52 Random Weekend Projects Grant Thompson, "The King of Random",2020-03-10 From one of the most popular project channels on YouTube comes a how-to book on building things that go boom. Grant Thompson, The King of Random, has created one of the most popular project channels on YouTube, featuring awesome videos such as How to Make a Laser Assisted Blowgun and Assassin's Micro Crossbow. He currently has almost 10 million subscribers, posts 5 times a week, and averages over 40 million views a month. Partnering with Grant is Ted Slampyak, the artist behind the #1 New York Times bestseller 100 Deadly Skills. 52 Random Weekend Projects: For Budding Inventors and Backyard Builders is a guide that enables ordinary folks to build an impressive arsenal of projects. These crafts combine some of Grant's most popular projects—Matchbox Rockets, Pocket Slingshot Super Shooters, Proto-Putty, Ninja Balls, Mini Matchstick Guns, The Clothespin Pocket Pistol—with many new ones, providing clear instructions on how to build them step-by-step. Broken down into Beginner, Intermediate, and Advanced sections, 52 Random Weekend Projects is loaded with truly amazing projects, including: - Mousetrap Handgun - Mini Solar Scorcher - Air Vortex Canon - Air Mounted Skewer Shooter - Paracord Bullwhip - Bottle Cap Party Whistle - Ninja Stress Balls - Tablecloth Parachute - Skyblaster Slingshot And many more!

Wild Symphony Dan Brown,2023-09-19 #1 New York Times bestselling author Dan Brown makes his picture book debut with this mindful, humorous, musical, and uniquely entertaining book! The author will be donating all US royalties due to him to support music education for children worldwide, through the New Hampshire Charitable foundation. Travel through the trees and across the seas with Maestro Mouse and his musical friends! Young readers will meet a big blue whale and speedy cheetahs, tiny beetles and graceful swans. Each has a special secret to share. Along the way, you might spot the surprises Maestro Mouse has left for you- a hiding buzzy bee, jumbled letters that spell out clues, and even a coded message to solve! Children and adults can enjoy this timeless picture book as a traditional read-along, or can choose to listen to original musical compositions as they read--one for each animal--with a free interactive smartphone app, which uses augmented reality to play the appropriate song for each page when a phone's camera is held over it.

Intelligent Multimedia Analysis for Security Applications Husrev T. Sencar,Sergio Velastin,Nikolaos Nikolaidis,Shiguo Lian,2010-04-22 This is one of the very few books focused on analysis of multimedia data and newly emerging multimedia applications with an emphasis on security. The main objective of this project was to assemble as much research coverage as possible related to the field by defining the latest innovative technologies and providing the most comprehensive list of research references. The book includes sixteen chapters highlighting current concepts, issues and emerging technologies. Distinguished scholars from many prominent research institutions around the world contribute to the book. The book covers various aspects, including not only some fundamental knowledge and the latest key techniques, but also typical applications and open issues. Topics covered include dangerous or abnormal event detection, interaction recognition, person identification based on multiple traits, audiovisual biometric person authentication and liveness verification, emerging biometric technologies, sensitive information filtering for teleradiology, detection of nakedness in images, audio forensics, steganalysis, media content tracking authentication and illegal distributor identification through watermarking and content-based copy detection. We believe that the comprehensive coverage of diverse disciplines in the field of intelligent multimedia analysis for security applications will contribute to a better understanding of all topics, research, and discoveries in this emerging and evolving field and that the included contributions will be instrumental in the expansion of the corresponding body of knowledge, making this book a reference source of information. It is our sincere hope that this publication and its great amount of information and research will assist our research colleagues, faculty members and students, and organization decision makers in enhancing their understanding for the concepts, issues, problems, trends, challenges and opportunities related to this research field. Perhaps this book will even inspire its readers to contribute to the current discoveries in this immense field.

Candid Creatures Roland Kays,2016-05 A riveting collection of photographs that captures wild animals in their native habitats. In *Candid Creatures*, the first major book to reveal the secret lives of animals through motion-sensitive game cameras, biologist Roland Kays has assembled over 600 remarkable photographs. Drawing from archives of millions of color and night-vision photographs collected by hundreds of researchers, Kays has selected images that show the unique perspectives of wildlife from throughout the world. Using these photos, he tells the stories of scientific discoveries that camera traps have enabled, such as living proof of species thought to have been extinct and details of predator-prey interactions. Each image captures a moment frozen in the camera's flash as animals move through their wild habitats. Kays also discusses how scientists use camera traps to address conservation issues, creating solutions that allow humans and wild animals to coexist. More than just a collection of amazing animal pictures, the book's text, maps, and illustrations work together to describe the latest findings in the fast-moving field of wildlife research. *Candid Creatures* is a testament to how the explosion of game cameras around the world has revolutionized the study of animal ecology. The powerful combination of pictures and stories of discovery will fascinate anyone interested in science, nature, wildlife biology, or photography.

2018 3rd International Conference on Communication and Electronics Systems (ICCES) IEEE Staff,2018-10-15 ICCES provides quality key experts who provide an opportunity in bringing up innovative ideas Recent updates in the in the field of technology will be a platform for the upcoming researchers The conference will be Complete, Concise, Clear and Cohesive in terms of research related to Communication and Electronics systems

Time-of-Flight Cameras Miles Hansard,Seungkyu Lee,Ouk Choi,Radu Patrice Horaud,2012-11-06 Time-of-flight (TOF) cameras provide a depth value at each pixel, from which the 3D structure of the scene can be estimated. This new type of active sensor makes it possible to go beyond traditional 2D image processing, directly to depth-based and 3D scene processing. Many computer vision and graphics applications can benefit from TOF data, including 3D reconstruction, activity and gesture recognition, motion capture and face detection. It is already possible to use multiple TOF cameras, in order to increase the scene coverage, and to combine the depth data with images from several colour cameras. Mixed TOF and colour systems can be used for computational photography, including full 3D scene modelling, as well as for illumination and depth-of-field manipulations. This work is a technical introduction to TOF sensors, from architectural and design issues, to selected image processing and computer vision methods.

Blender For Dummies Jason van Gumster,2011-04-04 The exciting new book on the exciting new Blender 2.5! If you want to design 3D animation, here's your chance to jump in with both feet, free software, and a friendly guide at your side! Infrared Thermography Raghu Prakash,2012-03-14 Infrared Thermography (IRT) is commonly as a NDE tool to identify damages and provide remedial action. The fields of application are vast, such as, materials science, life sciences and applied engineering. This book offers a collection of ten chapters with three major sections - relating to application of infrared thermography to study problems in materials science, agriculture, veterinary and sports fields as well as in engineering applications. Both mathematical modeling and experimental aspects of IRT are evenly discussed in this book. It is our sincere hope that the book meets the requirements of researchers in the domain and inspires more researchers to study IRT.

The Gaslight Effect Dr. Robin Stern,2018-01-09 In this groundbreaking guide, the prominent therapist Dr. Robin Stern shows how the Gaslight Effect works, how you can decide which relationships can be saved and which you have to walk away from—and how to gasproof your life so you'll avoid gaslighting relationship. Your husband crosses the line in his flirtations with another woman at a dinner party. When you confront him, he asks you to stop being insecure and controlling. After a long argument, you apologize for giving him a hard time. Your mother belittles your clothes, your job, and

your boyfriend. But instead of fighting back, you wonder if your mother is right and figure that a mature person should be able to take a little criticism. If you think things like this can't happen to you, think again. Gaslighting is an insidious form of emotional abuse and manipulation that is difficult to recognize and even harder to break free from. Are you being gaslighted? Check for these telltale signs: 1) Does your opinion of yourself change according to approval or disapproval from your spouse? 2) When your boss praises you, do you feel as if you could conquer the world? 3) Do you dread having small things go wrong at home—buying the wrong brand of toothpaste, not having dinner ready on time, a mistaken appointment written on the calendar? 4) Do you have trouble making simple decisions and constantly second guess yourself? 5) Do you frequently make excuses for your partner's behavior to your family and friends? 6) Do you feel hopeless and joyless?

Arduino: Building LED and Espionage Projects Adith Jagdish Bloor, Samarth Shah, Utsav Shah, Marco Schwartz, 2016-09-30 Find out how to transform your Arduino device into an awesome secret agent gadget with this course, taking in everything from robotics to remote control cameras About This Book This course won't just teach you. It will help you apply your knowledge so you can get creative – quickly! Find out how to make a computer interact with the real-world – you'll be learning the basics of IoT without realizing it. Robots. A sound controlled Christmas tree. This course proves anything is possible with an Arduino! Who This Book Is For Seeking inspiration? This course will help you get creative with your Arduino quickly. What You Will Learn Find out how to explore the full potential of your tiny Arduino Find out how to bridge the gap between the real world and software, as you gather and visualize data from the environment Create simple servers to allow communication to occur Transform your Arduino into a GPS tracker Use the Arduino to monitor top secret data Build a complete spy robot! In Detail An Arduino might be a tiny computer but it can be used as the foundation for a huge range of projects. In this course, we'll show you how just some of the projects that are possible with an Arduino. From robotics to secret agent gadgets, we're pretty confident that this course will get you thinking creatively – and inspire you to create your very own new projects using the Arduino hacking skills you learn. This course, combines both text and video content – it's made up of three modules to help organize your learning. In the first module we'll show you how to build three different Arduino projects. All of these will not only get you up and running with something practical, they'll also help you better understand how the Arduino works. Find out how to develop a home automation system and even build a robot! In the second module we'll go one step further to help you get creative as you learn how to program LEDs with your Arduino. You'll find out how to build a mood lamp and a remote-controlled TV backlight, before going on to make a sound controlled LED Christmas tree that makes use of sound visualization. Finally, the third module takes you from stylish design into espionage, as you learn how to create neat secret agent gadgets with your Arduino. Find out how to build an alarm system, a fingerprint sensor, even open a lock with a text message. And that's not all – but to find out more you'll have to dive in! This Learning Path combines some of the best that Packt has to offer in one complete, curated package. It includes content from the following Packt products: Arduino By Example by Adith Jagdish Bloor Arduino BLINK Blueprints by Samarth Shah, Utsav Shah Arduino for Secret Agents by Marco Shwartz Style and approach Combining both video and text and built from some of Packt's very best Arduino content, this course comprises of three modules covering a range of projects. It's completely focused on helping the user get creative as quickly as possible so they can explore what's possible with Arduino themselves.

Technical Surveillance Countermeasures Michael Chandler, 2019-02-18 This book derives from a bug sweeping course for which people still travel from across the globe to attend and now, accompanies an online training programme. Mainly concentrating on the scientific theory and practical application of technical surveillance countermeasures, this guide can be used as a good learning tool and long term reference book.

Charlie One Seán Hartnett, 2016-09-16 Seán Hartnett grew up in Cork in the 1970s where he observed the worst of the northern Troubles with fascination. Despite his family's strong republican ties and his own attempt to join the IRA, Hartnett shocked family and friends when he changed allegiance and joined the British Armed Forces. In 2001 Hartnett returns to his native Ireland, but this time as a member of the British Army's most secretive covert counter-terrorist unit in Northern Ireland, Joint Communications Unit Northern Ireland aka JCU-NI, the FRU, 14 Intelligence Company, or simply The Det . For the next three years Hartnett is directly involved in some of the highest profile events of that period, from the arrest of John Hannan for the bombing of the BBC in London, to the tragic murder of David Caldwell; the prevention of the murder of Johnny 'Mad Dog' Adair and some of the biggest blunders by British Intelligence in the history of the Troubles, including the true story behind the murders of Corporals Howes and Wood at an IRA funeral in 1988. Charlie One , the call sign for the most wanted targets of British Intelligence operations in NI, documents the journey of an Irish Republican serving in Britain's most secretive counter-terrorism unit. Filled with roller coaster emotions and explosive revelations of British Intelligence covert capabilities and operations, Charlie One provides a truly unique, detailed and unbiased account of the secret war fought on the streets of Northern Ireland.

Proceeding of Fifth International Conference on Microelectronics, Computing and Communication Systems Vijay Nath, J. K. Mandal, 2021-09-09 This book presents high-quality papers from the Fifth International Conference on Microelectronics, Computing & Communication Systems (MCCS 2020). It discusses the latest technological trends and advances in MEMS and nanoelectronics, wireless communication, optical communication, instrumentation, signal processing, image processing, bioengineering, green energy, hybrid vehicles, environmental science, weather forecasting, cloud computing, renewable energy, RFID, CMOS sensors, actuators, transducers, telemetry systems, embedded systems and sensor network applications. It includes papers based on original theoretical, practical and experimental simulations, development, applications, measurements and testing. The applications and solutions discussed here provide excellent reference material for future product development.

A Model Summer Paulina Porizkova, 2007-04-10 An incisive, beautifully written first novel by a former supermodel that explores the glamorous and gritty world she inhabited Only a handful of women in the world have experienced what Paulina Porizkova has--being whisked away to model in Paris while still a teenager, reaching the pinnacle of the profession before her schoolmates had even graduated--and fewer still have the insight to capture it on paper. In her first novel, Paulina tells the story of Jirina. A tall, scrawny fifteen-year-old girl from Sweden, she's much more accustomed to taunts and disdain than admiration and affection, whether from her classmates or her own family. That all changes when her only friend, Hatty, asks to practice her makeup and photography skills on Jirina. Almost before she knows it Jirina is on a plane to Paris, where she will spend the summer in a milieu entirely alien to her. Living at the home of her modeling agency's owner and constantly subjected to blunt physical assessments, catty and often cruel fellow models, and womanizing photographers--and, miraculously enough, while sometimes feeling truly beautiful--Jirina embarks on a journey beyond her wildest imaginings. Between photo shoots in Italy and Morocco and parties with models and musicians, Jirina manages to make a few friends, fall in love, and, eventually, feel the very adult pain of betrayal and heartbreak. Told with the grace, simplicity, and accuracy that can only come from real-life experience, A Model Summer is both the debut of a notably talented novelist and an unusually well-informed look behind the scenes at a world many people fantasize about, but few really know.

Who's Watching You? John Gibb,Mack Farren,2007-05-01 The threat of terrorism and the corresponding climate of fear encouraged by the government have together eroded our freedom to live our lives in peace and quiet away from the prying eyes of hidden cameras. The government is tightening its grip on us by watching and recording what we do. They are doing this because they know they can and because knowledge is power. But exactly who are "they" and why do they want to know so much about us? This book includes chilling, accurate, and up-to-date descriptions of the methods the government (and private company proxies) use to watch us.

Fake Photos Hany Farid,2019-09-10 A concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Stalin, Mao, Hitler, Mussolini, and other dictators routinely doctored photographs so that the images aligned with their messages. They erased people who were there, added people who were not, and manipulated backgrounds. They knew if they changed the visual record, they could change history. Once, altering images required hours in the darkroom; today, it can be done with a keyboard and mouse. Because photographs are so easily faked, fake photos are everywhere—supermarket tabloids, fashion magazines, political ads, and social media. How can we tell if an image is real or false? In this volume in the MIT Press Essential Knowledge series, Hany Farid offers a concise and accessible guide to techniques for detecting doctored and fake images in photographs and digital media. Farid, an expert in photo forensics, has spent two decades developing techniques for authenticating digital images. These techniques model the entire image-creation process in order to find the digital disruption introduced by manipulation of the image. Each section of the book describes a different technique for analyzing an image, beginning with those requiring minimal technical expertise and advancing to those at intermediate and higher levels. There are techniques for, among other things, reverse image searches, metadata analysis, finding image imperfections introduced by JPEG compression, image cloning, tracing pixel patterns, and detecting images that are computer generated. In each section, Farid describes the techniques, explains when they should be applied, and offers examples of image analysis.
