1001 Ways to Drive Defensively Honesto Marcos, 2014-02-01 In spite of better-engineered vehicles and roads, traffic accidents are increasing. Why? Drivers are now better prepared and trained. Accidents are also mostly preventable if only drivers learn defensive driving and accident avoidance techniques. It teaches among other things, to be helpful, courteous, and defensive regardless of who is at fault but who has the last clear chance to avoid the accident. It's easy to learn and to execute. Without knowledge of defensive driving and accident avoidance techniques, that person is considered half a driver. We can't continue the carnage in the roads; it's expensive and can result in losing health and/or life. In this book, *1001 Ways to Drive Defensively*, for your safety and driving enjoyment, the ideas are sometimes repeated because driving is a repetition of the same maneuvers for any trip made. To help remember the procedures, it is presented in different ways. It is also not organized chronologically because when we are behind the wheel, things don't happen in logical order; the situations and circumstances do dictate. The author has a bachelor's degree in education. He has been a North American driver for almost fifty years, most of which were in Cold Alberta, Canada, where winter could last for six months. You guessed it—lots of traffic accidents. Thus, the knowledge of defensive driving was a must. In Alberta, he was a schoolteacher, operated a driving school, a driving instructor and driver examiner. Author urges safety-conscious individuals not to wait any longer; get a copy of *1001 Ways to Drive Defensively*. It makes driving enjoyable, less stressful, and most of all, you'll experience safety whenever you are behind the wheel. Don't forget you're protecting the most expensive thing that was created, and no amount of money can replace it. This book is suitable for all drivers. However, discretion is necessary; you might save one or two accidents in what is left of your driving days. We all have to pitch in and help make the roads safer. No government can do it alone. We must not forget that other drivers are our friends we haven't met. Why don't we help them and, in the process, help

ourselves too? In an accident, regardless of who is at fault, we'll still suffer the same consequences. It takes only a second or two to help versus days or months recuperating. Some drivers make this statement, "whatever I do, if other drivers make a mistake what can I do?" Drivers that have this kind of reasoning forget that to be safe, one does not only drive their vehicle, follow traffic rules, but help other driver if they make a mistake. Apply defensive driving technique if one notices a condition that can develop into vehicle conflict. This book will make a perfect gift for anybody, for any occasion and they will be grateful and remember you for life.

Driverthink Frank Miller,2009-06 Driverthink is not just another Go Slow Safe Driving guidebook. Within its pages are reality based driving tips, ideas and suggestions that can literally save your life For too long, the focus on safe driving has been to expound Politically Correct driving concepts that simply don't take into account the Reality of driving a vehicle at high speed on modern roads and highways. Otherwise responsible people don't suddenly shed their responsibility when they slip behind the wheel. But they don't often really think about their driving either. Thus the title Driverthink. In order to be responsible, safe drivers, we need to think about our driving. We need to know our machines, know our limitations, maximize our driving skills and gain driving experience as quickly as possible. Driverthink breaks new ground by exploring each of these areas in lively, entertaining detail. Drive Fast or Drive Slow - but Driverthink when you drive Driverthink is a collection of articles from the popular blog of the same name. Written in a lively and entertaining style, each of the articles explore specific driving situations or issues in detail, offering driving tips, ideas and suggestions on how to deal with the different situations. Driverthink is an excellent review for the seasoned driver and a must read for the newer, less experienced driver. Driverthink would suggest that Speed may kill, but unskilled driving can definitely kill. Does the average driver even know what over steer or under steer are? Do they know what kind of rear suspension they're driving on? Do they really understand how these most basic driving concepts will affect the handling of their vehicles - especially in an emergency situation? Driving on our roads and highways must be about reality. It is dealing with that reality that will keep us alive. Following standard issue, politically correct advice offered by those with limited skills and no appreciation for the realities of driving, simply doesn't create safer driving. Just Slow Down, might not be the best advice on a highway where even the slow lanes are doing limit plus ten. High speed rear end accidents can really ruin the day and excessively slow driving will most surely restrict traffic flow. Perhaps it's not the best advice after all Driverthink is a most serious effort by the author, to start really saving lives on our Highways and Byways.

It will help you to become a much safer Driverthink driver It may even save your life.
