Clocking In Rudy Nydegger,2018-04-02 Covering important topics such as job satisfaction, workplace stress, and the changing nature of jobs and careers in the 21st century, this valuable resource explores how working affects us psychologically, for better and for worse and sometimes in imperceptible ways. Although most people go to work Monday through Friday, few stop to think about the central role work plays in our lives. Besides allowing us to provide for the material needs of ourselves and our families, having a job or career can help us to meet new people and stay socially connected, to increase our self-esteem and sense of self-worth, and to allow us to have an impact on the world. But work can also leave us exhausted and stressed, and many people find it difficult to balance their work and personal lives. This clear and accessibly written book in Greenwood's Psychology of Everyday Life series provides readers with an understanding of the important roles work plays in our lives, the many forms work may take, and the ways in which our relationships with work change throughout our lives. The information, presented in an unassuming, easy-to-understand manner, is drawn from classical theory as well as from contemporary research, affording readers a well-rounded understanding of the topic. The book also includes a collection of real-world scenarios to illustrate key concepts as well as scholarly essays offering perspective on current issues and debates related to work in America.

Clocking Out Karen Pinkus,2020-03-17 An original reflection on Italy's postwar boom considers potentials for resistance in today's neoliberal (dis)order What can 1960s Italian cinema teach us about how to live and work today? Clocking Out challenges readers to think about labor, cinema, and machines as they are intertwined in complex ways in Italian cinema of the early '60s. Drawing on critical theory and archival research, this book asks what kinds of fractures we might exploit for living otherwise, for resisting traditional narratives, and for anticapitalism. Italy in the 1960s was a place where the mass-producing factory was the primary mode of understanding what it meant to work, but it was also a time when things might have gone another way. This thinking and living differently appears in the cracks, lapses, or moments of film. Clocking Out is organized into scenes from an obscure 1962 Italian comedy (Renzo e Luciana, from Boccaccio 70). Reconsidering the origins of paradigms such as clocking in and out, "society is a factory," and the gendered division of labor, Karen Pinkus challenges readers to think through cinema, enabling us to see gaps and breakdowns in the postwar order. She focuses on the Olivetti typewriter company and a little-known film from an Italian anthology movie, thinking with cinema about the power of the Autonomia movement, the refusal to work, and the questions of wages, paternalism, and sexual difference. Alternating microscopic attention to details and zooming outward, Pinkus examines rituals of production, automation, repetition, and fractures in a narrative of labor that begins in the 1960s and extends to the present—the age of the precariat, right-wing resentment, and nostalgia for an order that was probably never was.

On the Clock Emily Guendelsberger, 2019-07-16 Nickel and Dimed for the Amazon age, (Salon) the bitingly funny, eye-opening story of finding work in the automated and time-starved world of hourly low-wage labor After the local newspaper where she worked as a reporter closed, Emily Guendelsberger took a pre-Christmas job at an Amazon fulfillment center outside Louisville, Kentucky. There, the vending machines were stocked with painkillers, and the staff turnover was dizzying. In the new year, she travelled to North Carolina to work at a call center, a place where even bathroom breaks were timed to the second. And finally, Guendelsberger was hired at a San Francisco McDonald's, narrowly escaping revenge-seeking customers who pelted her with condiments. Across three jobs, and in three different parts of the country, Guendelsberger directly took part in the revolution changing the U.S. workplace. Offering an upclose portrait of America's actual essential workers, On the Clock examines the broken social safety net as well as an economy that has purposely had all the slack drained out and converted to profit. Until robots pack boxes, resolve billing issues, and make fast food, human beings supervised by AI will continue to get the job done. Guendelsberger shows us how workers went from being the most expensive element of production to the cheapest - and how low wage jobs have been remade to serve the ideals of efficiency, at the cost of humanity. On the Clock explores the lengths that half of Americans will go to in order to make a living, offering not only a better understanding of the modern workplace, but also surprising solutions to make work more humane for millions of Americans.

Shaping the Day Paul Glennie, Nigel Thrift, 2009-02-12 Timekeeping is an essential activity in the modern world, and we take it for granted that our lives are shaped by the hours of the day. Yet what seems so ordinary today is actually the extraordinary outcome of centuries of technical innovation and circulation of ideas about time. Shaping the Day is a pathbreaking study of the practice of timekeeping in England and Wales between 1300 and 1800. Drawing on many unique historical sources, ranging from personal diaries to housekeeping manuals, Paul Glennie and Nigel Thrift illustrate how a particular kind of common sense about time came into being, and how it developed during this period. Many remarkable figures make their appearance, ranging from the well-known, such as Edmund Halley, Samuel Pepys, and John Harrison, who solved the problem of longitude, to less familiar characters, including sailors, gamblers, and burglars. Overturning many common perceptions of the past-for example, that clock time and the industrial revolution were intimately related-this unique historical study will engage all readers interested in how 'telling the time' has come to dominate our way of life.
