Echo Amit Pinchevski,2022-05-10 An exploration of echo not as simple repetition but as an agent of creative possibilities. In this volume in the MIT Press Essential Knowledge series, Amit Pinchevski proposes that echo is not simple repetition and the reproduction of sameness but an agent of change and a source of creation and creativity. Pinchevski views echo as a medium, connecting and mediating across and between disparate domains. He reminds us that the mythological Echo, sentenced by Juno to repeat the last words of others, found a way to make repetition expressive. So too does echo introduce variation into sameness, mediating between self and other, inside and outside, known and unknown, near and far. Echo has the potential to bring back something unexpected, either more or less than what was sent. Pinchevski distinguishes echo from the closely related but sometimes conflated reflection, reverberation, and resonance; considers echolalia as an active, reactive, and creative vocalic force, the launching pad of speech; and explores echo as a rhetorical device, steering between appropriation and response while always maintaining relation. He examines the trope of echo chamber and both destructive and constructive echoing; describes various echo techniques and how echo can serve practical purposes from echolocation in bats and submarines to architecture and sound recording; explores echo as a link to the past, both literally and metaphorically; and considers echo as medium using Marshall McLuhan's tetrad.

Echo and Narcissus Polona Petek,2021-02-03 Echo and Narcissus: Echolocating the Spectator in the Age of Audience Research came about as a response to the recent shift of focus in the studies of cinema. While the seventies and the eighties were marked by increasingly complex theorisations of spectatorship, the last two decades have witnessed a turn towards ethnographic research into film reception. However, this long overdue turn towards the empirical viewer has not produced a genuinely broader scope of analysis. It has rather, all too hastily, consigned the spectator, a textually constructed viewing position, to oblivion, thanks to the concept's perceived hegemonic and totalising premise. Echo and Narcissus intervenes into this state of affairs by arguing for a productive nexus between theorisations of spectatorship and the currently more fashionable audience research. Petek maintains that an informed mapping of contemporary (and past) filmviewing practices still requires a spectatorial model and she offers such a model through a re-reading of Ovid's tale of Echo and Narcissus. She demonstrates that the myth's central role in traditional theorisations of spectatorship has not yet been properly reflected upon. Her critical recuperation of the Ovidian myth provides a revised model of the spectator—one with discursive access to all types of cinema, yet, flexible enough to accommodate a range of viewers' responses and their cultural diversity.

Noise Reduction in Speech Applications Gillian M. Davis,2018-10-03 Noise and distortion that degrade the quality of speech signals can come from any number of sources. The technology and techniques for dealing with noise are almost as numerous, but it is only recently, with the development of inexpensive digital signal processing hardware, that the implementation of the technology has become practical. Noise Reduction in Speech Applications provides a comprehensive introduction to modern techniques for removing or reducing background noise from a range of speech-related applications. Self-contained, it starts with a tutorial-style chapter of background material, then focuses on system aspects, digital algorithms, and implementation. The final section explores a variety of applications and demonstrates to potential users of the technology the results possible with the noise reduction techniques presented. The book offers chapters contributed by international experts, a practical, systems approach, and numerous references. For electrical, acoustics, signal processing, communications, and bioengineers, Noise Reduction in Speech Applications is a valuable resource that shows you how to decide whether noise reduction will solve problems in your own systems and how to make the best use of the technologies available.

An Aesthetic Education in the Era of Globalization Gayatri Chakravorty Spivak,2013-05-06 During the past twenty years, the worldÖs most renowned critical theoristÑthe scholar who defined the field of postcolonial studiesÑhas experienced a radical reorientation in her thinking. Finding the neat polarities of tradition and modernity, colonial and postcolonial, no longer sufficient for interpreting the globalized present, she turns elsewhere to make her central argument: that aesthetic education is the last available instrument for implementing global justice and democracy. SpivakÕs unwillingness to sacrifice the ethical in the name of the aesthetic, or to sacrifice the aesthetic in grappling with the political, makes her task formidable. As she wrestles with these fraught relationships, she rewrites Friedrich SchillerÕs concept of play as double bind, reading Gregory Bateson with Gramsci as she negotiates Immanuel Kant, while in dialogue with her teacher Paul de Man. Among the concerns Spivak addresses is this: Are we ready to forfeit the wealth of the worldÕs languages in the name of global communication? ÒEven a good globalization (the failed dream of socialism) requires the uniformity which the diversity of mother-tongues must challenge,Ó Spivak writes. OThe tower of Babel is our refuge.Ó In essays on theory, translation, Marxism, gender, and world literature, and on writers such as Assia Djebar, J. M. Coetzee, and Rabindranath Tagore, Spivak argues for the social urgency of the humanities and renews the case for literary studies, imprisoned in the corporate university. OPerhaps,Ó she writes, Othe literary can still do something.Ó

Protecting the Mind Pablo López-Silva,Luca Valera,2022-03-01 This book offers a comprehensive analysis of philosophical, social, ethical, and legal challenges arising as a consequences of current advances in neurosciences and neurotechnology. It starts by offering an overview of fundamental concepts such as mental privacy, personal autonomy, mental integrity, and responsibility, among others. In turn, it discusses the influence of possible misuses or uncontrolled uses of neurotechnology on those concepts, and, more in general, on human rights and equality. Then, it makes some original proposals to deal with the main ethical, legal, and social problems associated to the use of neurotechnology, both in medicine and in everyday life, suggesting possible policies to protect privacy, neural data, and intimacy. Crossing the borders between humanities, natural sciences, bio-medicine, and engineering, and taking into account geographical and cultural differences, this book offers a conceptual debate around policy and decision making concerning some of the key neuroethical challenges of our times. It offers a comprehensive guide to the most important issues of neurojustice and neuroprotection, together with a set of new paradigms to face some of the most urgent neuroethical problems of our times.

Joseph Jongen and His Organ Music John Scott Whiteley, 1997 Joseph Jongen was Director of the Brussels Conservatoire from 1925 to 1939. He was first and foremost a composer and yet his career as an organist and composer of organ music was remarkable. His Sonata Ero career as an organist and composer of organ music was remarkable. His Sonata Ero

Rodman Wanamaker for the organ of the Philadelphia store, has been considered the finest of all twentieth-century organ concertos. This is the first book ever to appear about loseph longen in any language. It is based on twenty years of research by its author, John Scott Whiteley. Part I traces Jongen's life and achievements as an organist, from his earliest training in Franck's birthplace, Li 🕏 ge, to his exile in England and his final years in Brussels, during which time he headed the team that designed the organ for Belgian Radio. Part II is a guide to the organ music from the points of view of both performer and musicologist. Appendices provide a catalogue of works, a numbering system for his works without opus numbers, specifications of the organs he played and lists of variant readings in his manuscripts. This book is indispensable for serious students of the organ, the Romantic organ repertoire and European music of the early twentieth century.

World of Echo Adin E. Lears, 2020-09-15 Between late antiquity and the fifteenth century, theologians, philosophers, and poets struggled to articulate the correct relationship between sound and sense, creating taxonomies of sounds based on their capacity to carry meaning. In World of Echo, Adin E. Lears traces how medieval thinkers adopted the concept of noise as a mode of lay understanding grounded in the body and the senses. With a broadly interdisciplinary approach, Lears examines a range of literary genres to highlight the poetic and social effects of this vibrant discourse, offering close readings of works by Geoffrey Chaucer and William Langland, as well as the mystics Richard Rolle and Margery Kempe. Each of these writers embraced an embodied experience of language resistant to clear articulation, even as their work reflects inherited anxieties about the appeal of such sensations. A preoccupation with the sound of language emerged in the form of poetic soundplay at the same time that mysticism and other forms of lay piety began to flower in England. As Lears shows, the presence of such emphatic aural texture amplified the cognitive importance of feeling in conjunction with reason and was a means for the laity—including lay women—to cultivate embodied forms of knowledge on their own terms, in precarious relation to existing clerical models of instruction. World of Echo offers a deep history of the cultural and social hierarchies that coalesce around aesthetic experience and gives voice to alternate ways of knowing. The Spivak Reader Gayatri Spivak, 2013-10-18 Among the foremost feminist critics to have emerged to international eminence over the last fifteen years, Gayatri Chakravorty Spivak has relentlessly challenged the high ground of established theoretical discourse in literary and cultural studies. Although her rigorous reading of various authors has often rendered her work difficult

terrain for those unfamiliar with poststructuralism, this collection makes significant strides in explicating Spivak's complicated theories of reading.
