Technoscience and Postphenomenology Jan Kyrre Berg Friis, Robert P. Crease, 2015-10-30 Friis and Crease capture Postphenomenology, a new field that has attracted attention among scholars engaged in technology studies. Contributors to this edited collection seek to analyze, clarify, and develop postphenomenological language and concepts, expand the work of Don Ihde, the field's founder, and scout into fields that Ihde never tackled. Many of the contributors to this collection had especially close ties to Ihde and have benefited from close work with him. This combined with the distinctive diversity of the contributors—18 people from 10 different countries—enables this volume to put on display the diversity of content and styles in this young movement.

Multi-Ethnic Britain 2000+ , 2008-01-01 *Multi-Ethnic Britain 2000+* provides an encompassing survey of artistic responses to the changes in the British cultural climate in the early years of the 21st century. It traces topical reactions to new forms of racism and religious fundamentalism, to legal as well as 'illegal' immigration, and to the threat of global terror; yet it also highlights new forms of intercultural communication and convivial exchange. Framed by contributions from novelists Patrick Neate and Rajeev Balasubramanyam, *Multi-Ethnic Britain 2000+* showcases how artistic representations in literature, film, music and the visual arts reflect and respond to social and political discourses, and how they contribute to our understanding of the current (trans)cultural situation in Britain. The contributions in this volume cover a wide range of writers such as Graham Swift, Ian McEwan, Zadie Smith, Jackie Kay, Nadeem Aslam, Gautam Malkani, Nirpal Dhaliwal and Monica Ali; films ranging from Gurinder Chadha's *Bend It Like Beckham* and *Bride and Prejudice* to Michael Winterbottom's *In This World* and Alfonso Cuarón's *Children of Men*; paintings and photography by innovative black and Asian British Artists; and dubstep music.

Dance Music Nicolae Sfetcu, 2014-05-09 Dance music is music composed, played, or both, specifically to accompany dancing. It can be either the whole musical piece or part of a larger musical arrangement. Dance music works usually bear the name of the corresponding dance, e.g. waltzes, the tango, the bolero, the can-can, minuets, salsa, various kinds of jigs and the breakdown. Other dance forms include contradance, the merengue, the cha-cha-cha. Often it is difficult to know whether the name of the music came first or the name of the dance. Although dance is often accompanied by music, it can also be presented alone (Postmodern dance) or provide its own accompaniment (tap dance). Dance presented with music may or may not be performed in time to the music depending on the style of dance. Dance performed without music is said to be danced to its own rhythm. An introduction to classical and modern dance including hip hop dance, what is dance, and the dance music (electronic music, rock and roll, disco, house, techno, trance, etc.)

Technologies of the Gothic in Literature and Culture Justin D. Edwards, 2015-02-11 This volume, a collection with contributions from some of the major scholars of the Gothic in literature and culture, reflects on how recent Gothic studies have foregrounded a plethora of technologies associated with Gothic literary and cultural production. The engaging essays look into the links between technologies and the proliferation of the Gothic seen in an excess of Gothic texts and tropes: Frankensteinesque experiments, the manufacture of synthetic (true?) blood, Moreauesque hybrids, the power of the Borg, Dr Jekyll's chemical experimentations, the machinery of Steampunk, or the corporeal modifications of Edward Scissorhands. Further, they explore how techno-science has contributed to the proliferation of the Gothic: Gothic in social media, digital technologies, the on-line gaming and virtual Goth/ic communities, the special effects of Gothic-horror cinema. Contributors address how Gothic technologies have, in a general sense, produced and perpetuated ideologies and influenced the politics of cultural practice, asking significant questions: How has the technology of the Gothic contributed to the writing of self and other? How have Gothic technologies been gendered, sexualized, encrypted, coded or de-coded? How has the Gothic manifested itself in new technologies across diverse geographical locations? This volume explores how Gothic technologies textualize identities and construct communities within a complex network of power relations in

local, national, transnational, and global contexts. It will be of interest to scholars of the literary Gothic, extending beyond to include fascinating interventions into the areas of cultural studies, popular culture, science fiction, film, and TV.

Now some of that knowledge has been distilled into The Wire Primers: a comprehensive guide to the core recordings of some of the most visionary and inspiring, subversive and radical musicians on the planet, past and present. Each chapter surveys the musical universe of a particular artist, group or genre by way of a contextualizing introduction and a thumbnail guide to the most essential recordings. A massive and eclectic range of music is celebrated and demystified, from rock mavericks such as Captain Beefheart and The Fall; the funk of James Brown and Fela Kuti; the future jazz of Sun Ra and Ornette Coleman; and the experimental compositions of John Cage and Morton Feldman. Genres surveyed and explained include P-funk, musique concrète, turntablism, Brazilian Tropicália, avant metal and dubstep. Music–Psychoanalysis–Musicology Samuel Wilson, 2017-11-22 There is a growing interest in what psychoanalytic theory brings to studying and researching music. Bringing together established scholars within the field, as well as emerging voices, this collection outlines and advances psychoanalytic approaches to our understanding of a range of musics—from the romantic and the modernist to the contemporary popular. Drawing on the work of Freud, Lacan, Jung, Žižek, Barthes, and others, it demonstrates the efficacy of psychoanalytic theories in fields such as music analysis, music and culture, and musical improvisation. It engages debates about both the methods through which music is understood and the situations in which it is experienced, including those of performance and listening. This collection is an invaluable resource for students, lecturers, researchers, and anyone else interested in the intersections between music, psychoanalysis, and musicology.

Digital Media Stacey O'Neal Irwin, 2016-04-29 *Digital Media: Human-Technology Connection* examines what it is like to be alive in today's technologically textured world and showcases specific digital media technologies that makes this kind of world possible. So much of human experience occurs through digital media that it is time to pause and consider the process and proliferation of digital consumption and humanity's role in it through an interdisciplinary array of sources from philosophy, media studies, film studies, media ecology and philosophy of technology. When placed in the interpretive lens of artifact, instrument, and tool, digital media can be studied in a uniquely different way, as a kind of technology that pushes the boundaries on production, distribution and communication and alters the way humans and technology connect with each other and the world. The book is divided into two sections to provide overarching definitions and case study specifics. Section one, *Raw Materials*, examines pertinent concepts like digital media, philosophy of technology, phenomenology and postphenomenology by author Stacey O Irwin. In Section Two, *Feeling the Weave*, Irwin uses conversations with digital media users and other written materials along with the postphenomenological framework to explore nine empirical cases that focus on deep analysis of screens, sound, photo manipulation, data-mining, aggregate news and self-tracking. Postphenomenological concepts like multistability, variational theory, microperception, macroperception, embodiment, technological mediation, and culture figure prominently in the investigation. The aim of the book is to recognize that digital media technologies and the content it creates and proliferates are not neutral. They texture the world in multiple and varied ways that transform human abilities, augment experience and pattern the world in significant and comprehensive ways.
