**Bike Snob** BikeSnobNYC,2011-04-29 "Equal parts critical manifesto and tender mini-memoir about a boy and his bikes" from Eben Weiss, blogger and author of The Enlightened Cyclist (GQ). Cycling is exploding in a good way. Urbanites everywhere, from ironic hipsters to earth-conscious commuters, are taking to the bike like aquatic mammals to water. BikeSnobNYC--cycling's most prolific, well-known, hilarious, and anonymous blogger--brings a fresh and humorous perspective to the most important vehicle to hit personal transportation since the horse. Bike Snob treats readers to a laugh-out-loud rant and rave about the world of bikes and their riders and offers a unique look at the ins and outs of cycling, from its history and hallmarks to its wide range of bizarre practitioners.

Throughout, the author lampoons the missteps, pretensions, and absurdities of bike culture while maintaining a contagious enthusiasm for cycling itself. Bike Snob is an essential volume for anyone who knows, is, or wants to become a cyclist. "This is a social manual that should be bundled with every bike shipped in America." –Christian Lander, author of *Stuff White People Like* "I like to think I know a thing or two (or three) about being ruthless and relentless—either trying to win the Tour or fighting cancer. The Snob knows it too. Keeping us dorks in line is tough work. I take pleasure in getting picked on by the Snob, slightly more pleasure in reading his writing, but take the most pleasure punishing his ass (my payback) on the bike either in Central Park or on 9W/River Road. Long live the Snob." –Lance Armstrong

**Advances on Broad-Band Wireless Computing, Communication and Applications** Leonard Barolli, Peter Hellinckx, Tomoya Enokido, 2019-10-18 This proceedings book presents the latest research findings, innovative research results, methods and development techniques related to the emerging areas of broadband and wireless computing, from both theoretical and practical perspectives. Today's information networks are going through a rapid evolution. Different kinds of networks with different characteristics are emerging, and are being integrated into heterogeneous networks. As a result, there are numerous interconnection problems that can occur at different levels of the hardware and software design of communicating entities and communication networks. Such networks need to manage an increasing usage demand, provide support for a significant number of services, guarantee their QoS, and optimize the network resources. The success of all-IP networking and wireless technology has changed the way of living for people around the globe. Advances in electronic integration and wireless communications will pave the way to offering access to wireless networks on the fly, which in turn will allow electronic devices to share information with each other wherever and whenever necessary.

**Bicycle Urbanism** Rachel Berney, 2018-02-07 Over recent decades, bicycling has received renewed interest as a means of improving transportation through crowded cities, improving personal health, and reducing environmental impacts associated with travel. Much of the discussion surrounding cycling has focused on bicycle facility design—how to best repurpose road infrastructure to accommodate bicycling. While part of the discussion has

touched on culture, such as how to make bicycling a larger part of daily life, city design and planning have been sorely missing from consideration. Whilst interdisciplinary in its scope, this book takes a primarily planning approach to examining active transportation, and especially bicycling, in urban areas. The volume examines the land use aspects of the city—not just the streetscape. Illustrated using a range of case studies from the USA, Canada, and Australia, the volume provides a comprehensive overview of key topics of concern around cycling in the city including: imagining the future of bicycle-friendly cities; integrating bicycling into urban planning and design; the effects of bike use on health and environment; policies for developing bicycle infrastructure and programs; best practices in bicycle facility design and implementation; advances in technology, and economic contributions.
