Simulation Modeling and Analysis with ARENA Tayfur Altiok,Benjamin Melamed,2010-07-26 Simulation Modeling and Analysis with Arena is a highly readable textbook which treats the essentials of the Monte Carlo discrete-event simulation methodology, and does so in the context of a popular Arena simulation environment. It treats simulation modeling as an in-vitro laboratory that facilitates the understanding of complex systems and experimentation with what-if scenarios in order to estimate their performance metrics. The book contains chapters on the simulation modeling methodology and the underpinnings of discrete-event systems, as well as the relevant underlying probability, statistics, stochastic processes, input analysis, model validation and output analysis. All simulation-related concepts are illustrated in numerous Arena examples, encompassing production lines, manufacturing and inventory systems, transportation systems, and computer information systems in networked settings. · Introduces the concept of discrete event Monte Carlo simulation, the most commonly used methodology for modeling and analysis of complex systems · Covers essential workings of the popular animated simulation language, ARENA, including set-up, design parameters, input data, and output analysis, along with a wide variety of sample model applications from production lines to transportation systems · Reviews elements of statistics, probability, and stochastic processes relevant to simulation modeling * Ample end-of-chapter problems and full Solutions Manual * Includes CD with sample ARENA modeling programs

Introduction to Architectural Science Steven V. Szokolay,2014-04-11 Now in its third edition, this book provides the ideal and only reference to the physical basis of architectural design. Fully updated and expanded throughout, the book provides the data required for architects to design buildings that will maintain the users comfort in a variety of conditions, with minimal reliance on energy intensive methods like air conditioning. This is not a ‘how to’ book but answers the question why. It equips the reader with the tools to realize the full potential of the good intentions of sustainable, bioclimatic design. All sections have been revised and updated for this third edition including all the most relevant developments affecting heat, light and sound controls. The book responds to the need of understanding beyond ‘rules of thumb’.

CRAN Recipes William Yarberry,2021-05-08 Want to use the power of R sooner rather than later? Don’t have time to plow through wordy texts and online manuals? Use this book for quick, simple code to get your projects up and running. It includes code and examples applicable to many disciplines. Written in everyday language with a minimum of complexity, each chapter provides the building blocks you need to fit R’s astounding capabilities to your analytics, reporting, and visualization needs. CRAN Recipes recognizes how needless jargon and complexity get in your way. Busy professionals need simple examples and intuitive descriptions; side trips and meandering philosophical discussions are left for other books. Here R scripts are condensed, to the extent possible, to copy-paste-run format. Chapters and examples are structured to purpose rather than particular functions (e.g., “dirty data cleanup” rather than the R package name “janitor”). Everyday language eliminates the need to know functions/packages in advance. What You Will Learn Carry out input/output; visualizations; data munging; manipulations at the group level; and quick data exploration Handle forecasting (multivariate, time series, logistic regression, Facebook’s Prophet, and others) Use text analytics; sampling; financial analysis; and advanced pattern matching (regex) Manipulate data using DPLYR: filter, sort, summarize, add new fields to datasets, and apply powerful IF functions Create combinations or subsets of files using joins Write efficient code using pipes to eliminate intermediate steps (MAGRITTR) Work with string/character manipulation of all types (STRINGR) Discover counts, patterns, and how to locate whole words Do wild-card matching, extraction, and invert-match Work with dates using LUBRDATE Fix dirty data; attractive formatting; bad habits to avoid Who This Book Is For Programmers/data scientists with at least some prior exposure to R.

Management of Change ,2007-01-01 Problem-Based Learning (PBL) and Project-Based Learning are teaching methods based on principles of student-centred learning, which target an interdisciplinary engineering curriculum. The transition from strictly traditional approaches in engineering education represents significant opportunities for change.

Expanding Housing Finance to the Underserved in South Asia Tatiana Nenova,2010-06-22 Rapid economic growth in South Asia, urbanization, and a rising middle class have created considerable pent-up demand for housing and housing finance. More than 14 percent of low-income South Asians have no home. In response, South Asia’s dynamic housing and housing finance markets have grown at rates of around 30%, but are still limited to upper-income groups. The contribution of housing and real-estate sector to overall economic growth, social uplift and employment is considerable. Housing and housing finance services have the clear potential to expand to middle- and even lower- income families. This requires an improved land administration, strengthened legal framework for land titling, registration, and foreclosure, better market data provision, and promotion of long-term funding for mortgage lenders and developers. Innovative traditional mortgage products and Islamic finance could match demand in underserved market segments. This report, a first regional effort on the topic, examines housing shortages in South Asia, as well as outlines shortcomings of the market for home mortgages. Information on good practice and country-specific examples are presented on enabling builder/developers, mortgage lenders, land administration, as well as foreclosure and other relevant regulations, to strengthen home ownership in South Asia. Special emphasis is accorded to low-income housing solutions.

Assessment, Learning And Employability Knight, Peter,Yorke, Mantz,2003-10-01 Clearly set out in three specific sections, this book argues that that existing grading practices cannot cope with the expectations laid upon them, while the potential of formative assessment for the support of learning is not fully realised, discusses how institutions need to respond in policy terms to the challenges that have been posed.

Preventing Chronic Diseases WHO,World Health Organization,2005-09-28 The major causes of premature adult deaths in all regions of the world, due to chronic diseases such as heart disease, strokes, diabetes and cancer, have been generally neglected on the international health and development agenda. Four out of every five chronic disease-related deaths in the world occur in low and middle income countries, where people tend to develop these diseases at a younger age and to die sooner. The

death toll is projected to rise by a further 17 per cent in the next 10 years, whilst child obesity rates are increasing worldwide. This report examines the actual scale and severity of the problem using the most recent data available, considers the major risk factors and associated trends, and discusses the public health policy actions required to implement effective integrated chronic disease prevention and control measures.

Preventing Tobacco Use Among Youth and Young Adults United States. Public Health Service. Office of the Surgeon General, 2012 This Surgeon General's report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco

The Behavioral Aspects of Smoking National Institute on Drug Abuse. Division of Research, 1979 The five chapters in this monograph were previously published as Part II, The behavioral aspects of smoking, of *Smoking and Health*, a report of the Surgeon General, DHEW Publication No. (PHS) 79-50066. An introductory chapter has been added.

E-Cigarette Use Among Youth and Young Adults: a Report of the Surgeon General Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, U.S. Department of Health and Human Services, 2019-07-26 Tobacco use among youth and young adults in any form, including e-cigarettes, is not safe. In recent years, e-cigarette use by youth and young adults has increased at an alarming rate. E-cigarettes are now the most commonly used tobacco product among youth in the United States. This timely report highlights the rapidly changing patterns of e-cigarette use among youth and young adults, assesses what we know about the health effects of using these products, and describes strategies that tobacco companies use to recruit our nation's youth and young adults to try and continue using e-cigarettes. The report also outlines interventions that can be adopted to minimize the harm these products cause to our nation's youth. E-cigarettes are tobacco products that deliver nicotine. Nicotine is a highly addictive substance, and many of today's youth who are using e-cigarettes could become tomorrow's cigarette smokers. Nicotine exposure can also harm brain development in ways that may affect the health and mental health of our kids. E-cigarette use among youth and young adults is associated with the use of other tobacco products, including conventional cigarettes. Because most tobacco use is established during adolescence, actions to prevent our nation's young people from the potential of a lifetime of nicotine addiction are critical. E-cigarette companies appear to be using many of the advertising tactics the tobacco industry used to persuade a new generation of young people to use their products. Companies are promoting their products through television and radio advertisements that use celebrities, sexual content, and claims of independence to glamorize these addictive products and make them appealing to young people.

The Engineering-Business Nexus Steen Hyldgaard Christensen, Bernard Delahousse, Christelle Didier, Martin Meganck, Mike Murphy, 2018-11-14 Fascinating and compelling in equal measure this volume presents a critical examination of the multilayered relationships between engineering and business. In so doing the study also stimulates ethical reflection on how these relationships either enhance or inhibit strategies to address vital issues of our time. In the context of geopolitical, economic, and environmental tendencies the authors explore the world that we should want to create and the role of the engineer and the business manager in this endeavor. Throughout this volume the authors identify periods of alignment and periods of tension between engineering and business. They look at focal points of the engineering-business nexus related to the development of capitalism. The book explores past and present movements to reshape, reform, or reject this nexus. The volume is informed by questions of importance for industry as well as for higher education. These are: What kinds of conflict arise for engineers in their attempts to straddle both professional and organizational commitments? How should professionals be managed to avoid a clash of managerial and professional cultures? How do engineers create value in firms and corporations? What kinds of tension exist between higher education and industry? What challenges does the neoliberal entrepreneurial university pose for management, faculty, students, society, and industry? Should engineering graduates be ready for work, and can they possibly be? What kinds of business issues are reflected in engineering education curricula, and for what purpose? Is there a limit to the degree of business hybridization in engineering degree programs, and if so, what would be the criterion for its definition? Is there a place in engineering education curricula for reflective critique of assumptions related to business and economic thinking? One ideal of management and control comes to the fore as the Anthropocene - the world transformed into an engineered artefact which includes human existence. The volume raises the question as to how engineering and business together should be considered, given the fact that the current engineering-business nexus remains embedded within an economic model of continual growth. By addressing macro-level issues such as energy policy, sustainable development, globalization, and social justice this study will both help create awareness and stimulate development of self-knowledge among practitioners, educators, and students thereby ultimately addressing the need for better informed citizens to safeguard planet Earth as a human life supporting system.

Duck on a Tractor David Shannon, 2021-08-03 Bestselling Caldecott Honor artist David Shannon tells the story of a determined duck who decides to jump on a tractor and drive it around the barnyard and through town, with hilarious consequences! Shannon's wildly popular, award-winning *Duck on a Bike* left children begging him to tell them another story about Duck after seeing him pictured alongside a shiny red tractor. Now Duck is back and turning the farm upside down! Flushed with the success of his trailblazing bike ride around the farm, Duck decides he's ready to drive the tractor. As in the bestselling *Duck on a Bike*, all the barnyard animals share their humorous comments as they watch Duck do the unthinkable. Then, one by one, they join him on the tractor for a ride! But what happens when Duck drives the big red tractor through town, past the popular diner where all the locals are having lunch? What will those folks really think when they see Duck and all the other animals riding around on Farmer O'Dell's tractor? Filled with entertaining detail and sly jokes, readers will pore over each picture again and again. Perfect for reading aloud!

Endurance Rick Broadbent,2016-04-21 Shortlisted for the William Hill Sports Book of the Year A runner must run with dreams in his heart. Emil Zatopek. In the summer of 1952 Emil Zatopek became the king of the running world with an unprecedented distance treble at the Olympic Games in Helsinki. Together with his wife Dana, who won another gold medal in the javelin, they were the embodiment of sporting romance. Born on the same day, they were champions on the same day too. Yet in 1968 this affable but eccentric Czech solider was betrayed by his Communist paymasters and cast out into wilderness. Hidden from world view, monitored by the secret police and forced to live in a caravan in mining country, he became the invisible hero. 'Endurance' is the first biography to document the remarkable rise, fall and rehabilitation of a man voted the 'greatest runner of all time' by 'Runner's World' in 2013. It is also the story of a golden age of sport played out against a backdrop of Cold War politics and paranoia. From the London Olympics of 1948 to Czech concentration camps, this is an uplifting and harrowing story of survival. As Emil rises to global fame, his old coach is locked up and tortured by StB henchmen. Their diverging paths expose the fickleness of popularity and eventually cross again when Zatopek's world is torn asunder. All both men can do is endure. The running world of this era is brought to life by dramatic accounts of Zatopek's great triumphs, manifold records and a rich collection of characters vying to dethrone him. In Britain the sharp-tongued Gordon Pirie falls foul of the media as he becomes obsessed with Zatopek and adopts increasingly-masochistic methods; mild-mannered marathon champion Jim Peters begins a quest that would make "women weep and grown men lose their lunch". In France Alain Mimoun crawls from the bloody carnage of his war-time exploits to overcome racial snubs and become known as Zatopek's Shadow; and in the Soviet Union, the tragic figure of Vladimir Kuts is moulded into a brutal running machine at huge cost. Only Zatopek manages to bridge this East-West divide as a savage power struggle is fought in both the Olympic arena and in the corridors of power. Due to extensive access to those involved, including Dana herself, award-winning Times author Rick Broadbent has written a vivid history involving blood and guns and a love that sustained the cruellest twists of fate. From heady nights at White City to the brave resistance during the Prague Spring, this is a book that plants the son of a carpenter at the very centre of a revolution. Whether talking to his rivals on the track or Red Army troops as tanks roll into Prague, Zatopek's humanity shines through and carries all. With traces of 'Chariots of Fire' and Laura Hillenbrand's 'Unbroken', Endurance is both a wonderful love story and a landmark tale of hope and strength in the face of crushing opposition. It's at the borders of pain and suffering that the men are separated from the boys. Emil Zatopek
