Reggae and Hip Hop in Southern Italy Susanna Scarparo, Mathias Sutherland

Stevenson, 2018-10-10 This book explores the significance of reggae and hip hop in Southern Italy from the beginning of the 1980s to the present. Focusing on groups and solo artists located predominantly in the Southern Italian regions of Apulia and Sardinia, it examines the production and distribution of their music, lyrics and video clips. To this end, *Reggae and Hip Hop in Southern Italy* emphasizes the linguistic aspects of cultural marginalization as well as marginalities linked to

geographical location, gender, and to social and political identification. The authors put forward three key arguments, namely: that the Southern Italian transcultural and multilingual musical productions defy the cultural stereotype of the South; that the musicians discussed are creating new alliances and transcultural exchanges that engage critically with the challenges and opportunities offered by globalization; and that these musical productions represent one of Italy's most significant forms of creative political expression since the 1970s. *Reggae and Hip Hop in Southern Italy* brings to light the distinctive characteristics of Italy's independent and marginal musical contexts of reggae and reggae-inflected hip hop. It will serve as an invaluable resource for academics and students of Italian cultural studies, global studies, and the politics of non-hegemonic cultural production. It also provides an engaging reference for those with an interest in southern Italy, Apulia, Sardinia, the southern question and independent and popular music more generally.

Permaculture Design Teachers Notes Permaculture Design,

After Modernism Pelagia Goulimari, 2023-03-31 While celebrating the centenary of the “*annus mirabilis*” of modernism, we now encounter modernism after postmodernist, poststructuralist, postcolonial, critical race, feminist, queer and trans writing and theory. Out of the figures, narratives and concepts they have developed, a less universal, more global, decentred, context-specific, interconnected modernism emerges. In “after modernism” the meanings of “after” include periodisation, homage and critique. This book attends to neglected genealogies and intertexts—“high” and “low,” yet offering unacknowledged ontological, epistemological, conceptual and figurative resources. How have artists of the Global South negotiated the hierarchical division of art capital into

Western high art vs. Global-South culture? Modernity's location has been the Western metropolis, but other origin stories have been centring slavery, colonialism, the nation-state. If modernity did not originate once, why not multiple and still-to-come modernities? Instead of a universalizable Western modernity vs. local non-Western traditions, the contributors to this book discern multiple modern traditions. Rather than reifying their heterogeneity, the authors tunnel for lost transnational connections. The nation-state and the citizen have together defined Western modernity and the "civilized." Yet they have required the gender binary, gender and sexual normativity, assimilation, exclusion, forced migration, partition, segregation. In-between the public and the private, humans and the natural world, this book explores a multiple, relational modern subjectivity, collectivity and cosmic interconnectivity, whose space is indivisible, entangled, ever folding and unfolding. It was originally published as a special issue of the journal *Angelaki*.

The Golden Dawn of Awakening Colin Drake,2018-04-13 The main aim of this book is to act as a stand-alone guide to Awakening; which is synonymous with Enlightenment when maintained. The title comes from a photo I took of the dawning of a golden day which a friend suggested I use as for the cover. This book is composed of articles, resulting from my further investigations (and contemplations) into the nature of Reality. The thrust of the book is that beneath the surface appearance of thoughts (including all mental activity) and sensations there is a deeper level of being, which is the perceiver of these. The former are a flow of fleeting objects whereas the latter, which is the Awareness of these, is

a constant conscious subjective presence. This is the only constant that has been (with) you since you were born and that which has witnessed your entire life. So this is what you actually are rather than the ever changing body/mind in which these thoughts and sensations have occurred.

The New Advertising [2 volumes] Valerie K. Jones, Ruth E. Brown Ph.D., Ming Wang, 2016-09-19

The era of big data has revolutionized many industries—including advertising. This is a valuable resource that supplies current, authoritative, and inspiring information about—and examples of—current and forward-looking theories and practices in advertising. *The New Advertising: Branding, Content, and Consumer Relationships in the Data-Driven Social Media Era* supplies a breadth of information on the theories and practices of new advertising, from its origins nearly a quarter of a century ago, through its evolution, to current uses with an eye to the future. Unlike most other books that focus on one niche topic, this two-volume set investigates the overall discipline of advertising in the modern context. It sheds light on significant areas of change against the backdrop of digital data collection and use. The key topics of branding, content, interaction, engagement, big data, and measurement are addressed

from multiple perspectives. With contributions from experts in academia as well as the advertising and marketing industries, this unique set is an indispensable resource that is focused specifically on new approaches to and forms of advertising. Readers will gain an understanding of the distinct shifts that have taken place in advertising. They will be able to build their knowledge on frameworks for navigating and capitalizing on today's fragmented, consumer-focused, digital media landscape, and they will be prepared for what the future of advertising will likely bring.

The Ocean of Consciousness Colin Drake, 2019-05-20 The main aim of this book is to act as a stand-alone guide to Awakening; which is synonymous with Enlightenment when maintained. The thrust of the book is that beneath the surface appearance of thoughts (including all mental activity) and sensations there is a deeper level of being, which is the perceiver of these. Sharing Cities Shaping Cities Giuseppe Salvia, Eugenio Morello, Andrea Arcidiacono, 2019-05-28 The sharing economy and collaborative consumption are attracting a great deal of interest due to their business, legal and civic implications. The consequences of the spreading of practices of sharing in urban environments and under daily dynamics are underexplored. This Special Issue aims to address

if and how sharing shapes cities, the way that spaces are designed and lived in if social interactions are escalated, and the ways that habits and routines take place in post-individualistic society. In particular, the following key questions are of primary interest: Urban fabric: How is ‘sharing’ shaping cities? Does it represent a paradigm shift with tangible and physical reverberations on urban form? How are shared mobility, work, inhabiting reconfiguring the urban and social fabric? Social practices: Are new lifestyles and practices related to sharing changing the use and design of spaces? To what extent is sharing triggering a production and consumption paradigm shift to be reflected in urban arrangements and infrastructures? Sustainability: Does sharing increase the intensity of use of space and assets, or, rather, does it increase them to meet the expectations of convenience for urban lifestyles? To what extent are these phenomena fostering more economically-, socially-, and environmentally-sustainable practices and cities? Policy: How can policy makers and municipalities interact with these bottom-up and phenomena and grassroots innovation to create more sustainable cities? Scholars responded to the above questions from the fields of urban studies, urban planning and

design, sociology, geography, theoretically-grounded and informed by the results of fieldwork activities.
