Computer Vision and Audition in Urban Analysis Using the Remorph Framework Mohammad Ali Nematollahi,Samaneh Shahbazi,Nashid Nabian,2018-12-28 Artificial Intelligence (AI) is penetrating in all sciences as a multidisciplinary approach. However, adopting the theory of AI including computer vision and computer audition to urban intellectual space, is always difficult for architecture and urban planners. This book overcomes this challenge through a conceptual framework by merging computer vision and audition to urban studies based on a series of workshops called Remorph, conducted by Tehran Urban Innovation Center (TUIC).

**Acorns: Windows High-Tide Foghat** Joshua Morris,2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self. Having chosen to focus upon ego (established securely by the time of Christ), much more beta brain wave development will destroy our species and others, which process has already begun. We create our own realities through beliefs, intents and desires and we were in and out of probabilities constantly. Feelings follow beliefs, not the other way around.

Logan Airside Improvements Planning Project ,2002

In Pursuit of Silence George Prochnik,2011-04-05 An elegant and eloquent (New York Times) exploration of the frontiers of noise and silence, and the growing war between them. Between iPods, music-blasting restaurants, earsplitting sports stadiums, and endless air and road traffic, the place for quiet in our lives grows smaller by the day. In Pursuit of Silence gives context to our increasingly desperate sense that noise pollution is, in a very real way, an environmental catastrophe. Traveling across the country and meeting and listening to a host of incredible characters, including doctors, neuroscientists, acoustical engineers, monks, activists, educators, marketers, and aggrieved citizens, George Prochnik examines why we began to be so loud as a society, and what it is that gets lost when we can no longer find quiet.
