The Handbook of Magazine Studies Miglena Sternadori, Tim Holmes, 2020-02-28 A scholarly work examining the continuing evolution of the magazine—part of the popular Handbooks in Media and Communication series The Handbook of Magazine Studies is a wide-ranging study of the ways in which the political economy of magazines has dramatically shifted in recent years—and continues to do so at a rapid pace. Essays from emerging and established scholars explore the cultural function of magazine media in light of significant changes in content delivery, format, and audience. The text addresses topics such as the role of advocacy in shaping and changing magazine identities, magazines and advertising in the digital age, gender and sexuality in magazines, and global magazine markets. Useful to scholars and educators alike, this book: Discusses media theory, academic research, and real-world organizational dynamics Presents essays from both emerging and established scholars in disciplines such as art, geography, and women's studies Features in-depth case studies of magazines in international, national, and regional contexts Explores issues surrounding race, ethnicity, activism, and resistance Whether used as a reference, a supplementary text, or as a catalyst to spark new research, The Handbook of Magazine Studies is a valuable resource for students, educators, and scholars in fields of mass media, communication, and journalism.

The Routledge Handbook of English Language and Digital Humanities Svenja Adolphs,Dawn Knight,2020-04-16 The Routledge Handbook of English Language and Digital Humanities serves as a reference point for key developments related to the ways in which the digital turn has shaped the study of the English language and of how the resulting methodological approaches have permeated other disciplines. It draws on modern linguistics and discourse analysis for its analytical methods and applies these approaches to the exploration and theorisation of issues within the humanities. Divided into three sections, this handbook covers: sources and corpora; analytical approaches; English language at the interface with other areas of research in the digital humanities. In covering these areas, more traditional approaches and methodologies in the humanities are recast and research challenges are re-framed through the lens of the digital. The essays in this volume highlight the opportunities for new questions to be asked and long-standing questions to be reconsidered when drawing on the digital in humanities research. This is a ground-breaking collection of essays offering incisive and essential reading for anyone with an interest in the English language and digital humanities.

Bio-pics Ellen Cheshire, 2014-12-16 Bio-pics: A Life in Pictures offers a series of case studies which throw light on this most unique of genres. Is the bio-pic a genre in its own right? Or are such films merely footnotes in other more traditional genres such as the western or costume drama, depending on the historical figure under scrutiny. Unlike other genre forms bio-pics seemingly share no familiar iconography, codes or conventions. They can be set anywhere and at any time. What links them is quite simply that the films depict the life of an 'important' person. Through a carefully selected range of thematically linked (English-language) bio-pics released since 1990 this book explores key issues surrounding their resurgence, narrative structure, production, subject representation or misrepresentation, and critical response. The films under discussion are grouped around a profession (writers, singers, politicians, sportsmen, criminals, artists) allowing for comparisons to be drawn in approaches to similar subject matter.

No Size Fits All Tom Hayes, Michael S. Malone, 2009-11-12 Today's markets have splintered into millions of powerful consumer communities— how can businesses adapt? It's no secret that traditional mass marketing— network television, newspapers, direct mail—is dying. Consumer markets are increasingly fragmented, even as they become more connected, transparent, and global. The future of business is about penetrating selfforming niches, from affinity groups on Facebook to thousands of satellite channels and millions of private online communities. So how can businesses reach new customers, win their trust, and earn their loyalty? Tom Hayes and Michael S. Malone urge an entirely new approach, embracing small, trust-based online groups as powerful vehicles for creating customers and gathering invaluable feedback. But what they call “marketing 3.0” isn't as simple as setting up a YouTube channel. Drawing on many case studies, the authors offer a new set of tools for a world where attention is harder than ever to capture, but even more lucrative to hold. They explain how to use social media for a new kind of marketing—bottom-up instead of top-down, personal rather than public, subtle rather than full frontal. The payoff is a return to the power of oldfashioned handselling—turbocharged by bleedingedge technology.
