The SAGE Handbook of Intellectual Property
Matthew David,Debora Halbert,2014-11-18 This Handbook
brings together scholars from around the world in
addressing the global significance of, controversies over
and alternatives to intellectual property (IP) today. It brings
together over fifty of the leading authors in this field across
the spectrum of academic disciplines, from law, economics,
geography, sociology, politics and anthropology. This
volume addresses the full spectrum of IP issues including
copyright, patent, trademarks and trade secrets, as well as
parallel rights and novel applications. In addition to
addressing the role of IP in an increasingly information
based and globalized economy and culture, it also
challenges the utility and viability of IP today and addresses
a range of alternative futures.

Free Culture Lawrence Lessig,2015-11-13 How big
media uses technology and the law to lock down culture
and control creativity. Free Culture is an entertaining and
important look at the past and future of the cold war
between the media industry and new technologies. - Marc
Andreessen, cofounder of Netscape. Free Culture goes
beyond illuminating the catastrophe to our culture of

increasing regulation to show examples of how we can make a different future. These new-style heroes and examples are rooted in the traditions of the founding fathers in ways that seem obvious after reading this book. Recommended reading to those trying to unravel the shrill hype around 'intellectual property.' - Brewster Kahle, founder of the Internet Archive. The web site for the book is <http://free-culture.cc/>.

Doujin Work Hiroyuki,2009-02 Originally published in Japan in 2006 by Houbunsha, Tokyo-- Colophon.

Animation & Cartoons Nicolae Sfetcu,2014-05-07 An animated cartoon is a short, hand-drawn (or made with computers to look similar to something hand-drawn) moving picture for the cinema, TV or computer screen,

featuring some kind of story or plot. Animation is the optical illusion of motion created by the consecutive display of images of static elements. In film and video production, this refers to techniques by which each frame of a film or movie is produced individually. Computer animation is the art of creating moving images via the use of computers. It is a subfield of computer graphics and animation. Anime is a medium of animation originating in Japan, with distinctive character and background aesthetics that visually set it apart from other forms of animation. An animated cartoon is a short, hand-drawn (or made with computers to look similar to something hand-drawn) moving picture for the cinema, TV or computer screen, featuring some kind of story or plot (even if it is a very short one). Manga is the Japanese word for comics and print cartoons. Outside of Japan, it usually refers specifically to Japanese comics. Special effects (abbreviated SPFX or SFX) are used in the film, television, and entertainment industry to visualize scenes that cannot be achieved by normal means, such as space travel. Stop motion is a generic general term for an animation technique which makes static objects appear to move.

Digital Generations David Buckingham,Rebekah Willett,2013-10-18 Computer games, the Internet, and other

new communications media are often seen to pose threats and dangers to young people, but they also provide new opportunities for creativity and self-determination. As we start to look beyond the immediate hopes and fears that new technologies often provoke, there is a growing need for in-depth empirical research. *Digital Generations* presents a range of exciting and challenging new work on children, young people, and new digital media. The book is organized around four key themes: Play and Gaming, The Internet, Identities and Communities Online, and Learning and Education. The book brings together researchers from a range of academic disciplines – including media and cultural studies, anthropology, sociology, psychology and education – and will be of interest to a wide readership of researchers, students, practitioners in digital media, and educators.

Global Manga Casey Brienza, 2016-03-09 Outside Japan, the term 'manga' usually refers to comics originally published in Japan. Yet nowadays many publications labelled 'manga' are not translations of Japanese works but rather have been wholly conceived and created elsewhere. These comics, although often derided and dismissed as 'fake manga', represent an important but understudied global cultural phenomenon which, controversially, may even point to a future of 'Japanese' comics without Japan. This book takes seriously the political economy and cultural production of this so-called 'global manga' produced throughout the Americas, Europe, and Asia and explores the conditions under which it arises and flourishes; what counts as 'manga' and who gets to decide; the implications of global manga for contemporary economies of cultural and creative labour; the ways in which it is shaped by or mixes with local cultural forms and contexts; and, ultimately, what it means for manga to be 'authentically' Japanese in the first place. Presenting new empirical research on the

production of global manga culture from scholars across the humanities and social sciences, as well as first person pieces and historical overviews written by global manga artists and industry insiders, Global Manga will appeal to scholars of cultural and media studies, Japanese studies, and popular and visual culture.

Copyright and Fan Productivity in China Tianxiang He, 2017-10-13 This book takes a unique approach to mitigate the problem of massive online copyright infringement and justify fan activities. It argues for a cooperative approach that encourages copyright owners to exert a degree of control over their fan creators. In contrast to the current approach, which treats fan utilizations as theft, this book suggests that the copyright owners and the lawmakers should instead distinguish between fan creators and commercial pirates, allowing them unleash their potential. This book offers a clear and comprehensive account of the fascinating aspects of legal problems created by fan activities in China, Japan and the United States, offering a valuable guide for students, practitioners, academics and entrepreneurs whose work involves or who are interested in cutting-edge legal issues in the creative industry. Tianxiang He introduces us to the world of fandom inhabited by 'fan-subbers', fan-dubbers', 'mash-uppers', and 'fan-fictionists' against the backdrop of copyright law and policy in China. His work is engaging in that it not merely describes the law, but also the political dimension where copyright and state media control converge into a reality where being an artist or a fan is not that straightforward. -- Prof. Anselm Kamperman Sanders, Institute for Globalization and International Regulation (IGIR), Faculty of Law, Maastricht University The tension between copyright holders and fan communities has been increasingly salient yet underexplored. This timely,

insightful and deeply engaging book not only fills a niche, but also covers a country that has been rarely examined in this context. The book advances a promising model for the two groups to cooperate. It also explores complex issues concerning political culture, media regulation and civic engagement in China. A must read for anybody interested in copyright law, cultural production, digital technology or Chinese information policy. -- Prof. Peter K. Yu, Professor of Law and Director, Center for Law and Intellectual Property, Texas A&M University School of Law

Marketing the Arts Finola Kerrigan, 2010-04-27 In recent years, there have been significant shifts in arts marketing, both as a practice and an academic discipline. The relationship between art and the market is increasingly complex and dynamic, requiring a transformation in the way the arts are marketed. *Marketing the Arts* argues that arts marketing is not about the simple application of mainstream managerial marketing to the arts. With contributions from international scholars of marketing and consumer studies, this book engages directly with a range of contemporary themes, including: The importance of arts consumption and its social dimensions The importance of the aesthetic experience itself, and how to research it Arts policy development The art versus commerce debate The role of the arts marketer as market-maker The artist as brand or entrepreneur This exciting new book covers topics

as diverse as Damien Hirst's 'For the Love of God', Liverpool's brand makeover, Manga scanlation, Gob Squad, Surrealism, Bluegrass music, Miles Davis and Andy Warhol, and is sure to enthuse students and enlighten practitioners.

Media Power in Hong Kong Charles Chi-wai

Cheung, 2016-02-12 Studies of Hong Kong media primarily examine whether China will crush Hong Kong's media freedom. This book however traces the root problem of Hong Kong media back to the colonial era, demonstrating that before the resumption of Chinese sovereignty there already existed a uniquely Hong Kong brand of hyper-marketized and oligopolistic media system. The system, encouraged by the British colonial government, was subsequently aggravated by the Chinese government. This peculiar system is highly susceptible to state intervention and structurally disadvantaged dissent and marginal groups before and after 1997. The book stresses that this hyper-marketized media system has been constantly challenged. Through a historical study of media stigmatization of youth, this book proposes that over the years various counter forces have penetrated the structurally lopsided Hong Kong media: independent, public, popular and news media all make occasional subversive alliances to disrupt the mainstream, and news media, with a strong liberal professionalism, provide the most subversive space for challenging cultural hegemony. The book offers an alternative and fascinating account of the dynamics between hegemonic closure and day-to-day resistance in

Hong Kong media in both the colonial and post-colonial eras, arguing that the Hong Kong case generates important insights for understanding ideological struggles in capitalist media.
