Despite the advantages offered by fintech, opponents warn of potential negative consequences. The application of fintech in sustainability is a double-edged sword requiring further investigation. This book provides an overview of fintech applications and considers their impact on the future of sustainable finance. It explores how financial technologies can enhance the sustainability of investment and corporate decisions and contribute to the fulfillment of the Sustainable Development Goals (SDGs). By considering practitioner and academic views, it examines whether and how fintech can improve sustainable practices, potential threats with possible solutions, and policies and regulations designed to improve sustainability benefits.

**Digital Development in Korea** Myung Oh,James F. Larson,2011-03-14 This book explores the role of digital information and communications technology in South Korea's development, starting with and building upon the crucial developments of the 1980s. Its perspective draws on the information society concept and on a conceptual model of strategic restructuring of telecommunications. It also draws on firsthand experience in formulating and implementing policies. The analysis identifies aspects of the Korean experience from which developing countries around the world might benefit. Oh and Larson describe the revolutionary developments of the 1980s including the TDX electronic switching system, a major surge forward in semiconductors, the start of privatization and color television and the thoroughgoing restructuring of Korea's telecommunications sector. They further explore government leadership, the growing private sector and international trade pressures in the diffusion of broadband, mobile communication, and convergence toward a ubiquitous network society. The role of education in these developments is explored in detail, along with both the positive and negative aspects of Korea's vibrant new digital media. The book also looks at Korea's growing international involvement, its role in efforts to build a world information society, and finally, its future place in cyberspace. This book will be of interest to students, scholars and policy makers interested in communications technologies, Asian/Korean Studies and development studies.
