Translation and Bilingual Dictionaries Chan Sin-wai, 2013-02-06 Is the bilingual dictionary really the translator's best friend? Or is it the case that all translators hate all dictionaries? The truth probably lies half-way. It is difficult to verify anyway, as the literature on the subject(s) is limited, not helped by the fact that Lexicography and Translation have stood apart for decades despite their commonality of purpose. Here is a volume, based on the proceedings of a successful conference at Hong Kong, that may at last provide some answers.

The Spoken Language Translator Manny Rayner, 2000-08-28 This book describes the Spoken Language Translator (SLT), one of the first major projects in the area of automatic speech translation.

With a clear, easy-to-follow layout, the Dictionary provides a comprehensive and highly accessible survey of key terms and concepts (such as Abusive Translation, Equivalence, Informationsangebot, Minimax Principle, Texteme and Thick Translation), types of activity (Autotranslation, Dubbing, Signed Language Interpreting), and schools and approaches (Leipzig School, Manipulation School, Nitra School). Legal Translation and the Dictionary Marta Chromá, 2013-10-10 This study concentrates on three major issues creating a basis for the making of the Czech-English Law Dictionary with Explanations, namely language, including terminology, in both the Czech and Anglo-American systems of law; the process of legal translation; and the lexicographic method of producing a bilingual law dictionary. Terminology has been considered the most significant feature of language for legal purposes. It encompasses a wide range of special-purpose vocabulary and higher syntactic units, including legal jargon. Conceptual analysis is to be pursued whenever an identical term in the target language does not exist or its full equivalent is in doubt. Legal translation should be based primarily on comparative legal, linguistic and genre analysis in order to make the transfer of legal information as precise, accurate and comprehensible as possible. The primary objective of legal translation is for the target recipient to be provided as explicit, extensive and precise legal information in the target language as is contained in the source text, complemented (by the translator) with facts rendering the original information fully comprehensible in the different legal environment and culture. A dictionary which will help its users to produce legal texts in the target language should be founded upon a profound comparative legal and linguistic analysis that will (a) determine equivalents at the levels of vocabulary, syntax and genre, (b) select the appropriate lexicographic material to be included in the dictionary, and (c) create entries in a user-friendly manner.

Guide for Translating Husserl Dorion Cairns, 2012-12-06 This multilingual glossary is a guide for translating writings by Edmund Husserl into English. It has been compiled and improved in the course of about thirty years for my own guidance. Its initial purpose and the tests it has undergone in use have determined its contents. The translations I have made are far from being limited to those I have published or intend to publish. As I read and translate more, occasions will doubtless arise to include more expressions in the glossary and to improve the lists of English renderings I shall thenceforth use. The glossary is given the present title and submitted now for publication because numerous experts have said it would be useful not only to other translators of Husserl but also to his readers generally. For a translation of such writings as Husserl's the guidance offered by ordinary bilingual dictionaries is inadequate in opposite respects. On the one hand, there are easily translatable expressions for which numerous such dictionaries offer too many equivalent renderings. On the other hand, there are difficultly translatable expressions that any such dictionary either fails to translate at all or else translates by expressions none of which fit the sense. In following such dictionaries a translator must therefore practise consistency on the one hand and ingenuity on the other. Hence the need for a written glossary such as this one.

Using Dictionaries Beryl T. Sue Atkins, 1998 This volume draws together highly detailed studies of how dictionaries are used by different types of users, from school students to senior professors, working with a foreign language with the help of different types of dictionaries, from monolingual dictionaries for native speakers of the foreign language, through bilingual dictionaries, to monolingual dictionaries in the language of the user. The tasks being carried out include L2-L1 translation, L1-L2 translation, L2 comprehension, self-expression in L2, and various project-specific linguistic exercises. The authors have tried to include enough detail to allow readers to replicate the tests, and adapt them to serve their own interests.
