Security Policy in System-on-Chip Designs Sandip Ray, Abhishek Basak, Swarup Bhunia, 2018-10-09 This book offers readers comprehensive coverage of security policy specification using new policy languages, implementation of security policies in Systems-on-Chip (SoC) designs – current industrial practice, as well as emerging approaches to architecting SoC security policies and security policy verification. The authors focus on a promising security architecture for implementing security policies, which satisfies the goals of flexibility, verification, and upgradability from the ground up, including a plug-and-play hardware block in which all policy implementations are enclosed. Using this architecture, they discuss the ramifications of designing SoC security policies, including effects on non-functional properties (power/performance), debug, validation, and upgrade. The authors also describe a systematic approach for “hardware patching”, i.e., upgrading hardware implementations of security requirements safely, reliably, and securely in the field, meeting a critical need for diverse Internet of Things (IoT) devices. Provides comprehensive coverage of SoC security requirements, security policies, languages, and security architecture for current and emerging computing devices; Explodes myths and ambiguities in SoC security policy implementations, and provide a rigorous treatment of the subject; Demonstrates a rigorous, step-by-step approach to developing a diversity of SoC security policies; Introduces a rigorous, disciplined approach to “hardware patching”, i.e., secure technique for updating hardware functionality of computing devices in-field; Includes discussion of current and emerging approaches for security policy verification.

New Trends in Software Methodologies, Tools and Techniques Hamido Fujita, Mohamed Mejri, 2006 Software is the essential enabler for the new economy and science. It creates new markets and new directions for a more reliable, flexible, and robust society. It empowers the exploration of our world in ever more depth. However, software often falls short behind our expectations. Current software methodologies, tools and techniques remain expensive and not yet reliable for a highly changeable and evolutionary market. Many approaches have been proven only as case-by-case oriented methods. This book presents a number of new trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow's information society. This publication is an attempt to capture the essence of a new state-of-art in software science and its supporting technology. It also aims at identifying the challenges such a technology has to master.

Software Engineering and Algorithms Radek Silhavy, 2021-07-19 This book constitutes the refereed proceedings of the Software Engineering and Algorithms section of the 10th Computer Science On-line Conference 2021 (CSOC 2021), held on-line in April 2021. Software engineering research and its applications to intelligent algorithms take an essential role in computer science research. In this book, modern research methods, application of machine and statistical learning in the software engineering research are presented.

An Integrated Approach to Software Engineering Pankaj Jalote, 2006-01-31 Details the different activities of software development with a case-study approach whereby a project is developed through the course of the book The sequence of chapters is essentially the same as the sequence of activities performed during a typical software project.

Design and Manufacture for Sustainable Development (2003) Bernard Hon, 2004-01-16 The increasing demand for energy, raw materials and goods arising from world population growth, the emerging concept of sustainable development is concerned with meeting such challenges. The widely accepted Brundtland definition of sustainable development states that it is the ability to meet the needs of the present without compromising the ability of future generations to meet their own needs. The papers in this volume are from a conference organised by the University of Liverpool in September 2003 and are dedicated to the holistic study and interchange of ideas on the theory, technology, tools, methodology for the entire product life cycle within the framework of sustainable development. Design and Manufacture for Sustainable Development 2003 brings together industry leaders and the cutting edge of academic research in this critical area and includes, Life cycle
