**Teaching the Video Production Class** David Howard,Amy Hunter,2014-01-13 This guidebook is a must-have resource for anyone teaching a television production class or running a morning news show at the elementary, middle, or high school level. Teaching a television production class is a real challenge, especially when working with the typical budget and time limitations of most elementary, middle, or high school curricula. Beyond the technical aspects of teaching this subject, what is the best way to keep students engaged and challenged while teaching them skills that will help make them college and career ready? Spanning lesson plans, video production activities, assessment, and more, this book supplies a

comprehensive, step-by-step guide to teaching a television production class, using whatever equipment is readily available. It focuses on the critical aspects of how to teach television production and organize lessons, rather than the quickly evolving details of what equipment or editing software to use. The authors also provide lessons on creating and executing a daily newscast show, how to evaluate that show and collect school-wide data for further evaluation and improvement, and how to archive and mount these productions on the school website.

*The Technology, Business, and Economics of Streaming Video* Eli Noam, 2021-01-29 Along with its interrelated companion volume, *The Content, Impact, and Regulation of Streaming Video*, this book covers the next generation of TV—streaming online video, with details about its present and a broad perspective on the future. It reviews the new technical elements that are emerging, both in hardware and software, their long-term trend, and the implications. It discusses the emerging ‘media cloud’ of video and infrastructure platforms, and the organizational form of such TV.

*Pervasive Computing and the Networked World* Qiaohong Zu, Bo Hu, Atilla Elci, 2013-03-14 This book constitutes the refereed post-proceedings of the Joint International Conference on Pervasive Computing and the Networked World, ICPCA-SWS 2012, held in Istanbul, Turkey, in November 2012. This conference is a merger of the 7th International Conference on Pervasive Computing and Applications (ICPCA) and the 4th Symposium on Web Society (SWS). The 53 revised full papers and 26 short papers presented were carefully reviewed and selected from 143 submissions. The papers cover a wide range of topics from different research communities such as computer science, sociology and psychology and explore both theoretical and practical issues in and around the emerging computing paradigms, e.g., pervasive collaboration, collaborative business, and networked societies. They highlight the unique characteristics of the everywhere computing paradigm and promote the awareness of its potential social and psychological consequences.
