Authored by experts of international renown Lavish use of colour photography and artwork helps explain new concepts clearly Demonstrates the effective use of the ClarityTM Self-Ligating appliance, a device which contains all of the essential features of SmartClipTM but which also demonstrates greater patient acceptability and hence improvement in compliance Explains treatment options that show more predictable outcomes, good performance sliding biomechanics, the application of low force levels and reduced treatment times Ideal for orthodontists worldwide – whether qualified or in training

Photography with Tilt and Shift Lenses Keith Cooper,2020-11-23 Tilt and shift lenses offer tremendous creative possibilities for users of digital SLR and mirrorless cameras. This practical book explains the techniques that will help you take better photos - photos that don't distort or lose focus. Assessing the benefits and pitfalls of a range of lenses, adapters, software and editing techniques, it guides you through the practicalities of working with these lenses and gives you the skills to use them to best effect. With stunning examples throughout, this book gives an overview of the different lenses available, and tips on how adapters can give tilt/shift options when using old medium-format lenses. It gives advice on how simple lens shift can change the entire look of your photos, and techniques for using lens tilt for focus control and close-up working. Stunning examples show the use of tilt and shift lenses across a range of available focal lengths, both tripod-mounted and handheld.

Chivalry Maurice Keen,1984 Chivalry--with its pageants, heraldry, and knights in shining armor--was a social ideal that had a profound influence on the history of early modern Europe. In this eloquent and richly detailed book, a leading medieval historian discusses the complex reality of chivalry: its secular foundations, the effects of the Crusades, the literature of Knighthood, and its ethos of the social and moral obligations of nobility.

CBT for College Students with ADHD Arthur D. Anastopoulos,Joshua M. Langberg,Laura Hennis Besecker,Laura D. Eddy,2020-12-03 This book provides an overview of the ACCESS program, a mental health program that has been developed and tested as an efficacious treatment for college students with ADHD. This program is at the cutting edge of clinical research, incorporating treatment strategies that allow for dissemination in real world settings in order to effectively assist college students experiencing difficulties in their academic, personal, social, and emotional functioning. As cognitive behavioral approaches have proved to be the most successful psychological treatments to date, the techniques in this volume follow that model in a detailed and nuanced fashion. The authors provide a week by week breakdown of the program, supplemented by handouts and worksheets designed to facilitate better understanding of the areas targeted by the program. Filling a notable gap in research addressing the ADHD college student population, CBT for College Students with ADHD is a crucial resource for campus mental health practitioners as well as a broad range of clinicians dealing with emerging adults.

Nuclear Education and Training OECD Nuclear Energy Agency,2012 The OECD Nuclear Energy Agency (NEA) first published in 2000 Nuclear Education and Training: Cause for Concern?, which highlighted significant issues in the availability of human resources for the nuclear industry. Ten years on, Nuclear Education and Training: From Concern to Capability considers what has changed in that time and finds that, while some countries have taken positive actions, in a number of others human resources could soon be facing serious challenges in coping with existing and potential new nuclear facilities. This is exacerbated by the increasing rate of retirement as the workforce ages. This report provides a qualitative characterisation of human resource needs and appraises instruments and programmes in nuclear education and training initiated by various stakeholders in different countries. In this context, it also examines the current and future uses of nuclear research facilities for education and training purposes. Regarding the nuclear training component of workforce competence, it outlines a job taxonomy which could be a basis for addressing the needs of workers across this sector. It presents the taxonomy as a way of enhancing mutual recognition and increasing consistency of education and training for both developed and developing countries.

Sand Dunes of the Northern Hemisphere: Distribution, Formation, Migration and Management Lu Qi,Mahesh K. Gaur,Victor R. Squires,2024-01-09 Volume 2 of the book 'Sand Dunes of the Northern Hemisphere' is sub-titled Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere. It brings together a vast body of information and insight into sand dune and desert systems from North Asia, Central Asia, North Africa and the Middle East. Chapters from the Russian Federation include studies on dune systems within the permafrost zone and there is a case study from temperate zone dune system in coastal Japan. Volume 2: Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere of 16 chapters in three Parts, focusses on Saharan Africa, Egypt, and Middle East and gives attention to sand mobility and encroachment with case studies from a number of countries where these matters are of concern. We also include chapters on the remote dunes in the permafrost zone and in the hyper-arid deserts of Iran. Case studies are used to highlight the characteristics of dunes and their interaction with humans in several widely divergent settings. Volume 2 concludes with some musing on the value of study of the past as key to the future and speculates on what the future might hold in the light of a warmer and drier Earth and a rise in sea level that threaten large tracts of low-lying land with marine incursions and destruction from storm surge. PART 4 Sand Mobility and Encroachment The seven chapters in this Part examine the real-world impact of sand encroachment and dune migration on people and their economic activities and the health, welfare and financial implications related to destruction of infrastructure, including human habitations. PART 5 Sand Dune Landscapes Distribution, Formation and Management Seven Case studies from several geographic regions in Africa, the Middle East, north-east Asia are presented here to demonstrate the underlying mechanisms in dune formation and the diverse approaches to their management. Human impacts such as sand mining, tourism development, combine with natural forces like climate variability to challenge the realization of an optimum management strategy. PART 6 Concluding Thoughts: Coping with an Unknown Future from a Little-known Past The two chapters in Part 6 have special roles. We are privileged to publish new research findings that are summarized here in Chapter 38 from extensive and detailed work conducted in the Kyzyl Kum, and Karakum sand seas of Central Asia. There is a strong belief that further study of the little-known past such as revealed in this study could unlock clues as to what a future Earth might look like. This leads on to speculation in Chapter 39 about the implications of what we already know about global change (not only climate change) and the impact of the Anthropocene on the dune systems, both inland and coastal. Sea level rise, marine incursions and an increase in extreme weather events will affect dune systems and sand seas on the Northern Hemisphere (and beyond).

Men of Order Touraj Atabaki,Erik J. Zürcher,2017-01-30 The authors trace the emergence of Atatürk and Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire, which led to the introduction of European social models, the establishment of dictatorship and of secularist reforms. This produced in both Turkey and Iran highly authoritarian, nationalist, and quasi-westernised states, where the personality cult of the leader defined the politics of each country.

Violence and Mental Health Jutta Lindert,Itzhak Levav,2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries,

communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.

Learning with Information Systems Simon Bell,2013-02-01 In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Souls Do Cry Angela Waters,2003 This story is going to take you inside the souls of the characters so you can perceive their pain and hear the cry of their souls. Each character has reasons for their actions and pays the price for them, sometimes paying more than what they bargained for. As you take the journey, envision your own soul as you keep in mind: souls do cry. With each tear shed the soul heals, rebuilds and gets a little stronger with time.

Making Hip Hop Theatre Katie Beswick,Conrad Murray,2022-03-10 Making Hip Hop Theatre is the essential, practical guide to making hip-hop theatre. It features detailed techniques and exercises that can guide creatives from workshops through to staging a performance. If you were inspired by Hamilton, Barber Shop Chronicles, Misty, Black Men Walking or Frankenstein: How to Make a Monster, this is the book for you. Covering vocal technique, use of equipment, mixing, looping, sampling, working with venues and dealing with creative challenges, this book is a bible for both new and experienced artists alike. Additionally, with links to online video material demonstrating and elaborating on the exercises included, it offers countless useful tools for teachers and facilitators of drama, music and other creative arts. Alongside this practical guidance is an overview of hip hop history, giving theoretical and historical context for the practice. From documentation of Conrad Murray's major productions, to commentary from leading practitioners including Lakeisha Lynch-Stevens, David Jubb, Emma Rice, Tobi Kyeremateng and Paula Varjack, readers are treated to a detailed insight into the background of hip hop theatre. Edited by scholar Katie Beswick and genre pioneer Conrad Murray, Making Hip Hop Theatre is a vital teaching tool and provides a much-needed account of a burgeoning aspect of contemporary theatre culture.

The 33 Jonathan Franklin,Clipper Audio (Firm),Recorded Books, LLC.,2011-07-01 The miraculous survival and dramatic rescue of the Chilean miners On 12 October 2010 the world's attention was fixed on a remote Chilean mine. Final preparations were underway for a daring rescue to end the longest underground entrapment in human history. Learn how 33 trapped men and the rescuers dedicated to saving them created a miracle in the desert. What those men experienced in the claustrophobic dark of the mine, and how their families kept faith, make this an unforgettable story. As the only print journalist with full access to the rescue efforts, Jonathan Franklin takes us deep into the collapsed mine, and behind the scenes of the rescue effort.

Alfredo Cáliz Alfredo Cáliz,José Manuel Navia,2010 Spanish photographer Alfredo Cáliz (born 1968) is best known for his moving portraits of contemporary life in Morocco, that reflect on the integration and cultural diversity that stems from migration. In the artist's own words: I am no longer a reporter-photographer; I am no longer an artist-photographer. I am simply a photographer. I'm between the two and I'm fine.

Controlled Therapeutic Trials in Gastroenterology Luigi Barbara,1986
Biogeomorphology Heather A. Viles,1988 Biogeomorphology is concerned with the influence of landforms on the distribution and development of plants, animals and mico-organisms; and with the influence of plants, animals and micro-organisms on earth surface processes and the development of landforms. In most situations these influences are interdependent with respect to environmental equilibrium or change. This volume of new essays considers a wide range of biological influences in geomorphology. It is divided according to particular geographical area and climatic criteria. The first part of the work is concerned with organic influences on landforms in temperate fluvial environments. Part two presents evidence from tropical, arid and periglacial environments. Part three deals with coastal and karst environments. Thi sis the first book on this important interdisciplinary field. It will be of considerable interest to geomorphologists, geologists and biologists, as well as to those involved in environmental planning and in using or monitoring the effects of plants and animals on the surface of the earth.
