Telepsychiatry and Health Technologies Peter

Yellowlees, Jay H. Shore, 2018-01-22 The only current book on the topic, Telepsychiatry and Health Technologies: A Guide for Mental Health Professionals is a practical, comprehensive, and evidence-based guide to patient-centered clinical care delivered in whole or

in part by technological devices and applications. Not a technology-centered health informatics book, but rather one that describes basic technological concerns and emphasizes clinical issues and workflows, it is designed for psychiatrists, psychologists, and other mental health clinicians who seek to learn the modes, models, and methods of telepsychiatry. More than 30 practitioners of telepsychiatry across the core mental health disciplines were involved in development of the text, contributing knowledge and clinical examples. Rich with case studies and hands-on guidance, the book introduces strategies, then clearly illustrates how to put them into practice. The editors believe that psychiatry increasingly will focus on the treatment of populations, and that technology offers the best hope of doing so efficiently and effectively. Careful thought went into the book's conception and design, resulting in a marriage of structure and content that meets the needs of today's clinicians: The editors employed a unique process of manuscript development, first outlining each chapter in its entirety, then assigning sections to contributors selected for their specific clinical experience and therapeutic expertise. The result is a text that flows logically and creates synergy across chapters without duplication. The book provides how-to guidance on setting up a new telepsychiatry practice or integrating technologies into a current practice, covering critically important topics such as data collection, security, and electronic health records. Technologies addressed include telephony, smartphones, apps, e-mail, secure texting, and videoconferencing, all of which are increasingly being used in the assessment and treatment of patients with psychiatric disorders. More than 30 case examples of patients or programs are included, illustrating the range of clinical techniques that can be used and the types of patient that can be treated using available technologies -- whether in person, online, or in a hybrid form of care combining both modalities. Every chapter concludes with a summary of major learning objectives or findings covered. Telepsychiatry and Health

Technologies: A Guide for Mental Health Professionals is destined to become a core resource in the training of mental health professionals from all disciplines, as well as an indispensable reference for those already integrating new technologies into their practices.

The Medical Library Association Guide to Providing Consumer and Patient Health Information Michele

Spatz, 2014-05-01 Comprised of fifteen chapters written by experienced consumer health librarians, The Medical Library Association Guide to Providing Consumer and Patient Health Information is designed for library and information science graduate students as well as librarians new to health and medical librarianship, regardless of library setting. It is comprehensive in scope, covering all aspects of consumer and patient health and medical information from their humble, grassroots beginnings to the ever-evolving applications of new technology and social media. In between, the mundane aspects of health and medical librarianship, such as needs assessment, costs, budgeting and funding, and staffing are discussed. Adding richness to this discussion are the coverage of more sensitive topics such as patient-friendly technology, ethical issues in providing consumer and patient health information, meeting the needs of diverse populations, and responding to individuals from various cultural backgrounds. No comprehensive picture of consumer and patient health librarianship would be complete without addressing the critical importance of marketing and strategic partnerships; such discussions round out this invaluable guide.. Patients today must be knowledgeable enough to participate in their health and well-being. Shorter hospital stays, changing reimbursement patterns and the gradual shift towards focusing on proactively maintaining health and managing disease require patients to be informed and actively engaged. Education, information and understanding are important components of actively-engaged patients. Correspondingly, in today's e-world, there is a glut of information

resources available through the Internet – from YouTube videos to Googling to blogs and Twitter feeds. What is lacking in these information-rich times is the relevance of meaning and context for those who ask, “Does this health and medical information apply to me and my unique clinical picture?” or “How do I use this information?” As knowledge navigators, information technology wizards and content experts, librarians offer focused responses to individuals’ specific and highly personal health and medical information queries. In a new healthcare world order of optimizing health and minimizing hospitalizations, such a service is invaluable. Sadly, there still exists in our highly networked and technological age an information gap for those who struggle in obtaining meaningful health or medical information. These individuals may be foreign-born, non-English speaking, poor, rural, aged or semi-literate. Whatever their status, librarians must have the wherewith-all to find germane resources and also help create responsive mechanisms to bridge that health information gap for vulnerable citizens. The Medical Library Association Guide to Providing Consumer and Patient Health Information will guide you on the road to providing that response.

The Old Timer Says Jerry Apps, 2020-10-19 Everyone has a story to tell. In *The Old Timer Says*, author and longtime writing teacher Jerry Apps provides writers and non-writers alike space and inspiration to capture their own stories. Jerry introduces *The Old Timer Says* by emphasizing the benefits of journaling and sharing his lifelong habit of keeping a journal. He advises that a journal or diary is a personal thing and there is no right way to keep one. You might dash off only a few words or write long, flowing pages of text. Your entries could consist of notes on the weather, recipes you'd like to cook, career or travel goals, favorite

song lyrics, notes from your dreams, or short stories starring your own made-up characters. You might include sketches or photographs or other visual tidbits. It doesn't matter how much you write or what you write, only that you write, Jerry says. On the journal's lined pages, Jerry includes a collection of his favorite Old Timer sayings--some funny, some thought-provoking, and all inspired by the one-liners, bits of philosophy, and advice he heard from farmers he knew growing up. They serve as gentle writing prompts while reminding folks that our personal histories are worth recording.

Unifying the Applications and Foundations of Biomedical and Health Informatics J. Mantas,A. Hasman,G. Gallos,2016-07-21 Informatics and technology have become an intrinsic part of healthcare management in recent years; it is almost impossible to imagine a modern healthcare system without them. This book presents the proceedings of the 14th annual International Conference on Informatics, Management and Technology in Healthcare (ICIMTH), held in Athens, Greece, in July 2016. The conference treats the field of biomedical informatics in a very broad framework, and the 68 full papers included here examine the research and applications outcomes of informatics from cell to population, including a number of technologies such as imaging, sensors, mobile communications, biomedical equipment and management, as well as legal and societal issues related to the application of health informatics. The book is divided into sections: Biomedical Technology; Clinical Informatics; E-learning and Education; Formalisation of Knowledge, Ontologies, Clinical Guidelines and Standards of Healthcare; Health Informatics; Healthcare Management and Public Health; mHealth and Telemedicine; and Social Media and Health. Also included are two keynote speeches. Covering a wide spectrum of applications, the book will be of interest to all those working in the design, management and delivery of healthcare services whose work involves the development or use of biomedical informatics.

Facebook Society Roberto Simanowski, 2018-07-17 Facebook claims that it is building a “global community.” Whether this sounds utopian, dystopian, or simply self-promotional, there is no denying that social-media platforms have altered social interaction, political life, and outlooks on the world, even for people who do not regularly use them. In this book, Roberto Simanowski takes Facebook as a starting point to investigate our social-media society—and its insidious consequences for our concept of the self. Simanowski contends that while they are often denounced as outlets for narcissism and self-branding, social networks and the practices they cultivate in fact remake the self in their image. Sharing is the outsourcing of one’s experiences, encouraging unreflective self-narration rather than conscious self-determination. Instead of experiencing the present, we are stuck ceaselessly documenting and archiving it. We let our lives become episodic autobiographies whose real author is the algorithm lurking behind the interface. As we go about accumulating more material for the platform to arrange for us, our sense of self becomes diminished—and Facebook shapes a subject who no longer minds. Social-media companies’ relentless pursuit of personal data for advertising purposes presents users with increasingly targeted, customized information, attenuating cultural memory and fracturing collective identity. Presenting a creative, philosophically informed perspective that speaks candidly to a shared reality, *Facebook Society* asks us to come to terms with the networked world for our own sake and for all those with whom we share it.

App Use and Patient Empowerment in Diabetes Self-Management Nicola Brew-Sam, 2020-02-03 Patient empowerment is examined as a multi-dimensional factor influencing the use of diabetes self-management apps. The research design includes three studies conducted in Singapore. Study 1 examines how features of diabetes self-management apps correspond with theoretical indicators of empowerment, as well as app quality.

Study 2 uses semi-structured face-to-face interviews with diabetes patients to draw first conclusions about the relevance of empowerment for diabetes app use. Study 3 includes an online patient survey, and uses cluster analytical methods to test the preliminary Study 2 results (typology of app use), as well as binary logistic regression to compare the strength of influence of various antecedent factors on the likelihood of diabetes app use. The studies show that especially the support by private social patient networks and the medical specialties of supervising physicians play a crucial role for technology-supported self-management.

From Victoria to Vladivostok Benjamin Isitt, 2010-05-01 This groundbreaking book brings to life a forgotten chapter in the history of Canada and Russia ♦ the journey of 4,200 Canadian soldiers from Victoria to Vladivostok in 1918 to help defeat Bolshevism. Combining military and labour history with the social history of BC, Quebec, and Russia, Benjamin Isitt examines how

the Siberian Expedition exacerbated tensions within Canadian society at a time when a radicalized working class, many French-Canadians, and even the soldiers themselves objected to a military adventure designed to counter the Russian Revolution. The result is a highly readable and provocative work that challenges public memory of the First World War while illuminating tensions ♦ both in Canada and worldwide ♦ that shaped the course of twentieth-century history.
