In order to present recent developments and to discuss future trends, academics and practitioners met at the 7th International Workshop on 3D Geoinformation. Eisenhower's Thorn on the Rhine Nathan N. Prefer,2015-10-19 “The difficult fighting in the Colmar Pocket is brought to vivid life” in this WWII chronicle of the Allied 6th Army Group (WWII History). By the fall of 1944, the Western Allied forces appeared to be unstoppable. The summer’s Normandy invasion had driven the Germans out of northern France and most of the Low Countries. In September, they liberated France’s southern coast with little opposition. Then, Allied divisions began lining up along the Rhine. While the Americans met a nasty surprise in the Ardennes, the Germans also held on to the province of Alsace, maintaining a hard pocket around the city of Colmar. On New Year’s Eve, they launched Operation Northwind, a counteroffensive that nearly put Allied forces back on their heels. On January 12, 1945, Eisenhower could only tell George Marshall that Colmar was “a very bad thorn in our side today.” This is the story of the Sixth Army Group, a unit that combined US and French forces, and its unexpectedly bloody and protracted battle for the

Colmar Pocket. Amidst a horrific winter and rough terrain, interspersed by demolished towns, the Allied Army Group traded blows with the German 19th in a ferocious campaign. This book informs us fully of the tremendous and costly struggle waged in an often-neglected sector of World War II’s European Theater.

The chapters that follow relate the findings of an in-depth qualitative and interpretative study that followed the decision making process of 25 Belgian households during a whole year. Chapter 4 discusses the context in which holiday decisions are made. In the next two chapters, the focus is on the decision-making process in itself both at the generic and holiday levels (chapter 5) and at the destination level (chapter 6). Post-experience processes are investigated in chapter 7, whereas group processes are the particular focus of chapter 8. Chapter 9 presents the integrative and conclusive part of the book where a new typology of holidaymakers is proposed. The book has a subject index.

Predicting Personality Drew D'Agostino,Greg Skloot,2019-11-12 The ultimate playbook for using artificial intelligence to communicate effectively, build teams, and win customers Not long ago, we imagined a hyper-connected world full of trust and openness—a world where effortless communication would bring about a new understanding between people everywhere. Judging from our current environment, this vision of the future may have been overly optimistic. With infinite channels and countless voices flooding them with messages, most people have become highly skeptical and guarded by necessity. As a result, communication is much harder than ever before. Despite the unprecedented connectivity enabled by modern technology, we are far less likely to trust and to invest the time needed to build strong relationships. How can we use technology to reverse this trend? A groundbreaking new branch of artificial intelligence—Personality AI—may be the answer. Combining traditional machine learning, data analytics, and behavioral psychology, Personality AI helps professional communicators tear down walls, establish trust with their audiences, and utilize data to build meaningful relationships, strengthen empathy, and win more customers. Predicting Personality is a practical, real-world playbook for any individual or business whose success hinges on the ability to communicate effectively and build teams. Authors Drew D’Agostino and Greg Skloot—CEO and President, respectively, of Crystal, the app that tells you anyone's personality—show you how businesses can leverage Personality AI and machine learning to grow faster and communicate more effectively than was previously possible.
