't waste a second of your valuable shooting time. Buy into the Behind the Lens series and get right back where you belong and deserve to be: behind a lens.

Modernisation of e-Judiciary in India DR. K.V. SREENIVASAN, In modern computer era we have computerised everything including the medical profession but why we have not updated our Indian judiciary system alone so far into digital model? Even after the Supreme Court of India had set up a special committee and the committee had given its recommendations during the year 2005 itself and the government also spent during 2011-2015 Rs 640 crs for phase I and Rs 1078 crs for computerisation for creating infra for implementation of e-courting system out of total financial outlay of Rs 1630 crs, allocated money for this. But why it had not been fully implemented is the million dollar questions raised by the public?. Whether it is because of self-interest of the Judiciary or the advocates or court administration?, in spite of more than 3.20 crores are pending before all Indian Courts for decades together? Failure of our part to digitalisation of the court cases records and procedure so far the judicial industry is very much affected due to this corona lockdown period. It is a major setback for judiciary since the "justice delayed means justice denied" How long our judiciary will keep silent for not opening the courts due to corona like virus effect., God only knows the fact. Among the four pillars of our Constitution except Judiciary all the three viz., Government, Administration and Press are being working for 24X7, but judiciary is closed its office. In order to overcome this situation I bought up this book "E- Courting and Modernisation of e-judiciary in India "which includes the e- filing procedure before SC & HCs and District courts and SC guidelines regarding the implementation of the e- courting system etc for the benefit of Legal fraternity to switch over immediately in to digital courting and to reduce the pending cases and provide quick justice to our needy poor in time and render them quick justice. Jai Hind.
