**Chivalry** Maurice Keen,1984 Chivalry--with its pageants, heraldry, and knights in shining armor--was a social ideal that had a profound influence on the history of early modern Europe. In this eloquent and richly detailed book, a leading medieval historian discusses the complex reality of chivalry: its secular foundations, the effects of the Crusades, the literature of Knighthood, and its ethos of the social and moral obligations of nobility.

*Nuclear Education and Training* OECD Nuclear Energy Agency,2012 The OECD Nuclear Energy Agency (NEA) first published in 2000 *Nuclear Education and Training: Cause for Concern?*, which highlighted significant issues in the availability of human resources for the nuclear industry. Ten years on, *Nuclear Education and Training: From Concern to Capability* considers what has changed in that time and finds that, while some countries have taken positive actions, in a number of others human resources could soon be facing serious challenges in coping with existing and potential new nuclear facilities. This is exacerbated by the increasing rate of retirement as the workforce ages. This report provides a qualitative characterisation of human resource needs and appraises instruments and programmes in nuclear education and training initiated by various stakeholders in different countries. In this context, it also examines the current and future uses of nuclear research facilities for education and training purposes. Regarding the nuclear training component of workforce competence, it outlines a job taxonomy which could be a basis for addressing the needs of workers across this sector. It presents the taxonomy as a way of enhancing mutual recognition and increasing consistency of education and training for both developed and developing countries.

*CBT for College Students with ADHD* Arthur D. Anastopoulos,Joshua M. Langberg,Laura Hennis Besecker,Laura D. Eddy,2020-12-03 This book provides an overview of the ACCESS program, a mental health program that has been developed and tested as an efficacious treatment for college students with ADHD. This program is at the cutting edge of clinical research, incorporating treatment strategies that allow for dissemination in real world settings in order to effectively assist college students experiencing difficulties in their academic, personal, social, and emotional functioning. As cognitive behavioral approaches have proved to be the most successful psychological treatments to date, the techniques in this volume follow that model in a detailed and nuanced fashion. The authors provide a week by week breakdown of the program, supplemented by handouts and worksheets designed to facilitate better understanding of the areas targeted by the program. Filling a notable gap in research addressing the ADHD college student population, *CBT for College Students with ADHD* is a crucial resource for campus mental health practitioners as well as a broad range of clinicians dealing with emerging adults.

*Sand Dunes of the Northern Hemisphere: Distribution, Formation, Migration and Management* Lu Qi,Mahesh K. Gaur,Victor R. Squires,2024-01-09 Volume 2 of the book 'Sand Dunes of the Northern Hemisphere' is sub-titled *Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere*. It brings together a vast body of information and insight into sand dune and desert systems from North Asia, Central Asia, North Africa and the Middle East. Chapters from the Russian

Federation include studies on dune systems within the permafrost zone and there is a case study from temperate zone dune system in coastal Japan. Volume 2: Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere of 16 chapters in three Parts, focusses on Saharan Africa, Egypt, and Middle East and gives attention to sand mobility and encroachment with case studies from a number of countries where these matters are of concern. We also include chapters on the remote dunes in the permafrost zone and in the hyper-arid deserts of Iran. Case studies are used to highlight the characteristics of dunes and their interaction with humans in several widely divergent settings. Volume 2 concludes with some musing on the value of study of the past as key to the future and speculates on what the future might hold in the light of a warmer and drier Earth and a rise in sea level that threaten large tracts of low-lying land with marine incursions and destruction from storm surge. PART 4 Sand Mobility and Encroachment The seven chapters in this Part examine the real-world impact of sand encroachment and dune migration on people and their economic activities and the health, welfare and financial implications related to destruction of infrastructure, including human habitations. PART 5 Sand Dune Landscapes Distribution, Formation and Management Seven Case studies from several geographic regions in Africa, the Middle East, north-east Asia are presented here to demonstrate the underlying mechanisms in dune formation and the diverse approaches to their management. Human impacts such as sand mining, tourism development, combine with natural forces like climate variability to challenge the realization of an optimum management strategy. PART 6 Concluding Thoughts: Coping with an Unknown Future from a Little-known Past The two chapters in Part 6 have special roles. We are privileged to publish new research findings that are summarized here in Chapter 38 from extensive and detailed work conducted in the Kyzyl Kum, and Karakum sand seas of Central Asia. There is a strong belief that further study of the little-known past such as revealed in this study could unlock clues as to what a future Earth might look like. This leads on to speculation in Chapter 39 about the implications of what we already know about global change (not only climate change) and the impact of the Anthropocene on the dune systems, both inland and coastal. Sea level rise, marine incursions and an increase in extreme weather events will affect dune systems and sand seas on the Northern Hemisphere (and beyond).

*Men of Order* Touraj Atabaki, Erik J. Zürcher, 2017-01-30 The authors trace the emergence of Atatürk and Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire, which led to the introduction of European social models, the establishment of dictatorship and of secularist reforms. This produced in both Turkey and Iran highly authoritarian, nationalist, and quasi-westernised states, where the personality cult of the leader defined the politics of each country.

*Violence and Mental Health* Jutta Lindert, Itzhak Levav, 2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of ‘undoing violence’ by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

Learning with Information Systems Simon Bell,2013-02-01 In *Learning with Information Systems* the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

**Angels and Demons in Art** Rosa Giorgi,2005 This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the *Guide to Imagery* series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

*The Island of the Elyms* Yvonne Cardogna,2006-11-21 The novel *The Island of the Elyms* is set in a village of Sicily. It touches four generations of a well-to-do family and relates the tragic and humorous occurrences in the life of each member of that family. The story is narrated by a young girl, Marianna, whose romantic ideals and openness are often in conflict with the secretive and reserved nature of her family. Marianna loves the more salubrious and rustic lifestyle of the land-workers as opposed to the refined and sophisticated lifestyle of her aristocratic family. She feels the former to be an honest way of life and the latter a pretentious and artificial one. Marianna, with the exuberance of youth, would like to see a radical change in the way her family deals with certain issues. She herself represents a slowly changing society. However, the people whose beliefs have been forged and impressed into their very soul by generations of tumultuous historical events, are resistant to change. Eventually, Marianna learns to appreciate the island's cultural richness and its paradox. A sense of history and mythology, superstition and religion, in fact, often exist alongside one another and are portrayed in the novel. The novel touches also on both the First and Second World Wars because two members of Marianna's family, her grandfather and father, fought in each war respectively. It depicts every human emotion by means of adopting humor and tragedy throughout. One might say that in the novel *The Island of the Elyms* there is a book within the book as the lives of Marianna's great grandparents and grandparents emerge. The former being read by Nonna from her mother's memoirs and the latter narrated by Nonna herself. When finally Marianna is comfortable with who she is - different from the rest of her family, she is torn away from her birthplace for the great unknown which happens to be Australia. The story ends with the uprooting of the girl by the family, who, in turn, has to forfeit and abandon every dream, and thus becoming the innocent victim of the tragedy of emigration.
