As he stares out his narrow slit of a window, he has no memory of how he got there—or why. All he knows is his name: Andas Kastor, Imperial Prince of Inyanga. But instead of the luxurious trappings of his royal palace, he's in a hellish, storm-lashed place punctuated by howling winds and shattering streaks of lightning. And he's not alone. In this uninhabited world, he meets five other survivors, also of noble birth. They include the scaled, emerald-haired Elys of Posedonia and clawed, fanged Lord Yolyos of Sargol. They all speak the same Basic language, as befits those from neighboring spheres. Were they abducted, spirited to this alien planet, and held in mind-lock while evil doppelgangers ruled in their places? After a daring escape, Andas returns to Inyanga—only to discover that decades have passed and another sits on his throne. Social Consequences of Internet Use James E. Katz, Ronald E. Rice, 2002-08-30 A study of the impact of Internet use on American society, based on a series of nationally representative surveys

conducted from 1995 to 2000. Drawing on nationally representative telephone surveys conducted from 1995 to 2000, James Katz and Ronald Rice offer a rich and nuanced picture of Internet use in America. Using quantitative data, as well as case studies of Web sites, they explore the impact of the Internet on society from three perspectives: access to Internet technology (the digital divide), involvement with groups and communities through the Internet (social capital), and use of the Internet for social interaction and expression (identity). To provide a more comprehensive account of Internet use, the authors draw comparisons across media and include Internet nonusers and former users in their research. The authors call their research the Syntopia Project to convey the Internet's role as one among a host of communication technologies as well as the synergy between people's online activities and their real-world lives. Their major finding is that Americans use the Internet as an extension and enhancement of their daily routines. Contrary to media sensationalism, the Internet is neither a utopia, liberating people to form a global egalitarian community, nor a dystopia-producing armies of disembodied, lonely individuals. Like any form of communication, it is as helpful or harmful as those who use it.
