Generalized Barycentric Coordinates in Computer Graphics and Computational Mechanics Kai Hormann,N. Sukumar,2017-10-30 In Generalized Barycentric Coordinates in Computer Graphics and Computational Mechanics, eminent computer graphics and computational mechanics researchers provide a state-of-the-art overview of generalized barycentric coordinates. Commonly used in cutting-edge applications such as mesh parametrization, image warping, mesh deformation, and finite as well as boundary element methods, the theory of barycentric coordinates is also fundamental for use in animation and in simulating the deformation of solid continua. Generalized Barycentric Coordinates is divided into three sections, with five chapters each, covering the theoretical background, as well as their use in computer graphics and computational mechanics. A vivid 16-page insert helps illustrating the stunning applications of this fascinating research area. Key Features: Provides an overview of the many different types of barycentric coordinates and their properties. Discusses diverse applications of barycentric coordinates in computer graphics and computational mechanics. The first book-length treatment on this topic

The Computer Coordinator David Moursund,1985-01-01 This book discusses computer coordinator responsibilities and suggests necessary qualifications. The need for computer coordinators is discussed and responsibilities of a building-level computer coordinator are identified to help distinguish this position from that of a computer teacher. A more detailed analysis of the types of activities that might involve a computer coordinator provides an overview of computers in instruction and discussions of the computer coordinator as a computer scientist, a learning specialist, and as a computer-integrated instruction specialist. A summary of computer coordinator responsibilities and planning and implementation is included, as well as a categorization of possible qualifications for a coordinator; a list of technical qualifications for a masters degree in computer education; discussion of the nature of many computer coordinator positions and how these are filled; an examination of some of the problems currently faced by computer coordinators; an analysis of the importance of educational goals in relation to educational computing; and interviews with six computer coordinators. Five references and two periodicals are listed, and two editorial reprints from The Computing Teacher are provided: The Two Percent Solution (edited) and Back to Basics. (LMM)
