Australia and China Perspectives on Urban Regeneration and Rural Revitalization Raffaele Pernice,Bing Chen,2024-04-30 This edited volume reviews important contemporary issues through relevant case studies and research in China and Australia, such as the challenges posed by climate change, the development of eco-urban design, research on sustainable habitats and the relationship between ecology, green architecture and city regeneration, as well as, in general, the future of the city in the new millennium. The authors represent a broad selection of international experts, young scholars and established academics who discuss themes related to urban–rural destruction and economic and spatial regeneration techniques, the sustainable reconversion of natural landscapes and eco-urban design in the context of the current evolution of architectural and urbanism practice. The book aims to explain the conditions in which the contemporary debate about urban regeneration and rural revitalisation has developed in Australia and China, presented by different theoretical and methodological perspectives. It also provides a multifaceted and critical analysis of relevant case studies and urban experiences in Australia and China, focusing on environmental disruption, resized urban interventions and the need for more efficient and sustainable forms of regeneration and urban renewal practice in urban–rural contexts. This book will be an invaluable resource for architects, planners, architectural and urban historians, geographers, and scholars interested in modern Australian and Chinese architecture and urbanism.
