Corporate Responsibility Coalitions David Grayson, Jane Nelson, 2013-03-27 It is estimated that there are more than 110 national and international business-led corporate responsibility coalitions. Given the growing reach and significance of these alliances, there is now a critical need for an informed and balanced analysis of their achievements, their progress, and their potential. In *Corporate Responsibility Coalitions*, the first book to chronicle the subject, David Grayson and Jane Nelson explore the past, present, and future of these coalitions. They consider the emergence of new models of collective corporate action over the past four decades; the increasing number of these coalitions, their diversity and complexity; and how they network with each other and a broader set of institutions that promote sustainable capitalism. Drawing on their global study, the authors light the way for the future development of these influential alliances. In addition, they provide in-depth profiles of the most strategic, effective, and long-standing coalitions.

Jade Legacy Fonda Lee, 2021-11-30 WINNER OF THE LOCUS AWARD FOR BEST FANTASY NOVEL, 2022 Lee's series will stand as a pillar of epic fantasy and family drama. —Library Journal (starred review) The Kaul siblings battle rival clans for honor and control over an East Asia-inspired fantasy metropolis in *Jade Legacy*, the page-turning conclusion to the *Green Bone Saga*. Jade, the mysterious and magical substance once exclusive to the Green Bone warriors of Kekon, is now coveted throughout the world. Everyone wants access to the supernatural abilities it provides. As the struggle over the control of jade grows ever larger and more deadly, the Kaul family, and the ancient ways of the Kekonese Green Bones, will never be the same. Battered by war and tragedy, the Kauls are plagued by resentments and old wounds as their adversaries are on the ascent and their country is riven by dangerous factions and foreign interference. The clan must discern allies from enemies, set aside bloody rivalries, and make terrible

sacrifices . . . but even the unbreakable bonds of blood and loyalty may not be enough to ensure the survival of the Green Bone clans and the nation they are sworn to protect. Praise for the Green Bone Saga: Jade City has it all: a beautifully realized setting, a great cast of characters, and dramatic action scenes. What a fun, gripping read! —Ann Leckie An instantly absorbing tale of blood, honor, family, and magic, spiced with unexpectedly tender character beats.—NPR The Green Bone Saga Jade City Jade War Jade Legacy

Jade City Fonda Lee, 2017-11-07 In this World Fantasy Award-winning novel of magic and kungfu, four siblings battle rival clans for honor and power in an Asia-inspired fantasy metropolis.

*Named one of TIME's Top 100 Fantasy Books Of All Time * World Fantasy Award for Best Novel, winner Jade is the lifeblood of the island of Kekon. It has been mined, traded, stolen, and killed for -- and for centuries, honorable Green Bone warriors like the Kaul family have used it to enhance their magical abilities and defend the island from foreign invasion. Now, the war is over and a new generation of Kauls vies for control of Kekon's bustling capital city. They care about nothing but protecting their own, cornering the jade market, and defending the districts under their protection. Ancient tradition has little place in this rapidly changing nation. When a powerful new drug emerges that lets anyone -- even foreigners -- wield jade, the simmering tension between the Kauls and the rival Ayt family erupts into open violence. The outcome of this clan war will determine the fate of all Green Bones -- and of Kekon itself. Praise for Jade City: An epic drama reminiscent of the best classic Hong Kong gangster films but set in a fantasy metropolis so gritty and well-imagined that you'll forget you're reading a book. --Ken Liu, Hugo, Nebula, and World Fantasy Award-winning author A beautifully realized setting, a great cast of characters, and dramatic action scenes. Terrorism TV Stacy Takacs, 2012-04-30 The Fox-TV series 24 might have been in production long before its premier just two months after 9/11, but its storyline—and that of many other television programs—has since become inextricably embedded in the nation's popular consciousness. This book marks the first comprehensive survey and analysis of War on Terror themes in post-9/11 American television, critiquing those shows that—either blindly or intentionally—supported the Bush administration's security policies. Stacy Takacs focuses on the role of entertainment programming in building a national consensus favoring a War on Terror, taking a close look at programs that comment both directly and allegorically on the post-9/11 world. In show after show, she chillingly illustrates how popular television helped organize public feelings of loss, fear, empathy, and self-love into narratives supportive of a controversial and unprecedented war. Takacs examines a spectrum of program genres—talk shows, reality programs, sitcoms, police procedurals, male melodramas, war narratives—to uncover the recurrent cultural themes that helped convince Americans to invade Afghanistan and Iraq and compromise their own civil liberties. Spanning the past decade of the ongoing conflict, she reviews not only key touchstones of post-9/11 popular culture such as 24, Rescue Me, and Sleeper Cell, but also less remarked-upon but relevant series like JAG, Off to War, Six Feet Under, and Jericho. She also considers voices of dissent that have emerged through satirical offerings like The Daily Show and science fiction series such as Lost and Battlestar Galactica. Takacs dissects how the War on Terror has been broadcast into our living rooms in programs that routinely offer simplistic answers to important questions—Who exactly are we fighting? Why do they hate us?—and she examines the climate of fear and paranoia they've created. Unlike cultural analyses that view the government's

courting of Hollywood as a conspiracy to manipulate the masses, her book considers how economic and industry considerations complicate state-media relations throughout the era. *Terrorism TV* offers fresh insight into how American television directly and indirectly reinforced the Bush administration's security agenda and argues for the continued importance of the medium as a tool of collective identity formation. It is an essential guide to the televisual landscape of American consciousness in the first decade of the twenty-first century.

Who Are You, Really? Brian R. Little, 2017-08-15

Traditionally, scientists have emphasized what they call the first and second natures of personality--genes and culture, respectively. But today the field of personality science has moved well beyond the nature vs. nurture debate. In *Who Are You, Really?* Dr. Brian Little presents a distinctive view of how personality shapes our lives--and why this matters. Little makes the case for a third nature to the human condition--the pursuit of personal projects, idealistic dreams, and creative ventures that shape both people's lives and their personalities. Little uncovers what personality science has been discovering about the role of personal projects, revealing how this new concept can help people better understand themselves and shape their lives--Provided by publisher.

The Third Industrial Revolution Jeremy Rifkin, 2011-10-04 The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful Third Industrial Revolution. He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an energy internet, just like we now create and share information online. Rifkin describes how the five-pillars of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.

Beyond Kekon's borders, war is brewing. Powerful foreign governments and mercenary criminal kingpins alike turn their eyes on the island nation. Jade, Kekon's most prized resource, could make them rich - or give them the edge they'd need to topple their rivals. Faced with threats on all sides, the Kaul family is forced to form new and dangerous alliances, confront enemies in the darkest streets and the tallest office towers, and put honor aside in order to do whatever it takes to ensure their own survival - and that of all the Green Bones of Kekon. *Jade War* is the second book of the Green Bone Saga, an epic trilogy about family, honour and those who live and die by the ancient laws of blood and jade.

Faith-Based Organizations in Development Discourses and Practice Jens Koehrsen, Andreas Heuser, 2019-11-28 Exploring faith-based organizations (FBOs) in current developmental

discourses and practice, this book presents a selection of empirical in-depth case-studies of Christian FBOs and assesses the vital role credited to FBOs in current discourses on development. Examining the engagement of FBOs with contemporary politics of development, the contributions stress the agency of FBOs in diverse contexts of development policy, both local and global. It is emphasised that FBOs constitute boundary agents and developmental entrepreneurs: they move between different discursive fields such as national and international development discourses, theological discourses, and their specific religious constituencies. By combining influxes from these different contexts, FBOs generate unique perspectives on development: they express alternative views on development and stress particular approaches anchored in their theological social ethics. This book should be of interest to those researching FBOs and their interaction with international organizations, and to scholars working in the broader areas of religion and politics and politics and development.

Brian Eno's Another Green World Geeta Dayal, 2009-11-01 The serene, delicate songs on Another Green World sound practically meditative, but the album itself was an experiment fueled by adrenaline, panic, and pure faith. It was the first Brian Eno album to be composed almost completely in the confines of a recording studio, over a scant few months in the summer of 1975.

The album was a proof of concept for Eno's budding ideas of the studio as musical instrument, and a signpost for a bold new way of thinking about music. In this book, Geeta Dayal unravels Another Green World's abundant mysteries, venturing into its dense thickets of sound. How was an album this cohesive and refined formed in such a seemingly ad hoc way? How were electronics and layers of synthetic treatments used to create an album so redolent of the natural world? How did a deck of cards figure into all of this? Here, through interviews and archival research, she unearths the strange story of how Another Green World formed the link to Eno's future -- foreshadowing his metamorphosis from unlikely glam rocker to sonic painter and producer.

February House Sherill Tippins, 2016-07-26 An "irresistible"

account of a little-known literary salon and creative commune in 1940s Brooklyn (The Washington Post Book World). A San Francisco Chronicle Best Book of the Year February House is the true story of an extraordinary experiment in communal living, one involving young but already iconic writers—and America’s best-known burlesque performer—in a house at 7 Middagh Street in Brooklyn. It was a fevered yearlong party, fueled by the appetites of youth and a shared sense of urgency to take action as artists in the months before the country entered World War II. In spite of the sheer intensity of life at 7 Middagh, the house was for its residents a creative crucible. Carson McCullers’s two masterpieces, *The Member of the Wedding* and *The Ballad of the Sad Cafe*, were born, bibulously, in Brooklyn. Gypsy Rose Lee, workmanlike by day, party girl by night, wrote her book *The G-String Murders* in her Middagh Street bedroom. W. H. Auden—who, along with Benjamin Britten, was being excoriated back in England for absenting himself from the war—presided over the house like a peevish auntie, collecting rent money and dispensing romantic advice. And yet all the while, he was composing some of the most important work of his career. Enlivened by primary sources and an unforgettable story, this tale of daily life at the most fertile and improbable live-in salon of the twentieth century comes from the acclaimed author of *Inside the Dream Palace: The Life and Times of New York’s Legendary Chelsea Hotel*. “Brimming with information . . . The personalities she depicts [are] indelibly drawn.” —Los Angeles Times Book Review “Magnificent . . . Not to mention funny and raunchy.” —The Seattle Times

A Farewell to Justice Joan Mellen, 2013-09-01 Working with thousands of previously unreleased documents and drawing on more than one thousand interviews, with many witnesses speaking out for the first time, Joan Mellen revisits the investigation of New Orleans district attorney Jim Garrison, the only public official to have indicted, in 1969, a suspect in President John F. Kennedy's murder. Garrison began by exposing the contradictions in the Warren Report, which concluded that Lee Harvey Oswald was an unstable pro-Castro Marxist who acted alone in killing Kennedy. *A Farewell to Justice* reveals that Oswald, no Marxist, was in fact working with both the FBI and the CIA, as well as with US Customs, and that the attempts to sabotage Garrison's investigation reached the highest levels of the US government. Garrison's suspects included CIA-sponsored soldiers of fortune enlisted in assassination attempts against Fidel Castro, an anti-Castro Cuban asset, and a young runner for the conspirators, interviewed here for the first time by the author. Building upon Garrison's effort, Mellen uncovers decisive new evidence and clearly establishes the intelligence agencies' roles in both a president's assassination and its cover-up. In this revised edition, to be published in time for the fiftieth anniversary of the president's assassination, the author reveals new sources and recently uncovered documents confirming in greater detail just how involved the CIA was in the

events of November 22, 1963. More than one hundred new pages add critical evidence and information into one of the most significant events in human history.

Thorium Robert Hargraves, 2012 Thorium energy can help check CO₂ and global warming, cut deadly air pollution, provide inexhaustible energy, and increase human prosperity. Our world is beset by global warming, pollution, resource conflicts, and energy poverty. Millions die from coal plant emissions. We war over mideast oil. Food supplies from sea and land are threatened. Developing nations' growth exacerbates the crises. Few nations will adopt carbon taxes or energy policies against their economic self-interests to reduce global CO₂ emissions. Energy cheaper than coal will dissuade all nations from burning coal. Innovative thorium energy uses economic persuasion to end the pollution, to provide energy and prosperity to developing nations, and to create energy security for all people for all time. This book presents a lucid explanation of the workings of thorium-based reactors. It is must reading for anyone interested in our energy future. Leon Cooper, Brown University physicist and 1972 Nobel laureate for superconductivity As our energy future is essential I can strongly recommend the book for everybody interested in this most significant topic.
