Confidentiality in International Commercial Arbitration Ileana M. Smeureanu, 2011-07-14 After neutrality and international enforcement, the next most valued feature of international commercial arbitration is confidentiality. For reasons easy to imagine, businessmen do not want their trade secrets, business plans, strategies, contracts, financial results or any other types of business information to be publicly accessible, as would commonly happen in court proceedings. Yet the case law of arbitration shows that in practical terms confidentiality is not to be taken for granted – in fact, it has become one of the most undetermined matters in international arbitration. Although ‘the emperor of arbitration may have clothes,’ as one scholar has quipped, his raiments of secrecy can be ‘torn with surprising ease’. This book deciphers the current degree of confidentiality in international commercial arbitration as reflected by the most important arbitration rules, national laws, other arbitration-related enactments, and practices of arbitral tribunals and domestic courts globally. Drawing on this data and analysis, the author then sets forth criteria to assess the breach of confidentiality in international arbitration and the proper rules for protecting or sanctioning such breaches. What do we understand by confidentiality in arbitration? What are its limitations? Who is bound to observe it? How can we quantify its breach? In addressing these questions, the book engages such issues as the following: reasons for disclosure – e.g., for the establishment of a defence, for the enforcement of rights, in the public interest or in the interests of justice disclosure by consent, express or implied; circumstances triggering statutory obligation of disclosure; recent trends towards greater transparency in investor-State arbitration; court measures in support of arbitral confidentiality such as award of damages for breach of confidentiality; and categories of persons bound by confidentiality, including third parties such as witnesses and experts. Structured along the main stages of the arbitral process, the analysis covers the duty of confidentiality from the initiation of arbitral proceedings through their unfolding to the issuance of the award and after. The scope of confidentiality is reviewed in the practice of arbitral tribunals and domestic courts, and from the perspective of international arbitration institutions, with detailed attention to various arbitration rules and numerous significant cases. In its elucidation of the amount of confidentiality that ‘veils’ each phase of the arbitral process, and its ground-breaking identification of ‘patterns of disclosure’, this book is sure to raise awareness about the various facets and problems posed by confidentiality in arbitration. Although its scholarly contribution to the law of international commercial arbitration cannot be gainsaid, corporate counsel worldwide will quickly prize its more practical value.

Towards a Uniform Approach to Confidentiality of International Commercial Arbitration Elza Reymond-Eniaeva, 2019-06-11 The book deals with confidentiality as one of the most controversial issues in international commercial arbitration. On the one hand, it is widely recognized that confidentiality is an important advantage of arbitration which contributes to its attractiveness. On the other hand, there is no uniform regulation in national legislations, arbitration rules, and other relevant sources as to the scope or even to the existence of a duty of confidentiality. A uniform approach to confidentiality of international commercial arbitration is possible. The best way to achieve it would be through harmonization of national arbitration laws which should impose a confidentiality obligation subject to certain exceptions. The purpose of maintaining confidentiality would be to protect primarily the parties from undesirable leaks that can be avoided and to protect arbitration as an institution. As to a systematic publication of arbitral awards without identifying the parties’ identity, it is desirable and should be the goal.

Confidentiality in International Commercial Arbitration Kyriaki Noussia, 2010-03-10 Arbitration is an essential component in business. In an age when transparency is a maxim, important issues which the laws governing arbitration currently fail to address are the extent to which disclosure of information can be constrained by private agreement along with the extent to which the duty to preserve confidentiality can be stretched. Absent a coherent legal framework and extensive qualitative and quantitative data, it is equally difficult to suggest and predict future directions. This book offers a tool for attaining centralised access to otherwise fragmentary and dispersed material, as well as a comprehensive analysis and detailed exposition of the position in relation to confidentiality in arbitration in the jurisdictions of England, USA, France and Germany.

International Arbitration: Law and Practice in Switzerland Gabrielle Kaufmann-Kohler, Antonio Rigozzi, 2015-10-22 This book expounds the theory of international arbitration law. It explains in easily accessible terms all the fundamentals of arbitration, from separability of the arbitration agreement to competence-competence over procedural autonomy, finality of the award, and many other concepts. It does so with a focus on international arbitration law and jurisprudence in Switzerland, a global leader in the field. With a broader reach than a commentary of Chapter 12 of the Swiss Private International Law Act, the discussion contains numerous references to comparative law and its developments in addition to an extensive review of the practice of international tribunals. Written by two well-known specialists - Professor Kaufmann-Kohler being one of the leading arbitrators worldwide and Professor Rigozzi one of the foremost experts in sports arbitration - the work reflects many years of experience in managing arbitral proceedings involving commercial, investment, and sports disputes. This expertise is the basis for the solutions proposed to resolve the many practical issues that may arise in the course of an arbitration. It also informs the discussion of the arbitration rules addressed in the book, from the ICC Arbitration Rules to the Swiss Rules of International Arbitration, the CAS Code, and the UNCITRAL Rules. While the book covers commercial and sports arbitrations primarily, it also applies to investment arbitrations conducted under rules other than the ICSID framework.

International Small and Medium-Sized Enterprises Edith Olejnik,2014-01-27 With growing international business, small and medium-sized enterprises (SMEs) have been faced with increased competition, but also with enhanced opportunities. Edith Olejnik addresses four major issues within the context of SMEs' internationalization process: First, she identifies the three different internationalization patterns that SMEs take and analyzes how these patterns develop over time. Second, she looks at dynamic changes of foreign operation modes and the managerial reasons for these changes. Third, she derives an empirical classification of smaller family firms and profiles them using a comprehensive set of organizational variables. Fourth, she investigates the relationship between firm-level processes and dynamic capabilities in driving the international performance of SMEs. Based on theoretical considerations and empirical analyses this work provides important implications for research and management practice.

Global Governance, Human Rights and International Law Errol P. Mendes,2014-02-05 This book offers a stimulating introduction to the links between areas of global governance, human rights global economy and international law. By drawing on a range of diverse subject areas, Errol P. Mendes argues that the foundations of global governance, human rights and international law are undermined by a conflict or 'tragic flaw', where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self-interest for both the state and the global community. The book explores how human rights and international law are applied in some of the critical institutions of global governance and in the operations of the global private sector, and how States, institutions and global civil society struggle to fight this 'tragic flaw'. The book is brought up to date by considering developments in the role of the IMF, the World Bank, bilateral investment treaties; the likely failure of the Doha round of WTO negotiations; the legacy of the 2008 financial crisis; and the role of the International Criminal Court and the evolving Responsibility to Protect doctrine in international peace and security crises in the Middle East, Central and West Africa among other regions of the world. With its intensely interdisciplinary approach, this book motivates new thinking in the realm of global governance and international law, and promotes the development of new strategies for negotiating between conflicting leadership and organisational values within global institutions. The book will be of great interest and use to students and researchers of public international law, international relations and political science, business and human rights, global governance and international trade and economic law.

Design School Confidential Steven Heller,Lita Talarico,2009-10-01 Every great design school in the world is defined, in part, by the work of its students at any given time. The various project challenges given to a class determine the success of a school's pedagogy, but also the ingenuity of its faculty and students. This book features fifty real-world class assignments from top design programs at universities around the world, and examines the resulting student projects. From undergraduate to graduate work and basic class challenges to final thesis's, students delivered a wide variety of graphic and multimedia design projects from print to motion to exhibition. The book has three functions: 1) To exhibit a wide range of challenging problems and successful solutions. 2) Provide practical models to be inspired by and learn from. 3) Examine how sophisticated design school projects are and what value they have in relation to real-world practice.
