Linux Essentials Adidas Wilson, Linux is the only endpoint OS that is growing globally. As one person put it, Linux is the Nikola Tesla of information technology. This OS is used in a myriad of devices including smartphones, digital video recorders, televisions, airline entertainment systems, digital signage, automobile control systems, switches, routers, the desktop, among many others. The Microsoft Windows vs Linux OS debate will not end anytime soon. However, it is very clear that Linux is winning. If you have a hard time believing this, consider the influence of Linux on Android and UNIX-based Apple devices. The only reason Windows is still common is because of its influence on many core applications. This is about to change, and Linux is, without a doubt, the future. Microsoft has been the king of End User Computing (EUC) for about 30 years. Nonetheless, there are factors such as security concerns that are pushing EUC to the data center. Due to this,

there is a desire to reduce the costs and risks that are required to maintain Windows on the edge. Linux OS offers the perfect solution for this. Linux is layered and lightweight which enables it to perform very well across many types of devices. It also offers high speed and responsiveness. Because Linux has so many inherent advantages, it is preferred for endpoint applications.

The Art of Halo Eric S. Trautmann, 2004

Ada 95 David A. Wheeler, 2012-12-06 Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's ability to interface with other programming languages (such as C, Fortran, and Cobol) and

these are covered in one chapter. As a result both students and professional programmers learning Ada for the first time will welcome this new text.

Dramaturgies of Love in Romeo and Juliet Jonas

Kellermann, 2021-09-30 Bringing together current intermedial discourses on Shakespeare, music, and dance with the affective turn in the humanities, *Dramaturgies of Love in Romeo and Juliet* offers a unique and highly innovative transdisciplinary discussion of unspeakable love in one of the most famous love stories in literary history: the tragic romance of Romeo and Juliet. Through in-depth case studies and historical contextualisation, this book showcases how the woes that no words can sound of Shakespeare's iconic lovers nevertheless have found expression not only in his verbal poetry, but also in non-verbal adaptations of the play in 19th-century symphonic music and 20th- and 21st-century theatre dance. Combining methodological approaches from diverse disciplines, including affect theory, musicology, and dance studies, this study opens up a new perspective onto the artistic representation of love, defining amorous emotion as a generically transformative constellation of dialogic performativity. To explore how this constellation has become manifest across the arts, this book analyses and compares dramatic, musical, and choreographic dramatisations of love in William Shakespeare's early modern tragedy, French composer Hector Berlioz's dramatic symphony *Roméo et Juliette* (1839), and the staging of Berlioz's symphony by German contemporary choreographer Sasha Waltz for the Paris Opera Ballet (2007). Chapters 1 and 4 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Great Speeches by Native Americans Bob Blaisdell, 2012-03-01 Remarkable for their eloquence, depth of feeling, and oratorical mastery, these 82 compelling speeches encompass five centuries of Indian encounters with nonindigenous people. Beginning with a 1540 refusal by a Timucua chief to parley with Hernando de Soto (With such a people I want no peace), the collection extends to the 20th-century address of activist Russell Means to the United Nations affiliates and members of the Human Rights Commission (We are people who love in the belly of the monster). Other memorable orations include Powhatan's Why should you destroy us, who have provided you with food? (1609); Red Jacket's We like our religion, and do not want another (1811); Osceola's I love my home, and will not go from it (1834); Red Cloud's The Great Spirit made us both (1870); Chief Joseph's I will fight no more forever (1877); Sitting Bull's The life my people want is a life of freedom (1882); and many more. Other notable speakers represented here include Tecumseh, Seattle, Geronimo, and Crazy Horse, as well as many lesser-known leaders. Graced by forceful metaphors and vivid imagery expressing emotions that range from the utmost indignation to the deepest sorrow, these addresses are deeply

moving documents that offer a window into the hearts and minds of Native Americans as they struggled against the overwhelming tide of European and American encroachment. This inexpensive edition, with informative notes about each speech and orator, will prove indispensable to anyone interested in Native American history and culture.
