Sonic Technologies Robert Strachan,2017-01-12 Awarded a Certificate of Merit at the ARSC Awards for Excellence 2018 In the past two decades digital technologies have fundamentally changed the way we think about, make and use popular music. From the production of multimillion selling pop records to the ubiquitous remix that has become a marker of Web 2.0, the emergence of new music production technologies have had a transformative effect upon 21st Century digital culture. Sonic Technologies examines these issues with a specific focus upon the impact of digitization upon creativity; that is, what musicians, cultural producers and prosumers do. For many, music production has moved out of the professional recording studio and into the home. Using a broad range of examples ranging from experimental electronic music to more mainstream genres, the book examines how contemporary creative practice is shaped by the visual and sonic look and feel of recording technologies such as Digital Audio Workstations.

The Enlightenment Quest and the Art of Happiness John Maxwell Taylor,2015-03-24 Award-winning actor and playwright John Maxwell Taylor builds on the success of his previous book, *The Power of I Am*, in this eloquent call to awaken from our collective trance and to claim the transformative power and happiness that is our birthright. Drawing on his forty years' experience in spiritual self-transformation, Taylor offers a potent array of practical tools, stories, and life lessons that help us reorder the events in our lives, the way people respond to us, and the impact we have on the world. *The Enlightenment Quest and the Art of Happiness* shows us how to master ourselves so that we can harness the energy of higher power to surmount the chaos of the modern world and provides strategies for "sociological aikido" that allow us to deal effectively with negative people, narcissists, and egotists. Informed by Taylor's incredibly varied background—from European pop star, to student of Paramahansa Yogananda, Gurdjieff, and Mantak Chia, to resident at the pioneering Findhorn Community, to playing Carl Jung on stage for many years—this book demonstrates how, by understanding the powers active in creation, we can become instruments through which higher power continually flows to advance our evolution toward consciousness. In doing so, we not only transform ourselves, we become powerful agents for changing the world. Readers learn how to:

- Deal with negative people and egotists
- Use higher power to redirect the world around one to one's own advantage
- Stay sane in an insane world by understanding true spiritual psychology
- See the world as it is instead of spiritually daydreaming that things are going to get better
- Move beyond conspiracy theories and conspire instead to create a united world of consciousness
- Gain fresh insights into the work of Campbell, Jung, Paramahansa Yogananda, Gurdjieff, and others
- Apply the Findhorn principles of miraculous manifestation as practiced by the author since 1973
