If God Is Your Co-Pilot, Switch Seats B. J. Gallagher,2011-05-01
Profound insight often shows up in the most unlikely places. For B.J. Gallagher it was a bumper sticker she spotted on the freeway that read, “If God is your co-pilot, switch seats.” She knew instantly that the message was for her. This is a spiritual scrapbook of stories, poems, and words of inspiration about the gifts of spiritual surrender. Gallagher mixes her own personal stories and insights with inspirational quotes from a wide variety of spiritual teachers to show how surrendering our wills to a Higher Power can open us up to the miraculous. This beautifully packaged gift book features words of wisdom from Norman Vincent Peale, Martin Luther King, Jr., Sam Ervin, Rumi, Martin Buber, Rachel Naomi Remen, Henry Nouwen, and many others . An inspiring gift--perfect for Mother’s Day, graduation, and other special occasions.

Designing Distributed Systems Brendan Burns,2018-02-20
Without established design patterns to guide them, developers have had to build distributed systems from scratch, and most of these systems are very unique indeed. Today, the increasing use of containers has paved the way for core distributed system patterns and reusable containerized components. This practical guide presents a collection of repeatable, generic patterns to help make the development of reliable distributed systems far more approachable and efficient. Author Brendan Burns—Director of Engineering at Microsoft Azure—demonstrates how you can adapt existing software design patterns for designing and building reliable distributed applications. Systems engineers and application developers will learn how these long-established patterns provide a common language and framework for dramatically increasing the quality of your system. Understand how patterns and reusable components enable the rapid development of reliable distributed systems Use the side-car, adapter, and ambassador patterns to split your application into a group of containers on a single machine Explore loosely coupled multi-node distributed patterns for replication, scaling, and communication between the components Learn distributed system patterns for large-scale batch data processing covering work-queues, event-based processing, and coordinated workflows
