Virtual Homelands Madhavi Mallapragada, 2013-10-15 The internet has transformed the idea of home for Indians and Indian Americans. In *Virtual Homelands: Indian Immigrants and Online Cultures in the United States*, Madhavi Mallapragada analyzes home pages and other online communities organized by diasporic and immigrant Indians from the late 1990s through the social media period. Engaging the shifting aspects of belonging, immigrant politics, and cultural citizenship by linking the home page, household, and homeland as key sites, Mallapragada illuminates the contours of belonging and reveals how Indian American struggles over it trace back to the web's active mediation in representing, negotiating, and reimagining home. As Mallapragada shows, ideologies around family and citizenship shift to fit the transnational contexts of the online world and immigration. At the same time, the tactical use of the home page to make gender, racial, and class struggles visible and create new modes for belonging implicates the web within complex political and cultural terrain. On e-commerce, community, and activist sites, the recasting of home and homeland online points to intrusion by public agents such as the state, the law, and immigration systems in the domestic, the private, and the familial. Mallapragada reveals that the home page may mobilize to reproduce conservative narratives of Indian immigrants' familial and citizenship cultures, but the reach of a website extends beyond the textual and discursive to encompass the institutions shaping it, as the web

unmakes and remakes ideas of India and America.

Global Communication Karin Wilkins, Joe Straubhaar, Shanti Kumar, 2013-09-11 This volume interrogates what global means in the context of communication, and who benefits from global communication practices and industries. Emerging scholars contribute their unique perspectives in communication scholarship, charting innovative directions for research that connects empirical evidence with pressing questions of social significance. This critical reflection leads to considering problems that result from the way global communication becomes mobilized, in the practice of journalism and development as well as the ICT industry. Global Communication defines the term globalization, through understanding the cultural geography of global, regional, national, and local media. Critical evaluations of media production, distribution, and

consumption practices, within cultural contexts, offer insights into how people mediate the global. Chapters draw attention to communications in Latin America, the Arab World, and South Asia, complicating territorial boundaries and exploring how local audience and industry practices work within global as well as local configurations.

Making Diaspora in a Global City Helen Kim, 2014-08-21 The exciting diasporic sounds of the London Asian urban music scene are a cross-section of the various genres of urban music that include bhangra remix, R&B and hip hop styles, as well as dubstep and other urban sample-oriented electronic music. This book brings together a unique analysis of urban underground music cultures in exploring just how members of this scene take up space in super-diverse London. It provides a fresh perspective on the creativity of British South Asian youth culture, and makes a significant sociological intervention into this area by bringing the focus back onto urgent issues of race ethnicity alongside class and gender within youth cultural studies.

Networked Bollywood Swapnil Rai, 2024-01-31 Networked Bollywood provides interdisciplinary analysis of the role of the stars in the transformation of Hindi cinema into a global entertainment industry. The first Indian film was made in 1913. However, filmmaking was recognized as an industry almost a hundred years later. Yet, Indian films have been circulating globally since

their inception. This book unearths this oft-elided history of Bollywood's globalization through multilingual, transnational research and discursive cultural analysis. The author illustrates how over the decades, a handful of primarily male megastars, as the heads of the industry's most prominent productions and corporations, combined overwhelming charismatic affect with unparalleled business influence. Through their star switching power, theorized here as a deeply gendered phenomenon and manifesting broader social inequalities, India's most prominent stars instigated new flows of cinema, industrial collaborations, structured distinctive business models, influenced state policy and diplomatic exchange, thereby defining the future of Bollywood's globalization.

Routledge Handbook of the Indian Diaspora Radha Sarma Hegde,Ajaya Kumar Sahoo,2017-09-22 The geographical diversity of the Indian diaspora has been shaped against the backdrop of the historical forces of colonialism, nationalism and neoliberal globalization. In each of these global moments, the demand for Indian workers has created the multiple global pathways of the Indian diasporas. The Routledge Handbook of the Indian Diaspora introduces readers to the contexts and histories that constitute the Indian diaspora. It brings together scholars from different parts of the globe, representing various disciplines, and covers extensive spatial and temporal terrain. Contributors draw from a variety of archives and intellectual perspectives in

order to map the narratives of the Indian diaspora. The topics covered range from the history of diasporic communities, activism, identity, gender, politics, labour, policy, violence, performance, literature and branding. The handbook analyses a wide array of issues and debates and is organised in six parts: • Histories and trajectories • Diaspora and infrastructures • Cultural dynamics • Representation and identity • Politics of belonging • Networked subjectivities and transnationalism. Providing a comprehensive analysis of the diverse social, cultural and economic contexts that frame diasporic practices, this key reference work will reinvigorate discussions about the Indian diaspora, its global presence and trajectories. It will be an invaluable resource for academics, researchers and students interested in studying South Asia in general and the Indian diaspora in particular.

Advances in Communication Research to Reduce Childhood Obesity Jerome D. Williams, Keryn E Pasch, Chiquita A. Collins, 2013-02-12 Rates of childhood obesity are alarmingly high and increasing each year. Studies have shown that obese children are more likely to become obese adults and are likely to suffer with numerous health consequences like coronary heart disease, high blood pressure, and Type II diabetes, among others. Studies also indicate that television viewing and exposure to advertising for food products influences children's attitudes toward, food preferences and food purchase requests for foods with low nutritional value. It is important to better understand the role of media in childhood obesity and to learn how media may be used to address this issue in a positive way. This book focuses on communication and media research that can have an impact on reducing childhood obesity. Emphasis is placed on topics related to how the media communicate health-related messages about food, nutrition and diet that influence childhood obesity. Particular emphasis is on the new media, given the fact that media now have more central roles in socializing today's children and youth than ever before. Advertising and marketing messages reach young consumers through a variety of vehicles – broadcast and cable

television, radio, magazines, computers through the Internet, music, cell phones – and in many different venues – homes, schools, child-care settings, grocery stores, shopping malls, theaters, sporting events, and even airports. In addition, given the disparity in obesity rates between children of color and the general population, special attention is given to research on media targeting these populations.

From Bombay to Bollywood Aswin Punathambekar, 2013-07-24 *From Bombay to Bollywood* analyzes the transformation of the national film industry in Bombay into a transnational and multi-media cultural enterprise, which has come to be known as Bollywood. Combining ethnographic, institutional, and textual analyses, Aswin Punathambekar explores how relations between state institutions, the Indian diaspora, circuits of capital, and new media technologies and industries have reconfigured the Bombay-based industry's geographic reach. Providing in-depth accounts of the workings of media companies and media professionals, Punathambekar has produced a timely analysis of how a media industry in the postcolonial world has come to claim the global as its scale of operations. Based on extensive field research in India and the U.S., this book offers empirically-rich and theoretically-informed analyses of how the imaginations and practices of industry professionals give shape to the media worlds we inhabit and engage with. Moving beyond a focus on a single medium, Punathambekar develops a comparative and integrated approach that examines four different but

interrelated media industries--film, television, marketing, and digital media. Offering a path-breaking account of media convergence in a non-Western context, Punathambekar's transnational approach to understanding the formation of Bollywood is an innovative intervention into current debates on media industries, production cultures, and cultural globalization.

Hybrid Learning Jason Allen Snart, 2010-05-05 A call for the extension of hybrid learning urges that it become not just a quick fix or a boon for the bottom line, but an educational mode that reenvisions quality teaching and learning for the 21st century. Hybrid Learning: The Perils and Promise of Blending Online and Face-to-Face Instruction in Higher Education is an in-depth exploration of a new learning mode that could radically change higher education, incorporating emerging trends in technology and multimedia use—including online gaming, social networking, and other Web 2.0 applications—to create engaging and dynamic learning environments. Laying out fundamental challenges facing higher education today, this book shows how hybrid instruction can be designed and implemented to deliver excellent educational value in flexible modes and at moderate costs well-suited to the circumstances of many students and institutions. The book lays out the characteristic profiles of students who are most likely to benefit from and perform well in a hybrid learning environment, as well as the features and practices of hybrid courses most likely to produce positive learning outcomes. It also specifies the obligations of faculty in designing and delivering best-practice hybrid courses and the support and policy

obligations of institutions. Challenging prima-facie assumptions about hybrid learning, the author promotes it as nothing less than an opportunity to reenvision education for the 21st century.

Migrating Music Jason Toynbee, Byron Dueck, 2011-03-31 *Migrating Music* considers the issues around music and cosmopolitanism in new ways. Whilst much of the existing literature on 'world music' questions the apparently world-disclosing nature of this genre – but says relatively little about migration and mobility – diaspora studies have much to say about the latter, yet little about the significance of music. In this context, this book affirms the centrality of music as a mode of translation and cosmopolitan mediation, whilst also pointing out the complexity of the processes at stake within it. *Migrating music*, it argues, represents perhaps the most salient mode of performance of otherness to mutual others, and as such its significance in socio-cultural change rivals – and even exceeds – literature, film, and other language and image-based cultural forms. This book will serve as a valuable reference tool for undergraduate and postgraduate students with research interests in cultural studies, sociology of culture, music, globalization, migration, and human geography.
