David DeLong, 2006 Contains over 140 examples from David DeLong's (1930-2001) career. The subjects of his paintings are numerous and include coastal scenes and figure studies, but many reveal his interest in motorcycles and racing.

Slouching Towards Utopia J. Bradford DeLong, 2022-09-06 An instant New York Times and Wall Street Journal bestseller from one of the world's leading economists, offering a grand narrative of the century that made us richer than ever, but left us unsatisfied "A magisterial history."—Paul Krugman Named a Best Book of 2022 by Financial Times * Economist * Fast Company Before 1870, humanity lived in dire poverty, with a slow crawl of invention offset by a growing population. Then came a great shift: invention sprinted forward, doubling our technological capabilities each generation and utterly transforming the economy again and again. Our ancestors would have presumed we would have used such powers to build utopia. But it was not so. When 1870–2010 ended, the world instead saw global warming; economic depression, uncertainty, and inequality; and broad rejection of the status quo. Economist Brad DeLong's *Slouching Towards Utopia* tells the story of how this unprecedented explosion of material wealth occurred, how it transformed the globe, and why it failed to deliver us to utopia. Of remarkable breadth and ambition, it reveals the last century to have been less a march of progress than a slouch in the right direction.

Lost Knowledge David W. DeLong, 2004-09-09 Executives today recognize that their firms face a wave of retirements over the next decade as the baby boomers hit retirement age. At the other end of the talent pipeline, the younger workforce is developing a different set of values and expectations, which creates new recruiting and employee retention issues. The evolution from an older, traditional, highly-experienced workforce to a younger, more mobile, employee base poses significant challenges, particularly when considered in the context of the long-term orientation towards downsizing and cost cutting. This is a solution-oriented book to address one of the most pressing management problems of the coming years: How do organizations transfer the critical expertise and experience of their employees before that knowledge walks out the door? It begins by outlining the broad issues and providing tools for developing a knowledge-retention strategy and function. It then goes on to outline best practices for retaining knowledge, including knowledge transfer practices, using technology to enable knowledge retention, retaining older workers and retirees, and outsourcing lost capabilities.

The End of Influence Stephen S. Cohen, 2010-05 At the end of World War II, the United States had all the money—and all the power. Now, America finds itself cash poor, and to a great extent power follows money. In *The End of Influence*, renowned economic analysts Stephen S. Cohen and J. Bradford DeLong explore the grave consequences this loss will have for America's place in the world. America, Cohen and DeLong argue, will no longer be the world's hyperpower. It will no longer wield soft cultural power or dictate a monolithic foreign policy. More damaging, though, is the blow to the world's ability to innovate economically, financially, and politically. Cohen and DeLong also explore America's complicated relationship with China, the misunderstood role of sovereign wealth funds, and the return of state-led capitalism. An essential read for anyone interested in how global economics and finance interact with national policy, *The End of Influence* explains the far-reaching and potentially long-lasting but little-noted consequences of our great fiscal crisis.

Special Agent Candice DeLong, 2001-07 Candice DeLong has been called a real-life Clarice Starling and a female Donnie Brasco. She has been on the front lines of some of the FBI's most gripping and memorable cases, including being chosen as one of the three agents to carry out the manhunt for the Unabomber in Lincoln, Montana. She has tailed terrorists, gone undercover as a gangster's moll, and posed as the madam for a call-girl ring. Now for the first time she reveals the dangers and rewards of being a woman on the front lines of the world's most powerful law enforcement agency. She traces the unusual career path that led her to crime fighting, and recounts the incredible obstacles she faced as a woman and as a fledgling agent. She takes readers step by step through the profiling process and shows how she helped solve a number of incredible cases. The story of her role as a lead investigator on the notorious Tylenol Murderer case is particularly compelling. Finally, she gives the true, insiders story behind the investigation that led to the arrest of the Unabomber including information that the media can't or won't reveal. A remarkable portrait of courage and grace under fire, *Special Agent* offers a missing chapter to the annals of law enforcement and a dramatic and often funny portrait of an extraordinary woman who has dedicated her heart and soul to the crusade against crime.

Inside CentCom Michael DeLong, Noah Lukeman, 2013-02-05 General Mike DeLong deputy commander of the U.S. Central Command during the Afghanistan and Iraq wars was second only to General Tommy Franks in the war on terror. At the centre of discussions between President Bush, Donald Rumsfeld, Paul Wolfowitz, and Tommy Franks, General DeLong offers the frankest and most authoritative look inside the wars—how the US prepared for battle, how they fought, how two regimes were toppled—and what's happening now.

Teaching by Heart Thomas J. DeLong, 2020-01-14 The best teachers are leaders, and the best leaders are teachers. *Teaching by Heart* summarizes the author's key insights gained from more than forty years of teaching and managing. It illustrates how teachers can both lift people up and let them down. It proposes that the best teachers are also leaders, and the best leaders are also teachers. In examining how to lead and teach, renowned Harvard Business School professor Thomas J. DeLong takes the reader inside his own head and heart. He notes that, as teachers, we often focus more on our inadequacies and missteps than on our strengths and unique talents. He explains why this is so by dissecting and analyzing his own experiences—using himself as a case study. The book's goal is to help readers learn about the intricacies of teaching and managing, and to impart lessons about how teachers can create a unique teaching atmosphere. To do this, the author analyzes the process of creating a curriculum, preparing for an eighty-minute class, managing the fifteen minutes before class begins, and evaluating the nature of the teaching experience after the session concludes. Along the way, he connects specific classroom behaviors with leadership issues—in organizations, in teams, and in personal relationships. He also asks—and answers—some provocative questions, such as: What happens on multiple levels when I teach or lead—with me, students, or professionals? What am I thinking and feeling as I process what students are thinking and feeling? How are my internal conversations affecting how I teach and lead? How do I manage my biases, including having favorite students? To what extent can I use teaching methods in the arena of management? Throughout *Teaching by Heart*, DeLong discusses why empathy and authenticity matter. When teachers embrace this mindset, students have the

opportunity to have a unique learning experience. Teachers and managers will learn how to create moments of transformation for students. Whether you're a university professor, a student, a business leader, or just someone fascinated by teaching, this book will instruct, entertain, and--hopefully--inspire.

Color and Design Marilyn DeLong, Barbara Martinson, 2013-08-29 From products we use to clothes we wear, and spaces we inhabit, we rely on colour to provide visual appeal, data codes and meaning. Color and Design addresses how we understand and experience colour, and through specific examples explores how colour is used in a spectrum of design-based disciplines including apparel design, graphic design, interior design, and product design. Through highly engaging contributions from a wide range of international scholars and practitioners, the book explores colour as an individual and cultural phenomenon, as a pragmatic device for communication, and as a valuable marketing tool. Color and Design provides a comprehensive overview for scholars and an accessible text for students on a range of courses within design, fashion, cultural studies, anthropology, sociology and visual and material culture. After Piketty Heather Boushey, J. Bradford DeLong, Marshall Steinbaum, 2017-05-08 Are Thomas Piketty's analyses of inequality on target? Where should researchers go from here in exploring the ideas he pushed to the forefront of global conversation? In After Piketty, a cast of economists and other social scientists tackle these questions in dialogue with Piketty, in what is sure to be a much-debated book in its own right.

There's a God in My Closet Ben DeLong, 2019-07-19 Many have been taught to see God as a terrifying agent of wrath who spews anger at any sign of imperfection. At the same time, they've been taught that they are inherently flawed and devoid of goodness. Where does that leave us? For Ben DeLong, it left him hiding his skeletons from the monster he believed God to be. This proved to be a perfect recipe for anxiety, depression, and insecurity. But what if God accepts our skeletons? What if he actually embraces them in love? How would that change our outlook? For Ben, it changed everything. This book is about his journey to find what was always true: we are eternally embraced by God, skeletons and all, and he is never letting go.

Predator Ecology John P. DeLong, 2021 Predator-prey interactions are ubiquitous, govern the flow of energy up trophic levels, and strongly influence the structure of ecological systems. They are typically quantified using the functional response - the relationship between a predator's foraging rate and the availability of food. As such, the functional response is central to how all ecological communities function - since all communities contain foragers - and a principal driver of the abundance, diversity, and dynamics of ecological communities. The functional response also reflects all the behaviors, traits, and strategies that predators use to hunt prey and that prey use to evade predation. It is thus both a clear reflection of past evolution, including predator-prey arms races, and a major force driving the future evolution of both predator and prey. Despite their importance, there have been remarkably few attempts to synthesize or even briefly review functional responses. This novel and accessible book fills this gap, clearly demonstrating their crucial role as the link between individuals, evolution, and community properties, representing a highly-integrated and measurable aspect of ecological function. It provides a clear entry point for students, a refresher for more advanced researchers, and a motivator for future research. Predator Ecology is an advanced textbook suitable for graduate students and researchers in ecology and evolutionary biology seeking a broad, up-to-date, and authoritative coverage of the field. It will also be of relevance and use to mathematical ecologists, wildlife biologists, and anyone interested in predator-prey interactions.

Between the Woods and the Crick Jean L. DeLong, 2013-03-01 Norma returned a few minutes later with a piece of clothesline, which I tied to the wandering horse's halter and used to walk him down the sidewalk, clip-clopping all the way, music to my ears. What are you going to do with him, Jean? Why, I'm going to take him home and keep

him, I said, looking at Norma like she was crazy for not knowing that. I'll put him in the garage, and he can eat all the grass around our house, then Daddy won't have to mow it anymore. Plus, Daddy will have all the manure he needs for his garden, and I'll have a horse I can ride anytime I want. I reached up and rubbed his neck. All my dreams were coming true. I had my dog, and now, I had a horse, too. What more could any girl want?
